*Distributional Impacts of environmental and energy taxes* Gravers Skygebjerg, Jan,Nybro Hansen, Troels,Madsen, Peter,von Bahr, Emelie,2020-10-29 Available online <https://pub.norden.org/temanord2020/533> To support the green transition the use of green taxation might increase in the coming years Public support of such policy interventions will among other things depend on the distributional impacts of the regulation Increased green taxation can result in unwanted distributional impacts in the economy at large because environmental taxation tends to make up a larger share of the disposable income of low income families This study investigates current guides and practices in the Nordic countries on how the distributional effects from environmental taxation are analyzed and incorporated into the policy design This is combined with research findings on the distributional effects of environmental taxation and possible mitigating actions The study indicates that the Nordic countries could benefit from better integration of mitigating strategies between agencies

Assessing the Economic Impacts of Environmental Policies Evidence from a Decade of OECD Research OECD,2021-05-17 Over the past decades governments have gradually adopted more rigorous environmental policies to tackle challenges associated with pressing environmental issues such as climate change The ambition of these policies is however often tempered by their perceived negative effects on the economy

Modelling the Costs of Environmental Policy Rob B. Dellink,2005-01-01 Extending

economic models to include environmental emissions and environmental policy is now commonplace Yet the linking is often ad hoc and based on peculiar assumptions In this book Rob Dellink shows how emissions and emission reduction policies for five different environmental issues can be included in a forward looking computable general equilibrium model building emissions into production and consumption functions At the technical level the book is superb and stands out for its exact specification of how this is done Richard S J Tol Hamburg University Germany Free University Amsterdam The Netherlands and Carnegie Mellon University US This important new book enhances our understanding of the dynamic interactions between economic activity economic growth pollution abatement and environmental policy It addresses one main policy problem how can the direct and indirect costs of environmental policy for multiple pollutants be properly assessed in an applied model     Selected Water Resources Abstracts ,1979     **Mining Environmental Handbook: Effects Of Mining**

Innovation-Oriented Environmental Regulation J. Hemmelskamp,K. Rennings,F. Leone,2013-11-27 Innovation oriented environmental regulation is extremely attractive for policy planners and decision makers since it is expected that innovations can cut costs of environmental measures and overcome existing trade offs between economic and ecological goals The central question is however how such a regulatory regime of environmental policy approaches should look like This book provides an excellent overview of the state of research by presenting and discussing theoretical approaches towards a framework of environmental regulation and innovation international case studies as well as econometric and modelling studies from Europe and the USA

*Environmental Justice Context, Challenges and National Approaches* OECD,2024-05-28 There is mounting evidence that depending on social and economic circumstances some communities and groups may face disproportionate exposure to environmental hazards bear an inequitable share of the costs associated with environmental policies or face more barriers to participating in environmental decision making As countries increase their efforts to tackle environmental degradation pollution and climate change the concept of environmental justice can shed light on how to ensure fairness in the processes and outcomes of environmental policymaking This report examines the plurality of the concept of environmental justice its underlying conceptual pillars and how it has emerged in different contexts around the world The report also provides the first policy stocktake of how governments across the OECD and beyond are seeking to redress environmental justice concerns building upon insights from 26 responses to the OECD Environmental Justice Survey as well as complementary desk analysis across a broader set of countries
