their principles in any way It will therefore draw upon other aspects of economic theory and enrich them suitably It is therefore expected that all aspects of Economic theory will be taken into consideration for policy formulation and decision making including those of Anthropological economics and independent context specific judgment will always be applied The new proposed field of Anthropological Economics proposes to take the idea of Human Welfare to its logical conclusion by extending the work already carried out in various sub disciplines of economics and integrating it more tightly with various concepts in Anthropology Many new tools and techniques are therefore proposed as a part of this paper and we believe these will suitably enrich the field of Economics as well While many attempts have been made in the past to integrate the fields of Anthropology and Economics we hope this endeavour will take this exercise to a much higher level by creating a new generation of Anthroeconomists We also hope it will eventually help move mainstream economics away from Neo classical approaches to Anthropological and human centric approaches

Mutatkar, 2020-01-01 This book offers a perspective about addressing the issues and concerns of the people of India through an anthropological lens. The contradiction and conflict about Anthropology as a knowledge system and as an academic discipline in the university system in India with demands made to analyse national issues and offer implementable recommendations are discussed giving empirical examples as experienced by the author as Practicing Anthropology. Constitution of India representing the aspirations of the people has opened the flood gates of demands from Anthropology to play a leading role in ensuring human development with human dignity. Addressing the issues of poverty and development, social and economic discrimination and deprivation, health and disease, food security, gender equality form the agenda of anthropology in collaboration with natural and social sciences and with the humanities. The concept of Holism has to incorporate the Emic, Etic, Macro, Micro perspectives to address the policies at national level for effective people-centric, result-oriented implementation at local level. Plurality, Diversity, Human Rights, Inter sectoral co-ordination, Think Globally, Act Locally are rooted in anthropological theory. The book attempts to discuss this post-colonial anthropological paradigm      **Key Thinkers on Development** David Simon, 2019-04-02 Since its publication in 2006 as *Fifty Key Thinkers on Development*, this invaluable reference has established itself as the leading biographical handbook in its field, providing a concise and accessible introduction to the lives and key contributions of development thinkers from across the ideological and disciplinary spectrum. This substantially expanded and fully updated second edition in the relaunched series without the numerical constraint includes an additional 24 essays filling in many gaps in the original selection, greatly improving the gender balance and diversifying coverage to reflect the evolving landscape of development in theory, policy and practice. It presents a unique guide to the lives, ideas and practices of leading contributors to the contested terrain of development studies and development policy and practice. Its thoughtful essays reflect the diversity of development in theory, policy and practice across time, space, disciplines and communities of practice. Accordingly, it challenges Western centrism, Orientalism and the like while also demonstrating the enduring appeal of development in different guises.
