on empirical fieldwork conducted by the authors themselves This title takes a look at urban food provisioning in Cameroon and an investigation into entrepreneurial activities in the rapidly changing economy of Cairo *The Struggle over the Soul of Economics* Yuval P. Yonay,1998-05-11 This book provides a surprising answer to two puzzling questions that relate to the very soul of the professional study of economics in the late twentieth century How did the discipline of economics come to be dominated by an approach that is heavily dependent on mathematically derived models And what happened to other approaches to the discipline that were considered to be scientifically viable less than fifty years ago Between the two world wars there were two well accepted schools of thought in economics the neoclassical which emerged in the last third of the nineteenth century and the institutionalist which started with the works of Veblen and Commons at the end of the same century Although the contributions of the institutionalists are nearly forgotten now Yuval Yonay shows that their legacy lingers in the study and practice of economics today By reconsidering their impact and by analyzing the conflicts that arose between neoclassicists and institutionalists Yonay brings to life a hidden chapter in the history of economics The author is a sociologist of science who brings a unique perspective to economic history By utilizing the actor network approach of Bruno Latour and Michel Callon he arrives at a deeper understanding of the nature of the changes that took place in the practice of economics His analysis also illuminates a broader set of issues concerning the nature of scientific practice and the forces behind changes in scientific knowledge Paul, Poverty and Survival Justin Meggitt,1998-01-01 This social history of earliest Christianity radically re evaluates both the methods and models of other studies Justin Meggitt draws on the most recent research in classical studies on the economy and society of the Roman Empire He examines the economic experiences of the Pauline churches and locates Paul and the members of his communities within the context of the first century Roman economy He explores their experiences of employment nutrition and housing He uncovers and describes the unique responses that they made to such a harsh environment And he questions whether from the outset Christianity included a number of affluent individuals A thoroughly researched and ground breaking study The Concise Encyclopedia of Sociology George Ritzer,J. Belabes,2024-08-12 Through an examination of the work of great scholars from fields including philosophy literature philology semiology quantum physics history and anthropology this book argues that building on the contribution of non economists can open new areas of reflection in economics beyond the usual schools of thought The purpose of the book is twofold First it offers a critique and discussion of the limits of contemporary economic discourse both mainstream and self styled alternative theories The central theme on which the book is built is that the discipline of economics fails to examine the nature of social reality in a systematic way This prompts the economists to become fully aware of the methodology on which they base their representation analysis and argumentation in a way that economists currently are not Second the book proposes alternative ways of thinking that can help readers of economics to overcome the current limitations of their discipline This means going beyond various dominant dualities orthodox heterodox micro macro epistemology ontology because it is not a question of doing the economy differently but of overcoming the economy as a representation of the world that strives to submit everything to its realm Thus the book does not simply propose a broader conceptual framework than that portrayed by mainstream economists or those who propose an alternative approach but raises questions that do not usually come from the minds of economists at all The book will be of particular interest to readers of economic methodology and pluralism philosophers of science and other social scientists interested in methodological issues The Myth of the Medieval Jewish Moneylender Julie L. Mell,2017-10-14 This book challenges a common historical narrative which portrays medieval Jews as moneylenders who filled an essential economic role in Europe It traces how and why this narrative was constructed as a philosemitic narrative in the nineteenth and twentieth centuries in response to the rise of political antisemitism This book also documents why it is a myth for medieval Europe and illuminates how changes in Jewish history change our understanding of European history Each chapter offers a novel interpretation of central topics such as the usury debate commercial contracts and moral literature on money and value to demonstrate how the revision of Jewish history leads to new insights in European history *Connections* James E. Katz,2017-11-30 Perhaps no other technology has done so much to so many but been studied by so few as the telephone Even as its physical size diminishes the telephone is becoming more important In *Connections* now available in paperback James E Katz gives greater visibility to this important element in modern life Katz examines how the telephone reveals gender relations in a way not predicted by feminist theories how it can be used to protect and invade personal privacy and how people harness telephone answering machines to their advantage Katz s inquiry reports on obscene phone calls the abuses of caller ID technology and attitudes toward voice mail National data about cellular telephones are presented to show the extent to which beepers and car phones have become status symbols Katz ranges from microsocial interaction to macrosocial theory and from the family and personal levels of organization to that of large scale industrial bureaucracies The result of this investigation is a compelling mosaic spanning sociology and psychology and organization and communication studies These arresting portraits will offer profound insight to

historians students of American culture and those concerned about the nature and direction of the emerging information society

Evolutionary Economics: v. 1 Marc R. Tool, 2019-07-12 The contributors to this volume focus on the political and value issues that in their shared view underlie the global environmental crisis facing us today They argue that only by transforming our dominant values social institutions and way of living can we avoid ecological disaster

Moore, 2011-05-12 The purpose of this book is to help postmodern Westerners understand what the Bible has to say about wealth and possessions basing itself on the presumption that a nobody can understand themselves apart from some recognition of their spiritual roots and b that these roots sink deeper into the pages of the Bible than most Westerners realize Focusing upon that part of the Bible most widely recognized to be its ideological core that which is called Torah by some Pentateuch by others it interprets this great text against other great texts in its literary historical environment including a some epic poems from Mesopotamia b some Jewish texts from Syria Palestine and c some Nazarene parables from the Greek New Testament
