Carpenter, Louise A. Fallon, Paul B. Sherman, Supachit Manipomoke, 2013-11-05 It has always been thought that some level of pollution and waste is unavoidable in development projects. But no one has made much effort to quantify and assess the extent of this sort of damage. In this book a group of analysts from the Asian Development Bank and from the East West Center propose a means of constructing useful economic evaluations of the impacts of development projects on the environments in which they are constructed. This study demands the systematic evaluation of all the intentional and unintentional consequences of development initiatives before they are determined upon. It is essential reading for development economists, analysts and bankers. Ernst,1976 **Economic Analysis Of Environmental Problems** Gregory C Chow,2014-11-27 This book introduces the basic tools of dynamic optimization in economics to study environmental problems applies econometric methods to estimate and test the models derived by dynamic optimization and discusses environmental problems in a broad perspective including the design and implementation of environmental policies Although the coverage is selective it represents what the author has to offer from his perspective and experience gained in research in dynamic optimization econometrics and policy analysis especially for China The volume is self contained for readers with mathematical background of first year graduate students in the analytical fields of science and engineering but only limited training in economics while an economics text presumes more knowledge of economics Once the tools are mastered the reader can pursue his own research on the topic if he is interested or simply become a more mature citizen in the global economy Environmental Economics and Investment Assessment K. Aravossis,2006 The current emphasis on sustainable development is a consequence of the general awareness of the need to solve numerous environmental problems resulting from our modern society This book addresses the topic of Investment Assessment and Environmental Economics in an integrated way in accordance with the principles of sustainability considering social and environmental impacts of new investments Bringing together papers from the First International Conference on Environmental Economics and Investment Assessment papers encompass topic areas such as Economy and the Environment Investment Planning and Assessment Environmental Economics and Entrepreneurship Environmental Investment Planning Sustainable Environmental Management Environmental Impact Assessments and Investments Environmental Performance Indicators Environmental Management Systems Legislation and Law Enforcement Cost Benefits Analysis Natural Resources Management Social Issues and Environmental Policies Risk Management in Environmental Investment Location Optimization **The Application of Economic Techniques in Environmental Impact Assessment** David E. James,2013-03-09 The contribution of economic thought and method to environmental management needs practical illustration Too few books on the subject achieve such an outcome This book is among the notable exceptions That economics can provide a powerful vehicle for communicating an integrated understanding of the often diverse scientific findings germane to environmental impact assessment needs to be illustrated convincingly This book does just that But it does more It speaks across cultures not to transfer know how from one culture to another but rather to activate an effective exchange of insights from one locale on the planet to another As such it is a genuine contribution to the great environmental exhortation of our times think globally act locally Too often the people best placed to make such contributions are too committed to practical outcomes and making a living doing so Just occasionally however they can be persuaded to make the special effort required to communicate globally In this book David James has once again orchestrated the contributions of virtuoso performers In doing so he has emulated the contribution he sustained throughout the International Drylands Project and preparation of the books written with John Dixon and Paul Sherman The Economics of Dry
