*Law and Society in England 1750-1950* William Cornish, Stephen Banks, Charles Mitchell, Paul Mitchell, Rebecca Probert, 2019-10-31 Law and Society in England 1750 1950 is an indispensable text for those wishing to study English legal history and to understand the foundations of the modern British state In this new updated edition the authors explore the complex relationship between legal and social change They consider the ways in which those in power themselves imagined and initiated reform and the ways in which they were obliged to respond to demands for change from outside the legal and political classes What emerges is a lively and critical account of the evolution of modern rights and expectations and an engaging study of the formation of contemporary social administrative and legal institutions and ideas and the road that was travelled to create them The book

is divided into eight chapters Institutions and Ideas Land Commerce and Industry Labour Relations The Family Poverty and Education Accidents and Crime This extensively referenced analysis of modern social and legal history will be invaluable to students and teachers of English law political science and social history     *Finance and the Real Economy* Peter Nolan,2020-10-05 The different approach taken by China and the West towards finance and the real economy rests upon philosophical foundations that have diverged fundamentally since the Ancient World Since the Asian Financial Crisis in 1997 98 a tremendous transformation has taken place in the financial systems in both China and the West China has persisted steadily with reform of its financial system but it remains heavily protected from international competition In the West regulatory structures have been progressively dismantled permitting an unprecedented secular expansion of asset prices and debt relative to GDP The structure crashed to the ground with the collapse of asset prices in 2008 09 In the decade since the GFC asset prices and debt in the West have rebounded The West s financial system stands on a knife edge In 2018 China announced the intention to accelerate the opening up of the country s capital markets The way in which the Chinese and the West s financial system interact constitutes a central issue in global political economy in the years ahead     **The Statesman's Year-Book** M. Epstein,2016-12-24 The classic reference work that provides annually updated information on the countries of the world     **The International Distribution of News** Jonathan Silberstein-Loeb,2014-02-24 This book traces the history of international news agencies and associations around the world from 1848 to 1947 Jonathan Silberstein Loeb argues that newspaper publishers formed news associations and patronized news agencies to cut the costs of news collection and exclude competitors from gaining access to the news     *The Historiography of Transition* Paolo Pombeni,2015-10-23 Defining a historic transition means understanding how the complex system of intellectual social and material structures formed that determined the transition from a certain universe to a new universe where the old explanations were radically rethought In this book a group of historians with specializations ranging from the sixteenth to the twentieth centuries and across political religious and social fields attempt a reinterpretation of modernity as the new Axial Age     **The Statesman's Year-book** ,1928     **Power to the People** Astrid Kander,Paolo Malanima,Paul Warde,2015-12-29 *Power to the People* examines the varied but interconnected relationships between energy consumption and economic development in Europe over the last five centuries It describes how the traditional energy economy of medieval and early modern Europe was marked by stable or falling per capita energy consumption and how the First Industrial Revolution in the eighteenth century fueled by coal and steam engines redrew the economic social and geopolitical map of Europe and the world The Second Industrial Revolution continued this energy expansion and social transformation through the use of oil and electricity but after 1970 Europe entered a new stage in which energy consumption has stabilized This book challenges the view that the outsourcing of heavy industry overseas is the cause arguing that a Third Industrial Revolution driven by new information and communication technologies has played a major stabilizing role *Power to the*

People offers new perspectives on the challenges posed today by climate change and peak oil demonstrating that although the path of modern economic development has vastly increased our energy use it has not been a story of ever rising and continuous consumption The book sheds light on the often lengthy and complex changes needed for new energy systems to emerge the role of energy resources in economic growth and the importance of energy efficiency in promoting growth and reducing future energy demand

*The Technology Trap* Carl Benedikt Frey,2020-09-22 From the Industrial Revolution to the age of artificial intelligence Carl Benedikt Frey offers a sweeping account of the history of technological progress and how it has radically shifted the distribution of economic and political power among society s members As the author shows the Industrial Revolution created unprecedented wealth and prosperity over the long run but the immediate consequences of mechanization were devastating for large swaths of the population These trends broadly mirror those in our current age of automation But just as the Industrial Revolution eventually brought about extraordinary benefits for society artificial intelligence systems have the potential to do the same Benedikt Frey demonstrates that in the midst of another technological revolution the lessons of the past can help us to more effectively face the present From publisher description

*From Oikonomia to Political Economy* Germano Maifreda,2016-04-22 Renaissance Europe witnessed a surge of interest in new scientific ideas and theories Whilst the study of this Scientific Revolution has dramatically shifted our appreciation of many facets of the early modern world remarkably little attention has been paid to its influence upon one key area that of economics Through an interrogation of the relationship between economic and scientific developments in early modern Western Europe this book demonstrates how a new economic epistemology appeared that was to have profound consequences both at the time and for subsequent generations Dr Maifreda argues that the new attention shown by astronomers physicians aristocrats men of letters travellers and merchants for the functioning of economic life and markets laid the ground for a radically new discourse that envisioned economics as an independent field of scientific knowledge By researching the historical context surrounding this new field of knowledge he identifies three key factors that contributed to the cultural construction of economics Firstly Italian Humanism and Renaissance which promoted new subjects methods and quantitative analysis Secondly European overseas expansion which revealed the existence of economic cultures previously unknown to Europeans Thirdly factor identified is the fifteenth and sixteenth century crisis of traditional epistemologies which increasingly valued empirical scientific knowledge over long held beliefs Based on a wide range of published and archival sources the book illuminates new economic sensibilities within a range of established and more novel scientific disciplines including astronomy physics ethnography geology and chemistry alchemy By tracing these developments within the wider social and cultural fields of everyday commercial life the study offers a fascinating insight into the relationship between economic knowledge and science during the early modern period
