Economics And World History Myths And Paradoxes:

Economics and World History Paul Bairoch, 1995-09 Paul Bairoch deflates twenty commonly held myths about economic history Among these myths are that free trade and population growth have historically led to periods of economic growth and that colonial powers in the nineteenth and early twentieth centuries became rich through the exploitation of the Third World Bairoch shows that these beliefs are based on insufficient knowledge and wrong interpretations of the history of economies of the United States Europe and the Third World and he re examines the facts to set the record straight Bairoch argues that until the early 1960s the history of international trade of the developed countries was almost entirely one of protectionism rather than a Golden Era of free trade and he reveals that in fact past periods of economic growth in the Western World correlated strongly with protectionist policy He also demonstrates that developed countries did not exploit the Third World for raw materials during the nineteenth and early twentieth centuries as some economists and many politicians have held Among the many other myths that Bairoch debunks are beliefs about whether colonization triggered the Industrial Revolution the effects of the economic development of the West on the Third World and beliefs about the 1929 crash and the Great Depression Bairoch's lucid prose makes the book equally accessible to economists of every stripe as well as to historians political scientists and other social scientists

Trade and Poverty Jeffrey G. Williamson, 2013-01-11 How the rise of globalization over the past two

centuries helps explain the income gap between rich and poor countries today Today's wide economic gap between the postindustrial countries of the West and the poorer countries of the third world is not new Fifty years ago the world economic order two hundred years in the making was already characterized by a vast difference in per capita income between rich and poor countries and by the fact that poor countries exported commodities agricultural or mineral products while rich countries exported manufactured products In *Trade and Poverty* leading economic historian Jeffrey G Williamson traces the great divergence between the third world and the West to this nexus of trade commodity specialization and poverty Analyzing the role of specialization de industrialization and commodity price volatility with econometrics and case studies of India Ottoman Turkey and Mexico Williamson demonstrates why the close correlation between trade and poverty emerged Globalization and the great divergence were causally related and thus the rise of globalization over the past two centuries helps account for the income gap between rich and poor countries today

Asian Economy and Finance: Dilip K. Das-Gupta, 2006-03-30 Topicality of Asian economy has refused to fade for almost four decades if anything it has been levitating The Asian economy has changed markedly since the economic and financial crisis of 1997 1998 and is continuing to evolve As a scholarly subject matter Asian economy has not stopped attracting academicians policy mandarins decision makers in the arena of business and students of Asian economy The Asian crisis was a cataclysmic event for the region and brought to the surface several systemic limitations like those in the financial sector corporate governance regulatory oversight legal framework and exchange rate management Managers of Asian economy need to get to the bottom of these acutely problematical systemic issues Additionally Asian economies need to change with the demands of time and devise their post crisis development strategy Asia's growth model that served it so well for four decades is overdue for renewal so that it can re strengthen its bonds with the ever evolving regional and global economic

reality The old growth model is likely to be less relevant and effective in the post crisis future of the Asian economies It is sure to run into the wall of diminishing returns An outstanding feature of Asian Economy and Finance A Post Crisis Perspective is that unlike most Asia related books it is written in a comprehensive and authoritative manner and covers large areas of Asian macro economy and finance The noteworthy areas of focus include global and intra regional trade and investment as well as financial and monetary aspects In depth discussions have been provided on regional integration through expanding trade financial flows regional production networks and financial and monetary co operation In taking a contemporary or post crisis view of the Asian economy this book offers the newest knowledge related to relevant themes on the Asian economies as well as the latest concepts In a succinct manner this book deals with the principal normative and positive strands with which one need to be properly familiar in this subject area This tightly written volume covers a great deal of ground and imparts knowledge on the Asian economy related themes to students researchers and policy makers alike The book is neither overly technical nor model oriented It is easy to access for the target readership because of its descriptive analysis style which stops short of mathematical formulations and econometric modeling Many students and other readers who have good analytical minds and sound knowledge of economic principles feel lost in mathematical formulations This writing style makes it accessible to a much larger number of readers

The Peasants of Ottobeuren, 1487-1726 Govind P. Sreenivasan, 2004-06-24 The Peasants of Ottobeuren offers an interesting perspective on one of the enduring problems of early modern European history the possibilities for economic growth and social change in rural society Based on the voluminous records of the Swabian Benedictine monastery of Ottobeuren this study underscores the limitations of the traditional narrative of a sixteenth century boom which foundered on the productive rigidities of the peasant economy and then degenerated into social crisis in the seventeenth century Population growth did strain resources at Ottobeuren but the peasantry continued to produce substantial agricultural surplus More importantly peasants reacted to demographic pressure by deepening their involvement in land and credit markets and more widely and aggressively marketing the fruits of their labour Marriage and inheritance underwent a similar process of commercialization which made heavy demands on the peasantry but which maintained a degree of social stability through the devastations of war plague and famine
