Their Future Michael Gubser, 2025-05-27 A compelling examination of how economic development projects ignore local history and the effects of this shortsightedness Foreign aid planners rarely consider the history of the societies in which they work an oversight noted in the development literature but rarely examined Aid programs costing billions of dollars operate largely in a historical vacuum divorced from the knowledge of what succeeded or failed in the past Michael Gubser chronicles the varieties of ahistoricism in international development theory and practice since 1945 He traces the history of development ideas analyzing key theoretical and policy statements to highlight the marginalization of history in favor of technical solutions to economic and social problems and he examines aid programs in several developing countries to show how Western models of social and economic development have been applied and misapplied

Too often in the history of Mexico women have been portrayed as marginal figures rather than legitimate participants in social processes. As the twentieth century draws to a close Mexican women of the countryside can be seen as true historical actors: mothers and heads of households, factory and field workers, community activists, artisans and merchants. In this new book thirteen contributions by historians, anthropologists and sociologists from Mexico as well as the United States elucidate the roles of women and changing gender relations in Mexico as rural families negotiated the transition from an agrarian to an industrial society. Drawing on Mexican community studies, gender studies and rural studies, these essays overturn the stereotypes of Mexican peasant women by exploring the complexity of their lives and roles and examining how these have changed over time. The book emphasizes the active roles of women in the periods of civil war 1854-76 and the commercialization of agriculture 1880-1910. It highlights their vigorous responses to the violence of revolution, their increased mobility and their interaction with state reforms in the period from 1910 to 1940. The final essays focus on changing gender relations in the countryside under the impact of rapid urbanization and industrialization since 1940. Because histories of Latin American women have heretofore neglected rural areas, this volume will serve as a touchstone for all who would better understand women's lives in a region of increasing international economic importance.

Women of the Mexican Countryside demonstrates that contrary to the peasant stereotype, these women have accepted complex roles to meet constantly changing situations.
