*The Economics of Nature* G. Cornelis Van Kooten, Erwin H. Bulte, 2000-07-26 The Economics of Nature Management takes a unique portfolio management perspective on the worldwide deterioration of the natural environment *Sustainable Development Indicators in Ecological Economics* Philip A. Lawn, 2006-01-01 The book covers a wide range of concepts pertaining to the sustainable development and successfully captures the inter connectivity of environmental preservation and sustainable development International Journal of Ecological Economics and Statistics this book is authoritative objective and essential reading for academics and policymakers concerned with the application of indicators of sustainable development It takes great care to emphasize what has worked what has not and what should be our future priorities for research the combination of these features certainly sets it apart from some other texts in the field Lee M Stapleton Journal of Environmental Planning and Management This book presents a comprehensive collection of essays from some of the world s leading experts surveying and highlighting both the potential and the limitations of a number of indicators specifically designed to measure sustainable development Illustrative applications are presented throughout in order to demonstrate the value of the approaches discussed This book is highly recommended for all those who are interested in a better understanding of what sustainable development is and its likely associated indicators and ultimately aims to contribute to a better foundation for public decision making Paulo A L D Nunes Venice International University C Foscari University Fondazione Eni Enrico Mattei Venice Italy and Vrije Universiteit Amsterdam The Netherlands Since the late 1980s and early 1990s national governments have introduced a range of policy measures designed to steer their economies along a more sustainable path Yet how are we to know how successful these have been This significant new book discusses the ways in which sustainable development indicators can be improved in order to both assess the impact of past policies and avoid the repetition of previous failings Covering a broad range of indicators relating to national accounts aggregate welfare natural capital ecosystem health and human environment interactions this volume provides an important assessment of the strengths and weaknesses of each With contributions from some of the most eminent scholars in the field the book competently analyses the various methods of measuring the sustainable development performance of nations and suggests many ways in which these can be developed and improved While the contributors might offer conflicting views the message they convey is universal the quest for appropriate sustainable development indicators is critically important if we are ever to bring about a fairer sustainable and more efficient world **Conserving Nature's Diversity: Insights from Biology, Ethics and Economics** G.C. Van Kooten, Erwin H Bulte, A.R.E. Sinclair, 2018-02-06 This title was first published in 2000 An edited collection based on a workshop which explored the biological social ethical economic and political pressures underlying the present perceived loss of biodiversity It brings together philosophers economists biologists and others whose fields deal with the conservation of nature s diversity and with the preservation and protection of species and ecosystems **Economics of**

**Poverty, Environment and Natural-Resource Use** Rob B. Dellink, Arjan Ruijs, 2008-03-25 Reduction of poverty is a tremendous and persistent challenge for the global community Given that the livelihood of millions is at stake there is an urgent need to reconsider the causes of and the remedies for poverty Poverty and its reduction are closely linked to the natural resources base The quality and bounty of the local environment certainly affect living conditions of the poor and their poverty is often seen as a contributing factor to the degraded condition of the local environment Teasing apart the direction of causality in this resource poverty nexus is a serious empirical challenge This book contributes to an improved understanding of the economic dimensions of environmental and natural resource management and poverty alleviation The ten chapters of the book offer an overview of the current knowledge concerning the relation between poverty environment and natural resource use Three sides of the debate receive particular attention First the relation between resource use and poverty is discussed from a theoretical point of view Second it is questioned whether payments for environmental services or considering values of resources can be an effective tool for stimulating both sustainable resource use and poverty alleviation Third alternative strategies to break the land degradation poverty cycle are discussed **Ibss: Economics: 2001** Compiled by the British Library of Political and Economic Science, 2002-12 IBSS is the essential tool for librarians university departments research institutions and any public or private institution whose work requires access to up to date and comprehensive knowledge of the social sciences **The Economics of the Environment and Natural Resources** Quentin Grafton, Wiktor Adamowicz, Diane Dupont, Harry Nelson, Robert J. Hill, Steven Renzetti, 2008-04-15 The Economics of the Environment and Natural Resources covers the essential topics students need to understand environmental and resource problems and their possible solutions Its unique lecture format provides an in depth exploration of discrete topics ideal for upper level undergraduate graduate or doctoral study Each chapter depicts the key theoretical insights major issues and real life problems that motivate the subject In addition the chapters feature practical applications and case studies a list of annotated further reading and extensive references Offers broad treatment of issues in Environmental and Resource Economics Provides in depth exploration of a wide range of topics with its unique lecture format Depicts key theoretical insights major issues and real life problems for each subject Features case studies annotated further reading extensive references and a detailed glossary **A Modern Guide to Tourism Economics** Croes, Robertico, Yang, Yang, 2022-09-06 This Modern Guide captures the evolution of foundational tenets theories frameworks and models that buttressed tourism economics into an evolving discipline shining light on both new and old approaches It systematically examines current and future trends and issues related to new economic perspectives consolidating the notion of tourism economics as a discipline **The Economics of the Wildlife Trade** Frederick Chen, Michael 't Sas-Rolfes, 2025-10-09 This book presents a thorough overview and assessment of the economics of the wildlife trade for scholars and conservationists requiring only a basic understanding of economic principles Wildlife conservation and the sustainable extraction of living

organisms from the wild for human use are fundamentally tied to issues of resource allocation and economics Yet there has been a conspicuous dearth of scholarly contribution that examines the wildlife trade using the theories and analytical tools provided by economists This book fills this gap by presenting a theoretical framework built on a foundation of microeconomic theory that is used to analyze the trade in wildlife goods the potential effects of various conservation policies and the economic forces that govern the workings of the markets for wildlife goods The focus of the book is on explicating the possible impacts of supply side policies that have been implemented or proposed to achieve a sustainable level of wildlife extraction The policies that will be considered include the following stricter anti poaching policies trade bans and legalizing the sale of alternative sources of supplies such as farmed goods synthetic substitutes and accumulated stockpiles The book discusses how the implementation of these policies could affect the incentives of both the suppliers and buyers of wildlife goods to participate in these markets It also considers how market structure market concentration and asymmetric information can affect the impact of these policies This book is intended for scholars practitioners and policymakers in the field of wildlife conservation who are familiar with basic economics and interested in a rigorous exposition of the economic principles relevant to the study of the wildlife trade

**The International Yearbook of Environmental and Resource Economics 2005/2006** Henk Folmer, Thomas H. Tietenberg, 2005-01-01 The International Yearbook of Environmental and Resource Economics presents articles which are surveys of current issues in this research area where literature is abundant As every year we recommend the present yearbook to keep up with the developments of this literature Michel Griffon Quarterly Journal of International Agriculture The Yearbook provides a comprehensive overview of cutting edge issues in environmental and resource economics The expert contributors address some of today s most pressing environmental topics including issues in water pricing reforms spatial environmental policy environmental equity and the siting of hazardous waste facilities strategies to conserve biodiversity corporate sustainability the double dividend hypothesis of environmental taxes valuing environmental changes in the presence of risk The Yearbook will provide economists scholars and practitioners working in environmental and resource economics with a comprehensive overview of the cutting edge issues in the field

Learning, Natural Capital and Sustainable Development John Foster, Stephen Gough, 2013-09-13 This special issue of the journal Environmental Education Research addresses a topical area of importance human behaviour towards the environment The book explores the economic metaphor of natural capital in this context arguing that the currently dominant model of sustainable development underpinned by a particular understanding of this metaphor is impeding progress towards genuine sustainability and secondly that it will continue to do so until the metaphor can be reworked in both thought and practice This book explores an alternative economic model of natural capital value based on recent real options thinking which reworks the natural capital idea and provides a framework for articulating two major and closely related shifts of emphasis

**Climate Change and Managed Ecosystems** Jagtar Bhatti, Rattan Lal, Michael J. Apps, Mick A.

Price,2005-12-20 Featuring contributions from leading experts in the field Climate Change and Managed Ecosystems examines the effects of global climate change on intensively constructed or reconstructed ecosystems focusing on land use changes in relation to forestry agriculture and wetlands including peatlands The book begins by discussing the fragility of eco Hubris: The Troubling Science, Economics, and Politics of Climate Change Michael Hart,2015-09-29 The book explores problems and issues that have emerged in national and international discussion of policies to address climate change It concludes that every solution put forward by the UN and activists poses more problems than might ever emerge from the marginal human impact on natural climate change Rather than mitigation governments should focus on adaptation As is climate change discussions have become captive of a utopian agenda that is using climate change as a stalking horse to drive alarm in the hope that it will convince governments to act **Should Trees Have Standing?** Christopher D. Stone,2010-04-07 In this influential and enduring collection of essays Christopher D Stone argues that natural objects such as trees should be bestowed with legal rights through the appointment of special guardians who are designated to protect the voiceless elements in nature Through the essays in this volume Stone advances his thesis that the courts should acknowledge and protect the legal rights of threatened forests and endangered species by granting standing to objects and species themselves as opposed to the humans that are adversely affected by pollution deforestation and other harmful actions The 35th anniversary edition features updated chapters and new essays including Stone s most compelling writings on topics such as legal rights for natural objects climate change agriculture in the 21st century protecting the oceans and the influence of ethics on courts and Congress in shaping U S environmental policy A new Introduction and Epilogue Trees at Thirty Five narrate the reception of Stone s central thesis in various countries and appraise the present state of the environmental movement **Systems Approaches and Their Application** Mats-Olov Olsson,Gunnar Sjöstedt,2006-01-16 This book describes the application of systems thinking across a broad field of cases representing research teaching decision support and construction All cases are presented by experts who have actually been involved in the activities they describe The broad selection of cases captures the great variation of systems thinking and how it is integrated into models and theories and solid knowledge pertaining to different substantive areas **The Taxation of Petroleum and Minerals** Philip Daniel,Michael Keen,Charles McPherson,2010-04-15 There are few areas of economic policy making in which the returns to good decisions are so high and the punishment of bad decisions so cruel as in the management of natural resource wealth Rich endowments of oil gas and minerals have set some countries on courses of sustained and robust prosperity but they have left others riddled with corruption and persistent poverty with little of lasting value to show for squandered wealth And amongst the most important of these decisions are those relating to the tax treatment of oil gas and minerals This book will be of interest to Economics postgraduates and researchers working on resource issues as well as professionals working on taxation of oil gas and minerals mining **Uncertainties in Greenhouse Gas Inventories** Jean P. Ometto,Rostyslav Bun,Matthias

Jonas,Zbigniew Nahorski,2015-04-23 This book is based on the 2014 Special Issue 124 3 of Climatic Change It brings together 16 key papers presented at or produced subsequent to the 2010 3rd International Workshop on Uncertainty in Greenhouse Gas GHG Inventories The Workshop was jointly organized by the Lviv Polytechnic National University Ukraine the Systems Research Institute of the Polish Academy of Sciences and the International Institute for Applied Systems Analysis Austria This book has been written to enhance understanding of the uncertainty encountered in estimating greenhouse gas GHG emissions and in dealing with the challenges resulting from those estimates Such challenges include but are not limited to i monitoring emissions ii adhering to emission commitments iii securing the proper functioning of emission trading markets and iv meeting low carbon or low GHG futures in the long term The approaches to addressing uncertainty discussed by all authors attempt to improve national inventories not only for their own sake but also from a wider systems analytical perspective that seeks to strengthen their usefulness under a compliance and or global monitoring and reporting framework These approaches show the challenges and benefits of including inventory uncertainty in policy analysis and where advances are being made

Land Use Change Richard J. Aspinall,Michael J. Hill,2007-12-14 Changes in the use of land reflect a variety of environmental and social factors necessitating an equally varied suite of data to be used for effective analysis While remote sensing both from satellites and air photos provides a central resource for study socio economic surveys censuses and map sources also supply a wealth of valid informati

*Nature-based Tourism and Conservation* Clement Allan Tisdell,Clevo Wilson,2012-01-01 This book tackles the two edge sword of non consumptive wildlife tourism on net does it add to or detract from species conservation The book does so with a treasure trove of original survey research on the supply and

demand for wildlife tourism on both public and private lands from Antarctica to rainforests to marine wildlife The economic analysis is one of the first to apply new behavioral economics to analyzing tourists choices John Loomis Colorado State University US Does nature based tourism help or hinder biodiversity conservation The answer provided by this authoritative volume is that it depends on context and type of tourism and is no easy panacea Indeed it can result in an under supply of nature conservation from an economic point of view This book provides an excellent synthesis supported by case studies of the tourism conservation trade off problem it will appeal to both academic and practitioner audiences R Kerry Turner CBE University of East Anglia UK This book encapsulates a lifetime s scholarly work between the authors It sets out the platform upon which nature based tourism may be discussed and debated which it then enriches by a series of case examples mostly drawn from personal experience In doing so it performs a valuable service to all interested in this field by capturing those detailed insights into nature based tourism that are often only acquired by experience Stephen Wanhill Editor Tourism Economics In today s world even nature seems to have to pay its own way Nature based Tourism and Conservation provides detailed real life examples of how this is working in various parts of the world from rainforests to Antarctica and how the tradeoffs can best be measured Clem Tisdell and Clevo Wilson provide a unique economic perspective to the various issues involved providing practical illustrations of how others can incorporate the various ways of considering costs and benefits when deciding how to define the role nature based tourism when planning conservation measures This book will be useful to a wide range of audiences from national protected area agencies to private land owners who are establishing their own nature based tourism enterprises Jeffrey McNeely International Union for Conservation of Nature Switzerland Nature based Tourism and Conservation unearths new or neglected principles relevant to tourism and recreational economics environmental valuation and economic theory Its three parts have chapters on nature based tourism and its relationships to conservation including case studies dealing with the consequences of World Heritage listing of natural sites Antarctic subtropical and tropical national park based tourism and an NGO s conservation efforts modelled on ecotourism The final part focuses on tourism utilizing particular wildlife including sea turtles whales penguins royal albatross glow worms and tree kangaroos

*Carbon Capture* Ronald E. Hester, Roy M. Harrison, 2010 It is widely recognised that global warming is occurring due to increasing levels of carbon dioxide and other greenhouse gases in the atmosphere Methods of capturing and then storing CO<sub>2</sub> from major sources such as fossil fuel burning power plants are being developed to reduce the levels emitted to the atmosphere by human activities Carbon Capture Sequestration and Storage reports on progress in this field and provides a context within the range of natural absorption processes in the oceans and forests and in soil Comparisons with alternative energy sources such as solar and nuclear are made and policy issues also are reviewed The book is very topical as its subject matter impacts on the lives of all of us It is multi authored by experts ensuring its authoritative coverage across the full range of this highly technical but mainstream subject It contains cutting edge science and technology

presented in a highly readable form along with an extensive bibliography
