Preston, 1975      *Economies and Societies in Latin America* Peter R. Odell, David A. Preston, 1981      **Economies and societies in Latin America** Peter R. Odell, David A. Preston, 1973      *Economies and Societies in Latin America* Peter R. Odell, David A. Preston, 1975      **Economics and Societies in Latin America** Peter R. Odell, 1978      *The Geography of Central America and Mexico* Thomas A. Rumney, 2013-04-04 Connecting the massive landscapes of North and South America are Mexico and Central America. An area of fascination and study for geographers and scholars from around the world for millennia, these lands and people have played important roles in the discoveries and distributions of civilizations, resources, and nations. These regions have stimulated a large amount of research and publications across the sub-disciplines of geography. *The Geography of Central America and Mexico: A Scholarly Guide and Bibliography* by Thomas A. Rumney collects, organizes, and presents as many of these publications as possible to encourage efforts in the teaching, study, and continuing scholarship of the geography of this area, which includes Mexico, Belize, Guatemala, Honduras, El Salvador, Nicaragua, Costa Rica, and Panama. Beginning with the region as a whole, each chapter that follows, one per nation, is divided by the specific sub-disciplines of geography: cultural, social, economic, historical, physical, and environmental, political, and urban. Each section is further divided by document type: atlases, books, book chapters, articles from scholarly journals, master's theses, and doctoral dissertations. Although the majority of entries recorded focus on English language works, selected entries written in Spanish, as well as French, German, and other languages, are included with entries titled translated into English and noted accordingly.      **Industrialization and Urbanization in Latin America** Robert Gwynne, 2017-10-30 Originally published in 1985, *Industrialization and Urbanization in Latin America* focuses on the process of industrialisation in Latin America. The book links together the distinctive process of industrialisation to wider issues of urban and regional development in Latin America. The book looks in detail at the process of industrialisation in Latin America and the spatial ramifications in Latin American industrialisation; it argues that industrial growth and its geographical distribution is a principal cause of increasing disparities in income between regions within Latin American countries. This book will appeal to academics working in the field of urbanization and geography.      **A Select Bibliography On Economic Development** John P. Powelson, 2019-05-20 This bibliography of more than 2,000 titles contains both books and journal articles, primarily those published since 1970. Most of the entries are annotated. The material is classified according to forty-eight categories, and there is also a list of relevant titles for each major country in Africa, Asia, and Latin America.      *American History from a Global Perspective* David Russo, 2000-03-30 This study is the first interpretive text for the study of American exceptionalism and the first overall assessment of geographic, political, economic, social, and cultural aspects of the American past, written from a global perspective. Russo argues that life in the United States can be

better understood if it is examined from either a wider perspective the English speaking world the Western Hemisphere Western Civilization or a narrower perspective regional and local variations Even when the Americans were innovative in their multi ethnic and multi racial society in their egalitarian social beliefs in their political democracy their innovations were soon copied by others Therefore Russo argues they are no longer distinctly American Using nations as the basis for fields of study can both reveal and distort the historical record When one considers different perspectives America s uniqueness recedes in importance American culture was a variant of a wider Western culture The American economy was an extension of Western capitalism whether agrarian commercial or industrial American society was a Western society with racial castes and multi ethnic additions to the population American government functioned like other Western governments even with innovative forms Republican then democratic The American past is thus seen to be far less distinctive than previous syntheses have assumed      The United States and the Andean Republics Fredrick B. Pike,1977 Monograph on the role of USA in the present and historical political development of the Andean region treats the rise of corporativism ie The protection of traditional culture and social structure from negative outside capitalistic influences in Peru Bolivia and Ecuador and discusses the effects of race and religion Marxism elites and the CIAP on the formation of political ideology Maps and references      **The Global Economic System** I. Wallace,2002-09-26 Provides a unique treatment of world economic geography as a whole and examines the principle philosophies that have shaped our study of it identifies the importance of the biophysical as well as cultural and political environments      *International Trade Theories and the Evolving International Economy* Richard Anthony Johns,2013-11-07 International Trade Theories and the Evolving International Economy provides a much needed from which to approach this topic offering a self contained introduction to the subject of international trade theory Drawing on a broad range of material this book provides the students with a well rounded and more broadly informed view of the subject      **Taxation and Economic Development** John Toye,2023-06-16 First published in 1978 The tax system is one of the instruments said to be available to translate development policy objectives into practice The wide ranging papers collected together in this volume first published in 1978 explore different aspects of the link between national development objectives and the tax system Attention is particularly focused on traditional aims such as growth fair distribution and economic stabilisation and development Articles written by distinguished experts in the fields of public finance and economic development clarify the concepts of taxable capacity and tax effort and examine the connections between growth and changes within the tax system      Third World/Iowa: Latin America University of Iowa. **Agrarian Reform in Theory and Practice** Jane Benton,2018-12-13 Published in 1999 Despite the attempts of a number of Latin American republics to redistribute land resources and carry out agrarian reform programmes the land question remains a vital political issue throughout the region This book focuses on Bolivia where government proposals to replace a radical agrarian reform law of 1953 with a neo liberal Ley INRA provoked heated public debate and violent campesino

clashes with the police witnessed by the author in September October 1996 The first five chapters are largely concerned with theoretical aspects and a review of Bolivia s agrarian reform legislation the remaining six chapters are devoted to an analysis from the viewpoints of participant campesinos and the researcher of agricultural change in Aymara communities beside Lake Titicaca where the author has conducted research over nearly 30 years Currently lakeside farming is under severe threat as a result of land degradation limited cash resources rural urban migration tourism and commuterisation
