Iran and the Global Economy Parvin Alizadeh, Hassan Hakimian, 2013-12-17 The relationship between religion and the state has entered a new phase ever since the Iranian Revolution more than three decades ago The recent mass uprisings against autocratic rulers in the Arab world have highlighted the potency of Islamist forces in post revolutionary societies in the region a force arguably unlocked first by Iran s version of the spring three decades ago The economic ramifications of these uprisings are of special interest at a time when the possibility of the creation of Islamic states can have implications for their economic policy and performance again A study of the Iranian experience in itself can offer rare insights whether for its own features and characteristics or for its possible lessons and implications for recent events in the region This book is concerned with the economic aspects and consequences of the Iranian Revolution in general and its interaction with the international economy in particular Many studies have to date dealt with Iran's economic challenges policies and performance in the post revolutionary period but its interaction with the international economy although of growing importance has not received sufficient attention. The contributions in this volume by experts in the field address ways in which in the span of three decades Iran's economy has evolved from a strong aspiration to develop an independent economy to grappling with debilitating international economic sanctions **Iran's Political Economy since the Revolution** Suzanne Maloney, 2015-08-20 This book provides a comprehensive overview of Iran's political economy since the 1979 revolution and examines the country's energy sector The Dilemma of Popular Sovereignty in the Middle East: **Power from or to the People?** Mr Kingshuk Chatterjee, Ms Priya Singh, 2014-03-15 The ongoing political turmoil in the Middle East as a whole would seem to be essentially a contest between the minimalist and maximalist positions on popular sovereignty should power merely come from and be exercised in the name of the people Or should those in power be fully accountable to the people The dilemma warrants a closer look The present volume comes out of an international conference

held in Calcutta India organised by the Institute of Foreign Policy Studies and the Centre for Pakistan and West Asian Studies University of Calcutta in March 2013 This volume aims not at a definitive analysis of why what happened did happen it aims instead at getting a sense of what was actually happening and what is at issue Power, Islam, and Political Elite in Iran Eva Rakel, 2008-11-30 The Iranian Islamic revolution brought about a political system based on a combination of state institutions that derive their legitimacy from Islamic law and republican institutions legitimized by the people As there are no legal political parties in the Islamic Republic of Iran political factions represent the varying ideological and material interests of members of the political elite and their supporters This book analyzes the rivalries between the political factions and their related state institutions and the impact of the dynamics of factionalism on domestic economic and socio cultural and foreign policy formulation It shows that tensions inherent to the structure of state institutions and factional rivalries slow down the process of democratization and economic reforms in the Islamic Republic of Iran Iran's Grand Strategy Vali Nasr, 2025-05-20 Two pervasive fears of external aggression and internal dissolution have dominated political discourse and state action in Iran for many decades and arguably for centuries This book closely examines these fears how they ve shaped political trends in Iran and specifically how they have undergirded the conduct of state actors during both the regime of the Shah the Pahlavi monarchy of the twentieth century and the Islamic Republic since the 1979 revolution Drawing on archival sources in the West and in Iran as well as interviews with key Iranian decision makers both past and present Vali Nasr traces this thread of national security through key modern historical episodes in Iran By viewing modern Iranian history through this lens Nasr argues that decrying the current Iranian regime as a theocracy is a tired rhetorical move and inaccurate as an explanation for how it conducts itself in the world Today's Islamic Republic functions as a modern legal rational nation state It is one that has evolved around a distinct and deeply held view of national interest and national security rooted in both recent and not so recent history Nasr's book will serve as a corrective to a deeply rooted view in policy making circles that the Iranian ruling elite's commitment to Islamic theocracy has driven the country's foreign policy since the time of the revolution Iran's Struggle for Economic Independence Evaleila Pesaran, 2011-04-25 This book analyses the dynamics of economic reform in the Islamic Republic of Iran discussing the internal debates and external factors that have influenced this post revolutionary state s struggle to achieve the revolutionary goal of economic independence over the period 1979 2010

Inside the Islamic Republic Mahmood Monshipouri,2016-12-15 The post Khomenei era has profoundly changed the socio political landscape of Iran Since 1989 the internal dynamics of change in Iran rooted in a panoply of socioeconomic cultural institutional demographic and behavioral factors have led to a noticeable transition in both societal and governmental structures of power as well as the way in which many Iranians have come to deal with the changing conditions of their society This is all exacerbated by the global trend of communication and information expansion as Iran has increasingly become the site of the burgeoning demands for women s rights individual freedoms and festering tensions and

conflicts over cultural politics These realities among other things have rendered Iran a country of unprecedented and at time paradoxical changes This book explains how and why Is the Tehran Bazaar Dead? Foucault, Politics, and Architecture Farzaneh Haghighi, 2018-10-01 To examine the political role of architecture this book presents an original engagement with the largest center of attraction in Tehran namely its bazaar Through a rigorous study it goes beyond the conventional sociopolitical and architectural discourses of this marketplace by considering architecture as an event This book offers alternative modes of spatial thinking on a micropolitical level Emphasis is placed on the focused exploration of key notions mainly drawn from the works of Michel Foucault It deploys effective methods and shows how philosophical concepts can be deployed as a tool to analyse the ways through which architecture transforms individuals through the act of exchange whether of words things bodies or thoughts Enabling the Iranian Gas Export Options Maximilian Kuhn, 2014-01-17 Maximilian Kuhn investigates one of the most pressing yet neglected subjects in the field of global energy politics the integration of the Iranian gas market Possessing the world's second largest proven natural gas reserves Iran is a hypothetical energy giant in waiting Yet over three decades of internal divisions coupled with crippling international sanctions have left Iran unable to capitalize on its vast energy potential Increasing global demand for natural gas and a government in constant need of finding new sources of revenue to meet the needs of a fast growing population should lead Iran to eventually become a large scale gas exporter How this could take place and what the implications for global gas markets would be are the central research questions tackled by this study The study allows a look beyond international politics Iranian political Navigating Contemporary Iran Eric Hooglund, Leif decision making investment laws and pipeline games Stenberg, 2013-02-28 This detailed examination of contemporary Iran addresses the most important current social political and economic issues facing the nation and the way it is perceived by the outside world The volume brings together some of the most important scholars and researchers in the field working in such diverse disciplines as anthropology economics history international relations philosophy political science and sociology to offer a broad range of perspectives on the significance of three decades of changes for Iran's current and near term future domestic and international politics Drawing upon a wealth of original field research the authors challenge conventional wisdom and simplistic media stereotypes about the Islamic Republic The chapters reach beyond traditional images of the country to show that as a consequence of thirty years of economic and social changes the reality or essence of contemporary Iran is more complex and nuanced than is often portrayed in the international media Offering valuable insights into Iran s economic and social policies as well as its politics since the Islamic Revolution this book will be of great interest to students and scholars of political science sociology and Big Business and Economic Development Barbara Hogenboom, Alex E. Fernández Jilberto, 2006-12-21 Iranian studies Bringing together an international and multidisciplinary group of experts this is the first comprehensive volume to analyze conglomerates and economic groups in developing countries and transition economies Using sixteen in depth case studies it
