ECOOP '92. European Conference on Object-Oriented Programming Ole Lehrmann Madsen,1992-06-16 This volume constitutes the proceedings of the sixth European Conference on Object Oriented Programming ECOOP held in Utrecht The Netherlands June 29 July 3 1992 Since the French initiative to organize the first conference in Paris ECOOP has been a very successful forum for discussing the state of the art of object orientation ECOOP has been able to attract papers of a high scientific quality as well as high quality experience papers describing the pros and cons of using object orientation in practice This duality between theory and practice within object orientation makes a good example of experimental

computer science The volume contains 24 papers including two invited papers and 22 papers selected by the programme committee from 124 submissions Each submitted paper was reviewed by 3 4 people and the selection of papers was based only on the quality of the papers themselves **ECOOP 2005 - Object-Oriented Programming** Andrew Black,2005-07-18 The 19th Annual Meeting of the European Conference on Object Oriented Programming ECOOP 2005 took place during the last week of July in Glasgow Scotland UK This volume includes the refereed technical papers presented at the conference and two invited papers It is traditional to preface a volume of proceedings such as this with a note that emphasizes the importance of the conference in its respective field Although such self evaluations should always be taken with a large grain of salt ECOOP is undisputedly the pre eminent conference on object orientation outside of the United States In its turn object orientation is today's principal technology not only for programming but also for design analysis and specification of software systems As a consequence ECOOP has expanded far beyond its roots in programming to encompass all of these areas of research which is why ECOOP has remained such an interesting conference But ECOOP is more than an interesting conference It is the nucleus of a technical and academic community a community whose goals are the creation and dissemination of new knowledge Chance meetings at ECOOP have helped to spawn collaborations that span the boundaries of our many subdisciplines bring together researchers and practitioners cross cultures and reach from one side of the world to the other The ubiquity of fast electronic communication has made maintaining these collaborations easier than we would have believed possible only a dozen years ago But the role of conferences like ECOOP in establishing collaborations has not diminished **ECOOP '88 European Conference on Object-Oriented Programming** Stein Gjessing,Kristen Nygaard,1988-07-19 The field of Object Oriented Programming OOP has attracted increasing attention during the last few years OOP is now recognized as an important tool for making better and more flexible information systems This book is the proceedings of the second European Conference on Object Oriented Programming ECOOP 88 that was held in Oslo Norway from August 15 to 17 1988 The objectives of ECOOP 88 were to present the best international work in the field of OOP to interested persons from industry and academia and to be a forum for the exchange of ideas and the growth of professional relationships Each of the 103 papers submitted was subject to a thorough refereeing process The 22 papers selected are collected in these proceedings together with one invited paper These 23 papers from 13 different countries comprise the currently best international work in the field of OOP The contents of the papers include areas such as Theory Languages Didactics Implementation Applications Concurrency and Databases The interest in object oriented programming is rapidly increasing especially within the areas of Concurrency and Databases With its 5 papers on concurrency and 7 papers on databases the proceedings contain important new material on these subjects This book is a must for persons who want to keep themselves up to date in the field of OOP ECOOP '99 - Object-Oriented Programming Rachid Guerraoui,2003-07-31 My tailor is Object Oriented Most software systems that have been built recently are claimed to be Object Oriented Even older

software systems that are still in commercial use have been upgraded with some OO flavors. The range of areas where OO can be viewed as a must have feature seems to be as large as the number of fields in computer science. If we stick to one of the original views of OO that is to create cost effective software solutions through modeling physical abstractions, the application of OO to any field of computer science does indeed make sense. There are OO programming languages, OO operating systems, OO databases, OO specifications, OO methodologies, etc. So what does a conference on Object Oriented Programming really mean? I honestly don't know. What I do know is that since its creation in 1987, ECOOP has been attracting a large number of contributions and ECOOP conferences have ended up with high quality technical programs featuring interesting mixtures of theory and practice. Among the 183 initial submissions to ECOOP '99, 20 papers were selected for inclusion in the technical program of the conference. Every paper was reviewed by three to five referees. The selection of papers was carried out during a 4 day program committee meeting at the Swiss Federal Institute of Technology in Lausanne. Papers were judged according to their originality, presentation quality and relevance to the conference topics.

Oscar M. Nierstrasz, 1993-07-16. This volume contains the proceedings of the seventh European Conference on Object Oriented Programming, ECOOP '93. The conference attracted 146 submissions from around the world and the selected papers range in topic from programming language and database issues to analysis and design and reuse and from experience reports to theoretical contributions. The volume opens with an abstract of the keynote address "Intimate computing and the memory prosthesis: a challenge for computer systems research" by M.G. Lamming and continues with selected papers organized into parts on framework and reuse, concurrency and distribution types and subtypes, languages and inheritance, time dependent behavior, object oriented analysis and design and reflection. The volume also contains an invited talk "The OSI manager object model" by C. Ashford and the position statements from a panel discussion.

Mario Tokoro, Remo Pareschi, 1994-06-15. This volume contains the proceedings of the 8th European Conference on Object Oriented Programming, ECCOP '94, held in Bologna, Italy, in July 1994. ECOOP is the premier European event on object oriented programming and technology. The 25 full refereed papers presented in the volume were selected from 161 submissions; they are grouped in sessions on class design, concurrency patterns, declarative programming, implementation, specification, dispatching and experience. Together with the keynote speech "Beyond Objects" by Luc Steels, Brussels, and the invited paper "Putting Objects to Work" by Norbert A. Streitz, GMD IPSI Darmstadt, they offer an exciting perspective on object oriented programming research and applications.
