The Anatomy of Architecture Suzanne Preston Blier, 1994 Blier illuminates the extraordinary architecture of the Batammaliba people of Western Africa revealing these buildings as texts through which we can read the beliefs psychology traditions and social concerns of their inhabitants In doing so she explores the role of vernacular architecture as an expression of culture A splendid analysis of the centrality of architecture in the daily lives of the Batammaliba and its integral role in articulating social values The story is beautifully told in the best of anthropological traditions Judith R Blau Contemporary Society A remarkable study Blier's volume carries the study of African architecture to a qualitatively new level of scholarship It introduces a new dimension whereby the architectural medium can be used to illuminate much of the entire belief system of any culture Labelle Prussin African Arts In this excellent book Blier provides a richly detailed and searching account of what architecture means to the Batammaliba of northern Togo and Benin The finest account I have yet read of the relations between systems of beliefs ritual practices and African aesthetics and plastic arts The ethnography and basic insight should be the envy of any social anthropologist T O Beidelman Man
