Study of Operations of Military Sea Transportation Service United States. Congress. House. Committee on Merchant Marine and Fisheries,1954      **Atlantic Voyages** John McAleer,2023 A history of the East India Company told through experiences of everyday life on the ocean maritime travel shipboard conditions foreign encounters islands and ports of call the waters of the Atlantic itself McAleer portrays these as essential to the understanding of the Company as an agent of globalisation in the early modern world      *Captain Cook's Voyages* Andrew Kippis,1925      House documents ,1891  
Consular Reports ,1890      **The Story of the Voyage** Philip Edwards,1994 Study of voyage narratives including Cook and Bligh set in the context of British imperialism      *Highways of Commerce. ...* United States. Bureau of Foreign Commerce,1895      **Hearings** United States. Congress. House,1958      Buccaneers and Privateers Richard Frohock,2012-07-13 This book takes a fresh look at English buccaneering and privateering literature from the Golden Age of Piracy and includes discussion of well known figures such as Sir Henry Morgan as well as more obscure figures like Captain George Cusack      Minds in Motion Anne M. Thell,2017-08-31 The central claim of Minds in Motion is that British travel writing of the long eighteenth century functions as an epistemological playing field where authors test empiricist models of engagement with the world while simultaneously seeking out the role of the self and the imagination in producing knowledge Whether exploring the relationship between the senses and the mind the narrative viability of experimental detachment or the literary dynamics of virtual witnessing eighteenth century travel authors persistently confront their positionality and raise difficult questions about the nature and value of first hand experience In one way or another they also complicate empiricist ideals by exploring the limits of individual perception and the role of the imagination in generating and relating knowledge While the genre is often viewed as either numbingly documentary or non literary and commercial travel literature actually operates at the front line of the period s intellectual developments illustrating both how individual writers grapple with philosophical ideals and how these ideals filter into the lives of ordinary people Indeed travel literature directly engages the scientific and philosophical concerns of the period while it is also widely avidly read as such it offers models for cognitive and rhetorical practices that are evaluated and either embraced or rejected by readers in a process of identification not unlike that which occurs in early English fiction Moreover because eighteenth century travel literature is so crucial to the development of so many fields from botany to the novel it illustrates vividly the divisive energies of discipline and genre formation while also archiving the shared aims and methods of what will become discrete fields of study Travelogues as diverse as Margaret Cavendish s *Blazing World* 1666 and Samuel Johnson s *Journey to the Western Islands of Scotland* 1775 reveal the epistemological circuitry of the eighteenth century and historicize the absorption of the philosophical tendencies that have come to define modernity      **Sea and Land** Philip D. Morgan,John Robert McNeill,Matthew Mulcahy,Stuart B. Schwartz,2022 The first comprehensive environmental synthesis of the Caribbean region written by eminent scholars of the

topic Scientists and the Sea, 1650-1900 Margaret Deacon, 2018-04-17 Scientists and the Sea is a history of how the scientific study of the sea has developed over a period of nearly 2500 years Beginning with the speculations of Greek philosophers it carries the story forward showing how curiosity about the ocean appeared in many different forms and locations before in the late 19th century the first deep sea researches heralded the foundation of the science known today as oceanography Originally published in 1971 this book has never been superseded as the most comprehensive and wide ranging treatment of the emergence of marine science within the western scientific tradition After three introductory chapters dealing with knowledge up to the Renaissance the main part of the work shows how pioneers of scientific observation at sea during the 17th and 18th centuries made notable discoveries but that it was not until the middle of the 19th century when aided by the advance of technology scientists were able to undertake the first explorations of the ocean depths This second edition contains a new introduction and bibliography

cultural and historical developments along with its incisive experiencing of loss but also fundamentally determine Romantic subjectivity and aesthetics
