Great Debates in Family Law Jonathan Herring,Rebecca Probert,Stephen Gilmore,2015-04-17 This textbook is an ambitious and engaging introduction to the more advanced writings on family law primarily designed to allow students to get under the skin of the topic and begin to build their critical thinking and analysis skills Each chapter is structured around key questions and debates that provoke deeper thought and ultimately a clearer understanding The aim of the book is therefore not to present a complete overview of theoretical issues in family law but rather to illustrate the current debates which are currently going on among those working in shaping the area The text features summaries of the views of notable experts on key topics and each chapter ends with a list of guided further reading *The Fifth Estate* James G. McGann,2016-09-13

What role do think tanks play in shaping public policy and public discourse in the United States In *The Fifth Estate* Think Tanks Public Policy and Governance James G McGann illustrates how policymakers have come to value the independent analysis and advice provided by think tanks and why it has become one of the defining characteristics of the American political system Drawing on case studies in both foreign and domestic policy McGann clarifies the correlation between think tank research and the policies enacted by the past three presidential administrations He also describes a phenomenon known as the revolving door where think tanks provide former government officials an opportunity to share insights from public service remain involved in policy debates and continue to provide advice and commentary Based on the history and the level of involvement seen today the influence of think tanks is unlikely to diminish in the coming years **Teaching Family Law**

Henry Kha,Mark Henaghan,2023-08-25 This book provides a comprehensive analysis of the teaching of an eclectic range of family law topics and the unique opportunities and challenges of teaching family law in different jurisdictions from a varied international perspective Written by leading legal scholars the book addresses a gap in the scholarship to comprehensively and systematically analyse the teaching of family law The first part of the book explores ways of teaching the varied range of topics under the heading of family law and captures the diverse approaches to the discipline Chapters illustrate how the subject can be best taught in an interdisciplinary way that considers feminist perspectives and the philosophy of teaching while encompassing legal positivism empirical research and critical legal theory The second part of the book examines teaching in different jurisdictions and illustrates policy and practice in Australia New Zealand the United States Canada the United Kingdom Hong Kong and South Africa Showcasing examples of best practice of teaching family law the book will be an essential reading for legal scholars as well as researchers and postgraduate students in the fields of family law and legal education **Medical Treatment of Children and the Law** Jo Bridgeman,2020-11-19 The high profile cases of Charlie

Gard Alfie Evans and Tafida Raqeeb raised the questions as to why the state intrudes into the exercise of parental responsibility concerning the medical treatment of children and why parents may not be permitted to decide what is in the

best interests of their child This book answers these questions It argues for a reframing of the law concerned with the medical treatment of children to one which better protects the welfare of the individual child within the context of family relationships recognising the duties which professionals have to care for the child and that the welfare of children is a matter of public interest protected through the intervention of the state This book undertakes a rigorous critical analysis of the case law concerned with the provision of medical treatment to children since the first reported cases over forty years ago It argues that understanding of the cases only as disputes over the best interests of the child and judicial resolution thereof fails to recognise professional duties and public responsibilities for the welfare and protection of children that exist alongside parental responsibilities and which justify public or state intervention into family life and parental decision making Whilst the principles and approach of the court established in the early cases endure the nature and balance of these responsibilities to children in their care need to be understood in the changing social legal and political context in which they are exercised and enforced by the court The book will be a valuable resource for academics students and practitioners of Medical Law

Healthcare Law Family Law Social Work Medicine Nursing and Bioethics **Decisional Privacy and the Rights of the Child** Georgina Dimopoulos, 2022-10-14 Decisional privacy gives individuals the freedom to act and make decisions about how they live their lives without unjustifiable interference from other individuals or the state This book advances a theory of a child's right to decisional privacy It draws on the framework of the United Nations Convention on the Rights of the Child and extends the work of respected children's rights scholars to address a significant gap in understanding the interconnections between privacy family law and children's rights It contextualises the theory through a case study judicial proceedings concerning medical treatment for children experiencing gender dysphoria This work argues that recognising a substantive right to decisional privacy for children requires procedural rights that facilitate children's meaningful participation in decision making about their best interests It also argues that as courts have increasingly encroached upon decision making regarding children's medical treatment they have denied the decisional privacy rights of transgender and gender diverse children This book will benefit researchers students judicial officers and practitioners in various jurisdictions worldwide grappling with the tensions between children's rights parental responsibilities and state duties in relation to children's best interests and with the challenge of better enabling and listening to children's voices in decision making processes

After Legal Equality Robert Leckey, 2014-07-11 Groups seeking legal equality often take a victory

as the end of the line Once judgment is granted or a law is passed coalitions disband and life goes on in a new state of equality Policy makers too may assume that a troublesome file is now closed This collection arises from the urgent sense that law reforms driven by equality call for fresh lines of inquiry In unintended ways reforms may harm their intended beneficiaries They may also worsen the disadvantage of other groups Committed to tackling these important issues beyond the boundaries that often confine legal scholarship this book pursues an interdisciplinary consideration of efforts to advance equality as it explores the developments challenges and consequences that arise from law reforms aiming to deliver equality in the areas of sexuality kinship and family relations With an international array of contributors After Legal Equality Family Sex Kinship will be an invaluable resource for those with interests in this area

Bordering the Baltic Madeleine Hurd, 2010 In this book scholars from different disciplines use case studies drawn from Sweden Norway Finland and Denmark to analyze the last century's construction of engagement with and challenges to both hard and soft Scandinavian boundaries The book provides historical examples of how national borders have been contested by Scandinavian states caught between powerful Continental neighbors these attempts to firm up boundaries can be contrasted to the denationalization of borders caused both by the globalization of communications and markets and by political efforts to submerge national boundaries in a common Baltic identity A second set of studies focuses on boundaries defining Scandinavian minorities Here the book analyzes the spaces rituals bodies gender roles and collective identity discourses implicit in majority minority boundaries and their transgression Throughout Scandinavian bordering processes

are studied in terms of the groups that launch them the methods by which they are propagated and finally the meanings supposedly and actually invested in them Series Nordische Geschichte Vol 10 Children, Autonomy and the Courts Aoife Daly,2017-12-18 In this book Aoife Daly argues that where courts decide children s best interests for example about parental contact the UN Convention on the Rights of the Child s right to be heard is insufficient and autonomy should instead be the focus Global law and practice indicate that children are regularly denied due process rights in their own best interest proceedings and find their wishes easily overridden It is argued that a children s autonomy principle respecting children s wishes unless significant harm would likely result would ensure greater support for children in proceedings and greater obligations on adults to engage in transparent decision making This book is a call for a reconceptualisation of the status of children in a key area of children s rights *Herdbook Containing the Pedigree of Improved Short-horn Cattle* ,1891 Vols include the Shorthorn Society s Grading register for beef Shorthorn cattle v include the society s Herd book of poll shorthorns **Closing the Door to Destitution** Raymond Richards,2010-11-01 *The Best Interests of the Child in Healthcare* Sarah Elliston,2007-11-06 Topical and compelling this volume provides an excellent re evaluation of the best interests test in the healthcare arena the ways in which it has developed the inherent difficulties in its use and its interpretation in legal cases concerning the medical care of children Comprehensively covering both the English and Scottish position within the context of the European Convention of human Rights and the UN Convention on the Rights of the Child the author examines a wide range of healthcare situations from the commonly occurring to the unusual offering a detailed analysis of legislation case law cases and their implications It includes discussions on the extent to which a child s body can be examined operated on and affected by medicines devices or procedures intended to bring about medical change the appropriate scope of parental choice and authority and at what stage of their development children should be allowed to make their own decisions the response to situations where the interests of children may be in conflict the cases of conjoined twins or the donation of organs to siblings This work is a key resource for postgraduates and researchers working and studying in the fields of law healthcare and medicine Motherhood and the Law Harry Willekens,Kirsten Scheiwe,Theresa Richarz,Eva Schumann,2019 Who is a child s legal mother Must a child have exactly one mother can it have two or three or can it have two fathers but no mother Or has the concept of motherhood become obsolete and should we just talk of parenthood in a gender neutral way Questions such as these would have appeared esoteric only a few decades ago but as a result of new social developments such as frequent family reconstitutions gay and lesbian emancipation or surrogacy and of technological innovations such as egg and embryo donations they have become issues in a vehement debate The interdisciplinary contributions to this book focus on the legal definition of motherhood on the way in which legal conceptions structure the social discourse on motherhood and vice versa and on the influence of legal rules on power relations between mothers fathers children and the state Among the issues addressed are the challenges to our understanding of the legal

regulation of motherhood by developments in reproductive medicine the challenges to our understanding of the legal regulation of motherhood by parental constellations deviating from the mother father model single motherhood by choice same gender parenthood multiple parenthood the exercise of parental rights in case of parental separation and the impact of legal rules on the bargaining positions of mothers and fathers
