Moisture Requirements in Agriculture Harry Burgess Roe,1950 *Orchard and Farm Irrigation* ,1911 **Design and Operation of Farm Irrigation Systems** Marvin E. Jensen,1983 The role of irrigation in food and fiber production Farm resources and system selection Soil water Salinity in irrigated agriculture Water requirements Drainage requirements and systems Land shaping requirements Farm water delivery systems Farm pumps Farm water distribution systems Hydraulics of surface irrigation Design and operation of gravity or surface systems Fluid dynamics of sprinkler systems Design and operation of sprinkler systems Design and operation of trickle drip sustems Evaluating irrigation systems and practices Irrigation water management Farm Irrigation Neil Southorn,1998-02-04 There is no doubt that irrigation makes a major contribution to agricultural production making a whole range of crops viable in an otherwise unreliable climate and helping insure against drought However irrigation does not automatically guarantee a profit and acclaim it is a high cost exercise using water from increasingly scarce supplies and contributes to environmental concerns of the community Many of the pressures facing some irrigators have been caused by a lack of understanding in the past of best practices necessary in design installation and management Alternative methods of irrigation are presented emphasising the characteristics of each that may make them suitable or unsuitable for particular situations The range of crops under irrigation is very wide and so too is the range of methods available to get water to them Horticultural crops are included as well as broadacre crops This section is followed by technical information of the various components that make up an irrigation system and their installation Irrigation is concerned with providing the optimum soil moisture conditions for plant growth So to is drainage in that too much water in the soil will retard growth Many of the concepts surrounding irrigation are applicable to a consideration of drainage so the book discusses that technology as well **Principles of Farm Irrigation System Design** Larry G. James,1988 Irrigation for the Farm, Garden, and Orchard Henry Stewart,1915 *On-farm Irrigation System Evaluation* Ron Mansfield,1982 In this report we review the irrigation system evaluation study conducted by the El Dorado Irrigation District s EID Irrigation Management Service IMS during the summer of 1981 We conducted this study following several years of crop irrigation research and six years of scheduling experience with the El Dorado IMS to better understand the operation of farm irrigation systems the efficiency of these systems and the effect upon agricultural water conservation within the EID service area Information gathered during this project documents the current on farm situation with regard to irrigation system types management practices and operational efficiencies This information is presently being used to teach farmers how to efficiently use and improve their irrigation systems and practices We expect that once this information has been properly presented to farmers they will adopt the water budget approach to irrigation management Irrigation For the Farm, Garden, and Orchard. by Henry Stewart.
