Farm Business Management Peter L. Nuthall, 2011 This book discusses the methods to determine optimal systems in farm business management The methods are all about problem solving as any decision situation implies choice and therefore requires a method for deciding which alternative maximizes the objectives The book is not however about carrying out the optimal plans Most of the chapters relate to quantitative methods and qualitative analysis The book has a penultimate chapter discussing a number of analytical models that are commonly used in urban business but which are less important in primary production The results of farming systems analyses can have a major impact on good decision making in any primary producing community Some of the methods might be used by farmers themselves but more likely by farm advisors and consultants and by farm management researchers interested in firstly providing farmers with guidance on optimal systems and secondly providing governments with advice on the impact of farm policy measures
