A perfect gift for young National Geographic fans and atlas enthusiasts. When astronauts look down at our planet and see its vibrant surface shining against the blackness of space, they experience the Overview Effect: a sense of awe and awareness that everything is interconnected and an overwhelming desire to take care of our one and only home. Overview Young Explorer's Edition, newly adapted for young readers from the adult book Overview, captures this sense of wonder and shares it with readers without having to leave the ground. Extraordinary aerial photographs reveal Earth's natural beauty and show the surprising, fascinating, and destructive ways humans have impacted our environment. This eye-opening visual journey will forever change the way we see our home planet. **Rural Youth in Farm Organization and Other National Agency Programs** Ellis Lore Kirkpatrick, American Council on Education. The answers to these questions reveal a complex web of interactions. While large, distant farms and multinational companies dominate at national and global levels, innovative programs including farmers' markets, farm-to-school initiatives, and agritourism are forging stronger connections between people and food at local and regional levels. At all levels of the food system, energy use, climate change, food safety, and the maintenance of farmland for the future are critical considerations. The need to understand food systems, what they are, who's involved, and how they work or don't, has never been greater. Food, Farms, and Community: Exploring Food Systems takes an in-depth look at critical issues, successful programs, and challenges for improving food systems, spanning a few miles to a few thousand miles. Case studies that delve into the values that drive farmers, food advocates, and food entrepreneurs are interwoven with analysis supported by the latest research. Examples of entrepreneurial farms and organizations working together to build sustainable food systems are relevant to the entire country and reveal results that are about much more
