Fast Boats:

The World's Fastest Boats Nick Cook, 2001 Discusses the history and development of some of the world's fastest boats describing the specific features and specifications of such vessels as ice boats catamarans hydrofoils and jetboats

Fast Boats and Fast Times David M. Levy, Gerald A. Meehl, 2008 In the gruesome battle for Guadalcanal David Levy was skipper of PT 59 one of several Patrol Torpedo boats that were among the first U S Navy vessels to engage Japanese warships at the beginning of World War II Dave's wartime experiences in the South Pacific marked one of the most transformative periods in his life In the Navy he quickly learned to assume a deal maker persona that helped him get along with fellow PT boat skippers many of whom like future president John F Kennedy came from privileged East Coast families He got to be known in the Navy by the nickname Hogan famous as the guy to go to who could get things done organize parties well stocked with liquor and women obtain supplies when none seemed available and in those early desperate days of the battle for Guadalcanal also perform in the top ranks of competent PT boat skippers The PT boats were small maneuverable and fast and they were given the seemingly impossible mission of regularly engaging and sinking the much larger and more numerous destroyers cruisers and battleships of the Imperial Japanese Navy Dave's PT 59 was in the thick of all the action These brave PT boat skippers many of whom were graduates of Ivy League colleges or the U S Naval Academy were a hard partying group and their fast times during World War II epitomized the intensity with which life was lived by those who like Dave were fully engaged in the deadly struggles of the Pacific War Dave's wartime experiences shaped the rest of his life a long journey that has included a successful law career annual ski trips to his vacation home in Aspen since the early 1950s and fishing all over the world

High-Speed Monohull and Hydrofoil Craft Zu-Shun Dong, Liang Yun, Raju Datla, Alan Bliault, 2024-12-24 High Speed Monohull and Hydrofoil Craft Performance Technology and Applications provides comprehensive coverage of the basic hydrodynamics of high speed monohulls and hydrofoil craft useful to students and engineers alike The first half of the book introduces different hull shapes for semi planing and planing craft with examples

from their development through the last century. Succeeding chapters then describe the hydrodynamic theory behind their performance in calm water and a seaway. They also document the extensive series of model test programs naval architects use to create prediction models for resistance and powering. Electronic versions of a number of these are included for readers use. A final chapter on monohulls looks at hull geometric form that has been developed to provide the best possible combination of resistance in waves and motion response through a combination of a deep and sharp forefoot and a hard chine cross section towards the stern for patrol vessels and offshore logistics craft. The book's second half introduces the various geometries and planform configurations of hydrofoils under a fast craft hull. It reviews the development of these craft for inland waterways such as major river systems and the rougher environment of seaways such as the Mediterranean and Atlantic oceans. It is followed by hydrofoil theory in an ideal fluid close to a free surface. Then the theory for a real fluid includes the vorticity and effect of planform dihedral and surface interaction. Hydrofoil craft design and analysis are covered next. Finally there is a chapter on special configurations such as craft having foils just at the bow and hydrofoil craft based on catamaran hulls.
