*Rheumatology Highlights*, 2003      **Fast Facts** Julian Shah, 1999-02      **The Eicosanoids** Peter Curtis-Prior, 2004-07-16

This comprehensive reference work updated from the first edition brings together the knowledge and expertise of contributors from around the world. It includes new topics such as prostaglandin synthetase enzyme, new synthetic eicosanoids, innovative analytical methods, the influence of cytokines in the regulation of synthesis and actions, newer eicosanoids that influence the cardiovascular system, and newly discovered roles in reproduction and interactions with nitric oxide. This book satisfies a surge of interest in prostaglandins. NSAIDs, e.g., aspirin, are the biggest selling drugs of all time, and the field has been refreshed by the advent of new types of selective COX 2 inhibitors and anti-leukotiene drugs.      Menopause

David H. Barlow, Barry G. Wren, 2000. The menopause is a biological certainty for middle-aged women. Whereas for a large proportion of women the menopause is symptom-free, it can have a considerable impact on the quality of life and health of others. Effective therapies are available to treat the symptoms, but media scares have generated suspicion among women. This text presents the facts giving doctors and patients the information they need to make an educated choice.      **Pain Management**

Richard S. Weiner, 2001-12-20. This authoritative reference, the Sixth Edition of an internationally acclaimed bestseller, offers the most up-to-date information available on multidisciplinary pain diagnosis, treatment, and management. *Pain Management: A Practical Guide for Clinicians* is a compilation of literature written by members of The American Academy of Pain Management, the largest multidisciplinary society of pain management professionals in North America, and the largest physician-based pain society in the United States. This unique reference covers both traditional and alternative approaches and discusses the pain of children as well as adult and geriatric patients. It includes approximately 60 new chapters, and each chapter is written to allow the reader to read independently on topics of interest and thus may be viewed as a self-contained study module. The collection of chapters allows an authoritative self-study on many of the pressing issues faced by pain practitioners. Regardless of your specialty or medical training, or whether you are in a large hospital or a small clinic, if you work with patients in need of pain management, this complete reference is for you.      **Cancer Pain**

Eduardo D. Bruera, Russell K. Portenoy, 2003-06-23. Nearly one in three people will be diagnosed with cancer, and many of these patients will suffer from related cancer pain. Cancer-associated pain is widely feared by cancer patients, but knowledge about the causes and management of cancer pain has increased dramatically in recent years, and many new treatment options are available. This comprehensive book discusses the unique characteristics of cancer pain, including its pathophysiology, clinical assessment, diagnosis, pharmacological management, and nonpharmacological treatment. The internationally recognized authors are leaders in cancer pain research and they apply their first-hand knowledge in summarizing the principal issues in the clinical management of cancer pain. This state-of-the-art book cohesively addresses the full range of disciplines regularly involved in cancer pain management, including pharmacology, communication studies, and psychology. *Cancer Pain* is a
