Where are they found?

Dinosaur remains have been found on every continent of the world. Some sites are particularly exciting, with more than 10,000 bones being discovered. These include places where rocks have been worn away naturally, exposing the remains, or cut away by human activity, such as in quarries.

South America

South America was home to some of the earliest dinosaurs, including Eoraptor. The continent also boasts some of the largest dinosaurs, such as Saltasaurus.

Europe

Nearly 200 years ago, European scientists were the first to correctly identify dinosaur remains. In 1824, the bones of a "great lizard" were given the scientific name Megalosaurus.

Asia

More dinosaurs have been found in China and other parts of Asia than anywhere else in recent years, including the feathered Velociraptor and Sinosauropteryx.

Australia and New Zealand

Dinosaur Cove is a coastal site in Victoria, Australia, where many discoveries were made in the 1970s. The continent's most complete skeleton is the plant-eating Muttaburrasaurus.

Africa

The Sahara Desert is a hot spot for human dinosaur hunters. Spinosaurus was first discovered there, while Kentrosaurus was found in Tanzania, East Africa.

Antarctica

Dinosaurs, including the crested beak Creeper Cryolophosaurus, lived in Antarctica when the climate was warmer and it was covered in forests instead of ice.

curiosity and excitement which made them different from their valley friends But what made these young dinosaurs stand out was that they knew a secret that made their hearts race and their imaginations soar they could move through time The valley itself was a beautiful haven like a prehistoric Eden with clear streams running through it and emerald colored plants as far as the eye could see The valley was filled with the beautiful sounds of singing insects and birds and tall palm trees gently swayed in the warm fragrant breeze This amazing group of dinosaurs was born here in a place that has always been beautiful These young dinosaurs were filled with a sense of wonder that went beyond what they normally did While most of the people who lived in the valley were happy to graze and relax in the shade this unique group couldn't get enough excitement Every day was a new adventure whether it was finding secret waterfalls navigating mysterious caves or playing complicated hide and seek among the ancient ferns But there was one journey that was different from the others They found out about the secret by accident but it took them on the most amazing trip of their lives Deep in the middle of their valley at the base of a twisted and tall oak tree was a secret tunnel that led to different times This old oak tree had roots that went deep into the ground and branches that reached so far up that they might have touched the fabric of time One of the young dinosaurs bumped into an old oak tree while playing their favorite game of hide and seek on a sunny afternoon In an instant they were taken to a planet that was around millions of years before their time When they found themselves surrounded by huge beasts they had only heard about in bedtime tales they were scared at first The huge Tyrannosaurus rex the tall Brachiosaurus and the heavily protected Ankylosaurus all lived in the same old area But as they went deeper into this ancient world their fear turned into awe They were amazed by the power of these huge animals as well as by how big they were and how beautiful the scenery was around them They walked through lush jungles with the sounds of exotic birds and rustling leaves They found peaceful prehistoric lakes that sparkled in the golden light and gasped when they saw dinosaurs walking around freely as if time hadn't changed them It didn't take these young time travelers long to figure out that they weren't just going through They made friends with the people who lived in this old land because they were curious and liked to try new things They learned how to get food from herbivorous dinosaurs who showed them the best places to eat and taught them how to avoid the most dangerous enemies They were wandering the deep jungle one amazing day when they found a nest of baby dinosaurs These tiny animals were so cute with their tiny horns and squeaky sounds The young time travelers couldn't bear to leave them on their own so they stayed to guard and guide them Their goal was to get the dinosaur babies back to their parents which was a hard and touching journey As they went through the wilderness on their mission they faced a number of dangerous situations They had to cross dangerous roaring rivers Some dinosaurs used their long necks to build bridges while others moved quickly and deftly through the dangerous water They used their brains and worked together to outsmart the hungry pterosaurs that were looking for food in the sky
