Finding Space Winnicott God And Psychic Reality:

Finding Space Ann Belford Ulanov, 2001-01-01 In *Finding Space* Ann Belford Ulanov argues that depth psychology in general and the work of D W Winnicott in particular offer vital new ways in which to apprehend religious life especially Christian religious life Her inspiration is rooted in Winnicott's influence on her work as an analyst and how his ideas have enriched her own Christian faith and religious understanding In addition Ulanov feels Winnicott's focus on the intensity of aliveness is an antidote to the plight of contemporary religion that it can be passionless or rote and thereby irrelevant to so many people She expands Winnicott's concept of transitional space between self and other to apply to the space between the human and divine She explores the importance of the illusionist element of God images in creative approaches to the divine Other topics include the paradox transitional reality holds with subjective and objective notions Christians have of God the inclusion of the body specifically sexuality and aggression and the struggle for integration within the self in the search for relationship with God and the importance of the feminine In an especially helpful appendix Ulanov includes Winnicott's thoughts on matters pertinent to religious life and thought

The Routledge Companion to Theism Charles Taliaferro, Victoria S. Harrison, Stewart Goetz, 2013 There are deep and pervasive disagreements today in universities and colleges and popular culture in general over the credibility and value of belief in God This has given rise to an urgent need for a balanced comprehensive accessible resource book that can inform the public and scholarly debate over theism While scholars with as diverse interests as Daniel Dennett Terry Eagleton Richard Dawkins Jrgen Habermas and Rowan Williams have recently contributed books to this debate theism as a concept remains poorly understood and requires a more thorough and systematic analysis than it has so far received in any single volume The Routledge Companion to Theism addresses this need by investigating theism's history as well as its relationship to inquiry in the sciences social sciences and humanities and to its wider cultural contexts The contents are not confined within the philosophy of religion or even within the more expansive borders of philosophy Rather The Routledge Companion to Theism investigates its subject through the lens of a wide variety of disciplines and explores the ramifications of theism considered as a way of life as well as an intellectual conviction The five parts of the volume indicate its inclusive scope I What is Theism II Theism and Inquiry III Theism and the Socio Political Realm IV Theism and Culture V Theism as a Way of Life The result is a well ordered and thorough collection that should provide a wide spectrum of readers with a better understanding of a subject that's much discussed but frequently misunderstood As the editors note in their Introduction while stimulating and

informing the contemporary debate a key aim of the volume is to open new avenues of inquiry into theism and thereby to encourage further research into this vital topic Comprised of 54 essays by leading scholars in philosophy history theology religious studies political science education and sociology The Routledge Companion to Theism promises to be the most useful comprehensive resource on an emerging subject of interest for students and scholars **Great Mystics and Social Justice** Susan Rakoczy, IHM, 2006 **A Manual of Dynamic Play Therapy** Dennis McCarthy, 2012 Children experience growth and change throughout their lives This book explains how this reorganising process can be used in play therapy to help children dealing with social neurological developmental health and family issues Theory and examples are used to show how to apply the practice with a range of clients The Science of the Art of Psychotherapy Allan Schore, 2012-04-02 The third book in Schore's trilogy on the development of the self Focusing on the hottest topics in psychotherapy attachment developmental neuroscience trauma the developing brain this book provides a window into the ideas of one of the best known writers on these topics Following Allan Schore's very successful books on affect regulation and dysregulation also published by Norton this is the third volume of the trilogy It offers a representative collection of essential expansions and elaborations of regulation theory all written since 2005 As in the first two volumes of this series each chapter represents a further development of the theory at a particular point in time presented in chronological order Some of the earlier chapters have been re-edited those more recent contain a good deal of new material that has not been previously published The first part of the book Affect Regulation Therapy and Clinical Neuropsychanalysis contains chapters on the art of the craft offering interpersonal neurobiological models of the change mechanism in the treatment of all patients but especially in patients with a history of early relational trauma These chapters contain contributions on modern attachment theory and its focus on the essential nonverbal unconscious affective mechanisms that lie beneath the words of the patient and therapist on clinical neuropsychanalytic models of working with relational trauma and pathological dissociation and on the use of affect regulation therapy ART in the emotionally stressful heightened affective moments of clinical enactments The chapters in the second part of the book on Developmental Affective Neuroscience and Developmental Neuropsychiatry address the science that underlies regulation theory's clinical models of development and psychopathogenesis Although most mental health practitioners are actively involved in child adolescent and adult psychotherapeutic treatment a major theme of the latter chapters is that the field now needs to more seriously attend to the problem of early intervention and prevention Praise for Allan N Schore Allan Schore reveals himself as a polymath the depth and breadth of whose reading bringing together neurobiology developmental neurochemistry behavioral neurology evolutionary biology developmental psychoanalysis and infant psychiatry is staggering British Journal of Psychiatry Allan Schore's work is leading to an integrated evidence based dynamic theory of human development that will engender a rapprochement between psychiatry and neural sciences American Journal of Psychiatry One cannot over emphasize the significance of Schore's monumental creative labor Oliver

Sacks work has made a great deal of difference to neurology but Schore's is perhaps even more revolutionary and pivotal His labors are Darwinian in scope and import Contemporary Psychoanalysis Schore's model explicates in exemplary detail the precise mechanisms in which the infant brain might internalize and structuralize the affect regulating functions of the mother in circumscribed neural tissues at specifiable points in its epigenetic history Journal of the American Psychoanalytic Association
Allan Schore has become a heroic figure among many psychotherapists for his massive reviews of neuroscience that center on the patient therapist relationship Daniel Goleman author of Social Intelligence

History through Trauma Tiffany Houck-Loomis,2018-04-11 Our sacred texts have the potential to become texts of torture or texts of liberation History through Trauma explores the symbolic function of religious political and national symbols that aid in the construction of historical narratives and the psychological effects of trauma on their creation and dissolution The Deuteronomic Covenant paramount in the construction of a biblical history of Israel is analyzed with regard to Israel s history of exile What is proffered is the book of Job as a symbolic history of Israel that stands as a counter history beside the dominant history constructed in the canon s historical books a counter history whose function works to re enliven the symbol of covenant History through Trauma brings consciousness to the effects of exile on the dominant historical narratives in the Hebrew canon and to the eradicated affective experiences of trauma that surface in counter texts such as the book of Job This work offers a valuable new understanding of the impact of trauma on history making in general an understanding that brings light to biblical studies practical theology pastoral psychology and psychoanalysis

The Faces of Forgiveness F. LeRon Shults,Steven J. Sandage,2003-05-01 While forgiveness has historically been regarded as a religious concern it has also become a popular topic in contemporary

psychology Unfortunately there has been little effort to combine a Christian understanding of forgiveness with psychology The Faces of Forgiveness winner of the Narramore Award from the Christian Association for Psychological Studies steps in to fill this void The authors fuse Christian forgiveness and psychology with the unifying motif of the face thereby building on the considerable psychological research linking emotions related to forgiveness with the human face At a deeper level the face can serve as a metaphor for integrating forgiveness wholeness and salvation The authors argue that forgiveness should take a central role in our understanding of salvation because it is warranted by the Bible and engages our postmodern context Pastors psychologists family counselors and students of psychology and theology will find The Faces of Forgiveness a helpful resource

Madness and Creativity Ann Belford Ulanov, 2013-03-20 Analyst and author Ann Belford Ulanov draws on her years of clinical work and reflection to make the point that madness and creativity share a kinship an insight that shakes both analyst and analysand to the core reminding us as it does that the suffering places of the human psyche are inextricably and often inexplicably related to the fountains of creativity service and even genius She poses disturbing questions How do we depend on order when chaos is a necessary part of existence What are we to make of evil both that surrounding us and that within us Is there a myth of meaning that can contain all the differences that threaten to shatter us Ulanov's insights unfold in conversation with themes in Jung's Red Book which according to Jung present the most important experiences of his life themes he explicated in his subsequent theories In words and paintings Jung displays his psychic encounters from 1913-1928 describing them as inner images that burst forth from the unconscious and flooded me like an enigmatic stream and threatened to break me Responding to some of Jung's more fantastic encounters as he illustrated them Ulanov suggests that our problems and compulsions may show us the path our creativity should take With Jung she asserts that the multiplicities within and around us are paradoxically pieces of a greater whole that can provide healing and unity as in her words every part of us and of our world gets a seat at the table Taken from Ulanov's addresses at the 2012 Fay Lectures in Analytical Psychology *Madness and Creativity* stands as a carefully crafted presentation with many clinical examples of human courage and fulfillment

What Job's Friends Could Have Done Stephen Torr, 2025-08-19 In a world that is becoming more aware of the impact of traumatic experiences on the lives of individuals the church is faced with the challenge of examining how to do life well together in a way that helps rather than hinders those who are living in the aftermath of trauma Beginning with the question of what Job's friends could have done differently to help Job in the midst of his suffering the present work draws on Kevin Vanhoozer's theodramatic model and the Object Relations Theory of British pediatrician and psychoanalyst Donald Winnicott to provide biblically rooted guidance for developing a trauma sensitive church In bringing these perspectives together exploration takes place into what it means to be made in the image of God in the theodrama and what the church's role is in enabling the christological form of this image to take shape in each individual particularly in the aftermath of individual trauma The work of Winnicott provides fresh insight into how this development might be facilitated by

the church within the theodrama of salvation The Discerning Heart Wilkie Au, 2006 Knots and their Untying: Essays on Psychological Dilemmas Ann Belford Ulanov, Using the image of knots that are hard and sometimes impossible to untie Ann Ulanov circles around the psychic dilemmas that entangle us sometimes for decades These can be heartrending to us and destructive to others even to those we love Yet these knots so peculiarly our own also open onto human problems we share with others even across the ages Hence working on our knots takes us far down to taproots of energy and far up and out to bring that vital aliveness into shared existence with others Knots thus comprise a ladder offering footholds and handholds for descending and ascending between what Jung calls Below and Above human and divine What are such knots What to do when forgiveness does not happen What to do with the inferiority of the inferior function With the question of how much lightning can we stand With the perils of individuation These are just a few examples from the essays in this book The reader is invited to browse the essays according to personal interest or to read straight through The surprise is that these vexing knots that tie us up and hold us down also give us a mooring they bind us to a path that is uniquely our own that can bear the fruit of our service to others and to the surrounding whole **Creativity, Theology, and Posttraumatic Growth** Dustin S. Risser, 2022-08-11 The relationship between creativity Christian theology and experiences of growth after trauma may open pathways towards transformation for individuals and communities An integrated theory based upon the psychological theories of D W Winnicott the pneumatology of Jürgen Moltmann and the current science of trauma and creativity is proposed to investigate how playful creative expression with the world may foster experiences of positive psychological change This theory suggests that creative action rooted in a rediscovery of play might allow for experiences of reorganization and growth after traumatic upheaval Stewarding creative action after trauma is one way in which the afflicted can collaborate with the Holy Spirit even in the midst of tragic pain to honor our wholeness and dignity as beings made in the image of God Accessing our created God given purpose and identity from a perspective of playful co creation is offered as a path to psychological healing and transformation This approach may have wide ranging implications for faith based clinicians the church and communities walking through traumatic desert like landscapes of the heart **Pastor John** Brian N. Tebbutt, 2020-08-12 Puzzled by John This exciting book illuminates the Gospel in a completely fresh way Reading and working with it will deepen fellowship and skill in pastoral care The text is mined for gems of insight into ourselves and as a rich resource of ample illustrative material for preachers and teachers Poetry prose and hymn references abound Pastor John elucidates the first four chapters of John's Gospel presenting new insights into the text in a way that involves us in the story When we read we come nearer to Jesus who is always with us anyway A guide is provided for understanding ourselves experienced by sharing with each other Precise guidance is given for workshops where all contribute something of themselves in the light of the text This experience of John's Gospel is illuminated using the latest way of reading the text What the story means is conveyed in detailed Bible study It becomes real for us and this reality is explored by understanding

the process of reading and observing our reactions to the text John s Christ becomes central to who we are Play and Creativity in Psychotherapy Terry Marks-Tarlow, Daniel J. Siegel, Marion F. Solomon, 2017-11-07 Distinguished clinicians demonstrate how play and creativity have everything to do with the deepest healing growth and personal transformation Through play as children we learn the rules and relationships of culture and expand our tolerance of emotions areas of life training that overlap with psychotherapy Here leading writers illuminate what play and creativity mean for the healing process at any stage of life Contributors include Mih ly Cs kszentmih lyi Daniel J Siegel Marion Solomon Aldrich Chan Allan Schore Terry Marks Tarlow Pat Ogden Louis Cozolino Theresa Kestly Jaak Panksepp Stuart Brown Madelyn Eberly Zoe Galvez Betsy Crouch Bonnie Goldstein and Steve Gross
