**Fire in the Belly** Jerry D. Neal, Jerry Bledsoe, 2020-01-17 When Bill Pratt and Powell Seymour got laid off from their technology jobs in Greensboro North Carolina in 1991 they had no idea that they were about to become leaders of a revolution in electronic communications They did know that they wanted to start their own company although they had no means to fund it They asked their friend Jerry Neal to leave his job at the same company and join them to raise money and market their products Those products numbered only seven at the time and they could fit in a small matchbox with plenty of room to spare But they were unlike any other products Bill Pratt had designed the first radio frequency integrated circuits the semiconductor chips that would make the cell phone phenomenon possible Within a year of starting the company Pratt had designed another chip the first power amplifier using an exotic technology that many considered unreliable and impossible to commercialize Although the chip failed at first it became a company builder Now more than half of the cell phones made in the world contain power amplifiers made by RF Micro Devices of Greensboro the world's leading supplier The company has plants and offices around the world and has broadened its reach into every aspect of wireless electronic communications Jerry Neal's revealing entertaining often funny account of how this came about is much more than a story of one company's beginnings It's a wild ride through the technology boom of the 1990s at the peak of which just nine years after its founding RF Micro Devices had a market value of 16 billion twice that of its technology partner the huge long established defense contractor TRW *Fire in the Belly* should be a handbook for entrepreneurs and a textbook for college business majors [The World's Number One, Flat-Out, All-Time Great, Stock Car Racing Book](#) Jerry Bledsoe, 2019-02-01 On Labor Day weekend of 1972 journalist Jerry Bledsoe hooked up with the stock car racing circuit to begin research for his first book The result of his efforts first published in 1975 has been called the classic work on stock car racing Bledsoe captures the beginnings of the modern NASCAR era a time when legends like Richard Petty David Pearson Bobby Allison and the Wood brothers ruled It was also a time when independent drivers like Wendell Scott NASCAR's first African American driver and Larry Smith could build a car in their garages during the week and race on Sunday alongside King Richard With levels of access impossible to achieve today Bledsoe is not only in the pits and garages with the drivers but also is alongside their family driving to the next race in a van piled high with ice chests filled with sandwiches and fried chicken He digs into the sport's rough and rowdy history and shines a light into its nooks and crannies uncovering the forgotten role that women drivers played in creating this most macho of motorsports And then there are the fans There's Red Robinson the self-proclaimed World's Number One Stock Car Racing Fan who collects racing beauty queens the way some people collect stamps And the fans camped out in the infield at Darlington the biggest wildest whoopingest holleringest drinkingest gamblingest carousingest knock down fall out blowout held in the South More than a book about racing this is a close up look at a cultural phenomenon that illuminates America and the South In 1965 Tom Wolfe called racer Junior Johnson the last

American hero The World's Number One All Time Great Stock Car Racing Book shows that a decade later there were still plenty of heroes circling the track with no signs of them disappearing anytime soon *Quantum Physics of Semiconductor Materials and Devices* Debdeep Jena, 2022 Aimed at upper level undergraduate students and graduate students in Electrical Engineering Physics Applied Physics Materials Science and Engineering this textbook covers the quantum physics of semiconductors including their practical applications in various areas and their future potential *Do-Good Boy* Jerry Bledsoe, 2017-07-05 In 1960 at age 18 future bestselling author Jerry Bledsoe Bitter Blood The Angel Doll told an Army recruiter that he wanted to be an artist This was his lucky day the recruiter informed him The Army had the best art school in the world But after being sworn in Bledsoe was pulled aside by a major and informed that no Army art school existed He was being assigned instead to Information School Although Bledsoe who had flunked high school English for failure to write book reports and term papers had no idea what this unexpected decision entailed it would set the direction for the rest of his life Bledsoe limits this warm deeply personal and often humorous memoir to the turbulent 60s which he began as a psychological warfare writer in the early stages of the Vietnam War His Army experiences led him to become a newspaper reporter and columnist thrusting him into the major stories of the decade and leading him to meet and write about hosts of remarkable and engaging people including a relatively unknown musician named Jimi Hendrix who was opening for the Monkees comedy legend Brother Dave Gardner and civil rights leader Ben Elton Cox From moments of true Catch 22 absurdities in the Army to historic events of the civil rights movement Do Good Boy gives its readers an insider's view as a young author discovers his calling **The Angel Doll** Jerry Bledsoe, 2016-11 If even a small part of a child still lives within your heart you can't help but be captivated by this deeply moving novella based on bestselling author Jerry Bledsoe's childhood memories Set in a North Carolina manufacturing town during the 1950s it is the poignant story of two ten year old boys and their search for an angel doll a search that turned into a lesson of love Every day Whitey Black reads The Littlest Angel to his sister Sandy a four year old stricken with polio Now she wants just one thing for Christmas an angel doll Unfortunately in this small North Carolina town no one has ever heard of such a thing Nevertheless Whitey Black and his best friend set out to find her one at great cost and for even greater reward Along the way they learn much about sadness and heartbreak but most important they learn about the transformative power of love The Angel Doll is about childhood reaching out in later life and grabbing hold never to be forgotten or remembered exactly as it was Timeless and touching The Angel Doll is sure to become a family favorite and a tradition for years to come **A Gift of Angels** Jerry Bledsoe, 2017-09-04 Critics proclaimed Jerry Bledsoe's bestseller The Angel Doll an instant classic and a family treasure It sold more than 110 000 copies in hardcover was excerpted in Good Housekeeping selected by The Literary Guild Doubleday Book Club and Crossings Book Club and was made into a Lifetime movie In The Angel Doll we met Whitey Black who despite his poverty sets out to get an angel doll for his four year old sister because she loves The Littlest Angel story so much Although his sister doesn't live to see her doll we

learn of another angel who many years later gives angel dolls to children in terminal hospital wards each Christmas In this deeply moving sequel to *The Angel Doll* Bledsoe tells the rest of the story and brings the characters full circle to the present day A story of friendship love and giving it is certain to bring tears to the eyes of all who read it even if they never heard of *The Angel Doll*

Integrated Electronics on Aluminum Nitride Reet Chaudhuri,2022-12-06 This thesis outlines the principles device physics and technological applications of electronics based on the ultra wide bandgap semiconductor aluminum nitride It discusses the basic principles of electrostatics and transport properties of polarization induced two dimensional electron and hole channels in semiconductor heterostructures based on aluminum nitride It explains the discovery of high density two dimensional hole gases in undoped heterojunctions and shows how these high conductivity n and p type channels are used for high performance nFETs and pFETs along with wide bandgap RF mm wave and CMOS applications The thesis goes on to discuss how the several material advantages of aluminum nitride such as its high thermal conductivity and piezoelectric coefficient enable not just high performance of transistors but also monolithic integration of passive elements such as high frequency filters enabling a new form factor for integrated RF electronics
