The Global Brain Satish Nambisan, Mohanbir Sawhney, 2010 All the talk about open innovation and externally focused innovation assumes that one size fits all in terms of what network centric innovation is and how companies should harness external creativity But the reality is that there is no one right way to master this tool For instance loosely governed community based innovation projects are a very different animal from tightly orchestrated development projects driven by a large firm As the landscape of network centric innovation becomes more diverse and more confusing there is a desperate need to structure the landscape to better understand different models for network centric innovation This book brings clarity to the confusion Further it argues that managers cannot rely on anecdotal success stories they read about in the press to implement a network centric innovation strategy They need rigorous and analytical advice on what role their company should play in an innovation network what capabilities they need to create and how they need to prepare their organization for this significant shift in the innovation approach This book offers a practical and detailed roadmap for planning and implementing an externally focused innovation strategy
