Jonathan Mingle describes the joys and struggles of daily life in the Zaskar Valley where villagers are buffeted by powerful environmental and economic forces while also tracing black carbon's dark fingerprints outward from Kumik and around the world. Mingle investigates its impacts on snow, ice, and water from Mt Everest to California and the silent health epidemic it fuels from New York to New Delhi. Combining cultural history, detailed reportage, climate and energy science, and dramatic storytelling, *Fire and Ice* is a profound examination of the global challenges of averting climate chaos and lifting billions out of energy poverty and water scarcity. Can Kumik's people come together to reinvent, harness, and what remains of their life sustaining ice and reinvigorate their traditions of solidarity in time to save themselves? Can the rest of us rise to the same challenge? *Fire and Ice* connects these questions with the work of enterprising scientists, engineers, entrepreneurs, and activists around the world in a narrative that combines mythology, reason, humor, persistence, and hope in a race against a global clock.

Fire in the Forest Peter A. Thomas, Robert S. McAlpine, 2010-09-23 How destructive or beneficial are forest fires to wildlife? Should we be trying to reduce or increase the amount of fire in forests? How are forest fires controlled, and why does this sometimes fail? What effect will climate change have? These and many other questions are answered in this richly illustrated book written in non-technical language. The journey starts in the long geological history of fire, leading up to our present love-hate relationship with it. Exploring the physics of how a single flame burns, the journey continues through how whole forests burn and the anatomy of firestorms. The positive and negative ecological effects of fires are explored from plants and wildlife to whole landscapes. The journey ends with how fires are controlled and a look to the future. This book will be of interest to ecologists, biogeographers, and anyone with an interest in forest fires and the role they play.

Pilgrims on the Ice, 2008-05-01 Robert Falcon Scott's 1901-4 expedition to the Antarctic was a landmark event in the history of Antarctic exploration, creating a sensation comparable to the Arctic efforts of the American Robert E. Peary. Scott's initial expedition was also the first step toward the dramatic race to the South Pole in 1912, which resulted in the tragic deaths of Scott and his companions. Since then, Scott's reputation has vacillated between two extremes: Was he a martyred hero, the beau idéal of a brave and selfless explorer, or a bumbling fool whose mistakes killed him and his entire party? *Pilgrims on the Ice* goes beyond the personality of Scott to remove the first expedition from the shadow of the second, to study objectively its purpose, its composition, and its real accomplishments. the author Surviving the Ice Kristin J. Russo,2019-08-01 About 400 miles from the North Pole a plane crashes stranding its passengers in the freezing cold There is little shelter and temperatures dip dozens of degrees below freezing With an oncoming blizzard rescue is delayed This was the beginning of a 30 hour ordeal for the survivors of the crash who had been on their way to an outpost in the icy wilderness of northern Canada Iron Will Surviving the Ice tells five chilling stories of people who found themselves lost stranded or abandoned in deathly cold conditions From enduring frostbite and hypothermia to traversing dangerous ice crevasses and deadly winds readers will learn how the survivors beat the odds to live through their icy adventures The Ice Age Challenge Rolf A. F. Witzsche,2005-03-01 The Ice Age Challenge refers to the challenge that we face globally to create a new foundation for living when the coming Ice Age climate shuts down most of the world s agriculture possibly 100 to 150 years from now The novel is the first part of the second episode of the series The Lodging for the Rose an eight part science fantasy centered on universal love by Rolf A F Witzsche We truly are in a race against time the greatest race since the dawn of man racing to create the technologies economies finances politics and social cultures that enable us to shift agriculture into efficient indoor facilities in order to protect our food production in the coming Ice Age environment The Earth has been in an Ice Age for 1 8 million years interspersed by the occasional warm period like the present one that is ending in spite of global warming The necessary infrastructures for survival are technologically feasible but will we empower ourselves to create them That appears to be less certain It seems that we have been put in race without the skills for it But then don t we have the potential to be fast learners In the course of exploring the question the novel touches on the collapse of the Soviet Union the Aryan invasion in historic India the face of Islam the fascist holocaust depopulation global warming nuclear fusion power indoors agriculture and principles of marriage sex culture and science
