**History of North American Trees** Donald Culross Peattie,2013-10-10 A volume for a lifetime is how The New Yorker described the first of Donald Culross Peattie s two books about American trees published in the 1950s In this one volume edition modern readers are introduced to one of the best nature writers of the last century As we read Peattie s eloquent and entertaining accounts of American trees we catch glimpses of our country s history and past daily life that no textbook could ever illuminate so vividly Here you ll learn about everything from how a species was discovered to the part it played in our country s history Pioneers often stabled an animal in the hollow heart of an old sycamore and the whole family might live there until they could build a log cabin The tuliptree the tallest native hardwood is easier to work than most softwood trees Daniel Boone carved a sixty foot canoe from one tree to carry his family from Kentucky into Spanish territory In the days before the Revolution the British and the colonists waged an undeclared war over New England s white pines which made the best tall masts for fighting ships It s fascinating to learn about the commercial uses of various woods for paper fine furniture fence posts matchsticks house framing airplane wings and dozens of other preplastic uses But we cannot read this book without the occasional lump in our throats The American elm was still alive when Peattie wrote but as we read his

account today we can see what caused its demise Audubon's portrait of a pair of loving passenger pigeons in an American beech is considered by many to be his greatest painting It certainly touched the poet in Donald Culross Peattie as he depicted the extinction of the passenger pigeon when the beech forest was destroyed A Natural History of North American Trees gives us a picture of life in America from its earliest days to the middle of the last century The information is always interesting though often heartbreaking While Peattie looks for the better side of man's nature he reports sorrowfully on the greed and waste that have doomed so much of America's virgin forest Pamphlets on Forest Protection, 1929 **Proceedings of the Common Council, for the City of Rochester, for ...** Rochester (N.Y.). Common Council, 1880 *First Editions of American Authors* Frank Maier, 1820 **Fire Performance of Wood Treated with Combined Fire-retardant and Preservative Systems**, 1996 The availability of western red cedar has decreased in recent years and other species of wood are being considered as substitute materials for wood shakes and shingles However the wood of these alternative species is more susceptible to decay than is western red cedar The objective of this study was to evaluate the fire performance of combined fire retardant and preservative treatments using different fire test methods Several amino resin fire retardants were used in combination with several wood preservative compounds that imparted both fire retardancy and decay resistance to wood Treated specimens underwent fire tube tests and based on the results of these tests two fire retardants and two quaternary ammonium preservatives were selected for additional fire testing These treated materials were subjected to a modified Schlyter test and a burning brand test The heat release rate was also measured Both weathered and unweathered specimens were evaluated The unweathered and weathered treated material exhibited good fire performance Sessional Papers, British Columbia British Columbia.
