find his short fiction even more impressive Copyright Libri GmbH All rights reserved An Informal History of the Hugos Jo Walton, 2018-08-07 Engaged, passionate and consistently entertaining, this is a book for those who enjoyed Walton's previous collection of essays from Tor.com, the Locus Award-winning *What Makes This Book So Great*. The Hugo Awards, named after pioneer science fiction publisher Hugo Gernsback and voted on by members of the World Science Fiction Society, have been given out since 1953. They are widely considered the most prestigious award in science fiction. Between 2010 and 2013, Jo Walton wrote a series of posts for Tor.com surveying the Hugo finalists and winners from the award's inception up to the year 2000. Her contention was that each year's full set of finalists generally tells a meaningful story about the state of science fiction at that time. Walton's cheerfully opinionated and vastly well-informed posts provoked valuable conversation among the field's historians. Now these posts, lightly revised, have been gathered into this book along with a small selection of the comments posted by SF luminaries such as Rich Horton, Gardner Dozois, and the late David G. Hartwell. *The Mammoth Encyclopedia of Science Fiction* George Mann, 2012-03-01 This encyclopedia is the most up-to-date, concise, clear, and affordable guide to all aspects of science fiction, from its background to generic themes and devices, from authors established and new to films. Science fiction has evolved into one of the most popular, cutting-edge, and exciting fiction genres, with a proliferation of modern and classic authors, themes, and ideas, movies, TV series, and awards. Arranged in an A-Z format and featuring a comprehensive index and cross-referencing system, *The Mammoth Encyclopedia of Science Fiction* is also the most accessible and easy-to-use encyclopedia of its kind currently available. Science Fiction and the Prediction of the Future Gary Westfahl, Wong Kin Yuen, 2014-01-10 Science fiction has always challenged readers with depictions of the future. Can the genre actually provide glimpses of the world of tomorrow? This collection of fifteen international and interdisciplinary essays examines the genre's predictions and breaks new ground by considering the prophetic functions of science fiction films as well as SF literature. Among the texts and topics examined are classic stories by Murray Leinster, C. L. Moore, and Cordwainer Smith; 2001: A Space Odyssey and its sequels; Japanese anime and Hong Kong cinema; and electronic fiction. *The Universal Mind* Xiphias Press, 2016-09-01 *The Universal Mind: The Evolution of Machine Intelligence and Human Psychology*. There is the perception of being totally omniscient, where one has access to all knowledge, having a complete understanding of everything. There is also the perception of being totally One with the Universe, One with Nature, or the Universal Mind. During this time, one is also experiencing the feeling of total love, acceptance, and peace. This book examines the relationship of mind as intelligence and consciousness to matter, energy, and space-time. The concepts of Universal Mind or Collective Unconsciousness are discussed and related to physical phenomena such as the holographic distribution of information throughout all of space and the universe. From the paintings of Salvador Dalí to Carl Jung's Archetypes and his Red Book, and how they describe our collective subconscious, to Machine Learning and Whole Genome Sequencing, *The Universal Mind* explores the collective world consciousness, superintelligence, machine intelligence, and the practical
