Firepower From Slings To Star Wars:

Firepower Philip Warner, 1988 Firepower Philip Warner, 1988 British Armoured Divisions and Their Commanders, 1939-1945 Richard Doherty, 2013-07-16 A total of eleven British armoured divisions were formed during the 1939 1945 war but as this highly informative book reveals just eight saw action In 1940 only 1st Armoured Division faced the German blitzkrieg and it was in the North African desert that armoured divisions came into their own The terrain was ideal and six such divisions of Eighth Army fought Rommel's Panzers into submission Three were disbanded prior to the invasion of Sicily and Italy The campaign from D Day onwards saw the Guards Armoured 7th Armoured the Desert Rats 11th and Percy Hobart's 79th Armoured Division in the thick of the action Of particular interest are the men who commanded these elite formations and the way their characters contributed to the outcome of operations While some such as Dick McCreery went onto greater heights others did not make the grade the stakes were high A number such as Pip Roberts were just perfectly suited in the role Written by a leading military historian this book describes many fascinating aspects of armoured warfare from its uncertain beginnings through the development of tactics and the evolving tank design Due to British deficiencies reliance had to be placed on US Grants and Shermans with the Comet coming late and the Centurion too late The combination of gripping historical narrative and well researched fact make this an invaluable and highly readable work on the contribution of British Armoured Divisions to victory in the Second World War **Crisis, Reinvention and Resilience in Museums**

Philip W. Deans, 2024-10-08 This book explores museum crises Through an investigation into the experience of the Imperial War Museum during the Second World War era 1933 1950 it considers how crises disrupt museums and the contrasting defensive and revolutionary strategies which museums must adopt when mitigating crises It is situated in a small but emergent literature concerning museums and crisis Existing works mainly comprise contemporary studies on difficult museum experiences predominantly financial difficulty wherein the term crisis has been applied to describe an institution's general state of malaise This book by contrast presents an innovative and groundbreaking historical case study on a single museum facing wholesale physical and ideological collapse deploying original crisis concepts to analyse different critical situations and the pathology underlying them Why the Allies Won Richard Overy, 2024-11-12 Overy has written a masterpiece of analytical history posing and answering one of the great questions of the century Sunday Times London Richard Overy's bold book begins by throwing out the stock answers to this great question Germany doomed itself to defeat by fighting a two front war the Allies won by sheer weight of material strength In fact by 1942 Germany controlled almost the entire resources of continental Europe and was poised to move into the Middle East The Soviet Union had lost the heart of its industry and the United States was not yet armed The Allied victory in 1945 was not inevitable Overy shows us exactly how the Allies regained military superiority and why they were able to do it He recounts the decisive campaigns the war at sea the crucial battles on the eastern front the air war and the vast amphibious assault on Europe He then explores the deeper

factors affecting military success and failure industrial strength fighting ability the quality of leadership and the moral dimensions of the war **Aviation Terrorism** Jin-Tai Choi, 1993-12-14 However the forces of law have failed to keep ahead of advancing threats As hijacking has become more difficult terrorists have adopted new tactics such as sabotage bombing Thus while the 1960s and the 1970s were the age of aircraft hijackings the 1980s could be said to be the age of sabotage bomb attacks in civil aviation history The Siege of Derry 1689 Richard Doherty, 2016-09-14 The Protestant war cry of No Surrender was first used in 1689 by the Mayor of Londonderry as James II's army laid siege to the city for 105 days during which half the city's population died There were many acts of courage from the heroic death of Captain Browning to the anonymous apprentice boys who played signal roles in the defence of the city The book examines how the Jacobites might have achieved success and the far reaching impact of the siege as a crucial event in the second British civil war This is a military study of one of the most iconic episodes in Irish history based on contemporary accounts official records of the day and published works on the siege With an understanding of seventeenth century warfare especially siegecraft the author probes many of the myths that have grown up around the siege and sets it in its proper context Its ramifications for the consequent history of Ireland cannot be over emphasised *Phillip Warner - Firepower* Phillip Warner, 2015-01-09 Firepower is an absorbing and stimulating study of methods of winning wars Firepower does not invariably mean what comes out of the barrel of a gun it comprises everything from morale to tactics strategy to logistics and subversion to diplomacy Written by the leading military historian Philip Warner Firepower examines weapons from slings and poisoned arrows to their modern counterparts rockets and chemical weapons Many weapons now thought to be ultra modern were derived from less sophisticated versions to use in pre Christian and medieval times Some of the secrets of early terror weapons such as Greek fire which could burn on water and stick to stone have been lost but the author makes shrewd assessments of their constituents and power The book describes the evolution of aircraft tanks underwater craft and even the art of secret communication The narrative is illustrated by accounts from soldiers with personal experience of clearing minefields engaging in hand to hand combat and pitting human skills against electronic devices Motivation is shown to be one of the most important factors in the history of warfare and is closely allied to training The book includes a wide survey of modern weapons and their systems explaining those available in the armouries of the NATO forces and the then Warsaw Pact countries All this is essential reading for anyone who wishes to understand the wars and skirmishes which take place in many parts of the world today by its knowledgeable sober assessments the book tends to be reassuring rather than alarmist Firepower is a comprehensive survey which avoids technical jargon and is written in a clear vigorous style It will interest the expert and amateur alike Philip Warner is a former senior lecturer at the Royal Military Academy at Sandhurst and author of forty books in the field of military history and biography He joined the army after graduating from Cambridge in 1939 and served in the Far East throughout World War II The book includes an extensive picture gallery and author biography and
