Fires Across The Water Transnational Problems In Asia:

This book addresses the historical and contemporary involvement of Chinese Americans from diverse walks of life in U.S.-China relations. The contributors present new evidence and fresh perspectives on familiar and unfamiliar national and transnational networks including families, businesspersons, community newspapers, students, lobbyists, philanthropists, and scientists, and consider the likely future impact of such contacts on the most important bilateral relationship at the start of the new millennium. The volume makes a multidisciplinary contribution to understanding the extensive and vital roles and promise of Chinese Americans at this critical juncture in U.S.-China relations and to revealing the importance of migrants as actors in contemporary global politics. The assessments shared by the contributors suggest that the nature and scope of the Chinese American involvement, particularly in global civil society networks, increasingly will determine the outcome of state-to-state relations between the United States and the PRC.

China's Struggle for Status Yong Deng, 2008-04-28. At the end of the Cold War, the People's Republic of China found itself in an international crisis facing severe problems in both domestic politics and foreign policy. Nearly two decades later, Yong Deng provides an original account of China's remarkable rise from the periphery to the center stage of the post-Cold War world. Deng examines how the once beleaguered country has adapted to and proactively realigned the international hierarchy, great power politics, and its regional and global environment in order to carve out an international path within the globalized world. Creatively engaging with mainstream international relations theories and drawing extensively from original Chinese material, this is a well-grounded assessment of the promises and challenges of China's struggle to manage the interlacing of its domestic and international transitions and the interactive process between its rise and evolving world politics.

Historical Dictionary of International Organizations in Asia and the Pacific Derek McDougall, 2014-10-01. *Historical Dictionary of International Organizations in Asia and the Pacific*, Second Edition, covers global, international, and regional organizations in Asia and the Pacific and encompasses both governmental and non-governmental organizations. East Asia Imperilled Alan Dupont, 2001-10-15. Security issues have traditionally been defined in military terms, yet the post-Cold War security landscape contains numerous non-military challenges to security. In this 2001 analysis, Alan Dupont argues that an emerging new class of non-military threats has the potential to destabilize East Asia and

reverse decades of hard won economic and social development He shows that these transnational shifts must be grasped and dealt with by governments and non government organizations both regionally and internationally if conflict is to be avoided Transnational threats stem from overpopulation deforestation and pollution global warming unregulated population movements transnational crime virulent new strains of infectious diseases and other issues not previously associated with international security Collectively they represent a new agenda and pose novel challenges for foreign and defence policy This highly informative compelling and authoritative book is essential reading for East Asia specialists and makes a significant contribution to international security debates

China's International Relations in the 21st Century Weixing R. Hu, Gerald Chan, Daojiong Zha, 2000-12-13 Most people believe China's foreign behavior is driven by its growing power status in world politics Chinese leaders still firmly uphold some traditional values in foreign policy such as sovereignty territorial integrity and national unification However it is often neglected that China's behavior is also shaped by its changing perception of the globalizing world and to a large extent is a result of external pressure on China By examining the dynamics of paradigm shifts in China's foreign policy thinking this book explores the ideological sources of China's international relations in the new century With growing economic interdependence with the outside world which creates both constraints as well as incentives to adapt to the prevailing norms in contemporary international relations authors of this volume analyze indigenous Chinese sources of intellect on the paradigm shifts The concepts studied in this volume include national identity nationalism globalism multilateralism sovereignty and the role of international law in Chinese foreign policy This volume helps to shed new light on how the dynamics of paradigm shifts affect China's behavior in international affairs

A World of Regions Peter J. Katzenstein, 2015-11-16 Observing the dramatic shift in world politics since the end of the Cold War Peter J Katzenstein argues that regions have become critical to contemporary world politics This view is in stark contrast to those who focus on the purportedly stubborn persistence of the nation state or the inevitable march of globalization In detailed studies of technology and foreign investment domestic and international security and cultural diplomacy and popular culture Katzenstein examines the changing regional dynamics of Europe and Asia which are linked to the United States through Germany and Japan Regions Katzenstein contends are interacting closely with an American imperium that combines territorial and non territorial powers Katzenstein argues that globalization and internationalization create open or porous regions Regions may provide solutions to the contradictions between states and markets security and insecurity nationalism and cosmopolitanism Embedded in the American imperium regions are now central to world politics

China, the United States, and 21st-Century Sea Power Andrew S. Erickson, Lyle J Goldstein, Nan Li, 2010-12-01 China's reaction to the United States new maritime strategy will significantly impact its success according to three Naval War College professors Based on the premise that preventing wars is as important as winning wars this new U S strategy they explain embodies a historic reassessment of the international system and how the United States can best pursue its interests in cooperation with

other nations The authors contend that despite recent turbulence in U S China military relations substantial shared interests could enable extensive U S China maritime security cooperation as they attempt to reach an understanding of competitive coexistence But for professionals to structure cooperation they warn Washington and Beijing must create sufficient political and institutional space

Remapping East Asia T. J. Pempel, 2018-08-06 An overarching ambiguity characterizes East Asia today The region has at least a century long history of internal divisiveness war and conflict and it remains the site of several nettlesome territorial disputes However a mixture of complex and often competing agents and processes has been knitting together various segments of East Asia In *Remapping East Asia* T J Pempel suggests that the region is ripe for cooperation rather than rivalry and that recent region building developments in East Asia have had a substantial cumulative effect on the broader canvas of international politics This collection is about the people processes and institutions behind that region building In it experts on the area take a broad approach to the dynamics and implications of regionalism Instead of limiting their focus to security matters they extend their discussions to topics as diverse as the mercurial nature of Japan s leadership role in the region Southeast Asian business networks the war on terrorism in Asia and the political economy of environmental regionalism Throughout they show how nation states corporations and problem specific coalitions have furthered regional cohesion not only by establishing formal institutions but also by operating informally semiformally or even secretly

US National Defense for the Twenty-first Century Edward A. Olsen, 2014-07-10 This provocative critique of Washington s current security policies draws on the arguments made by an array of non interventionist and conservative nationalist scholars It provides a blueprint for a more restrained and unilateral US role in global affairs

Illicit Trafficking Robert J. Kelly, Jesse L. Maghan, Joseph D. Serio, 2005-06-29 A detailed survey of a growing scourge of the global economy the smuggling of people materials and money Smuggling used to be a family business Today it is big business *Illicit Trafficking A Reference Handbook* offers a thorough introduction to the problems of illegal trafficking that have emerged from and been intensified by globalization This title provides an examination of how criminal enterprises have exploited opportunities to enrich themselves and broadened their involvement in many areas of illegal trafficking while compromising or evading legal authorities The coverage includes a brief history of illicit trafficking analyzes current problems and examines local and global containment policies such as Presidential Decision Directive 42 It also explores key international agreements on money laundering bank secrecy laws extradition treaties and technologies that have exploited legitimate business opportunities to enrich their profits while compromising or evading legal authorities

Same Bed, Different Dreams David M. Lampton, 2001-01-11 The title of this unique insider s look at a crucial decade of Sino American interchange derives from a Chinese expression that describes a relationship of two people whose lives are intimately intertwined but who do not fundamentally communicate with each other David M Lampton former president of the National Committee on U S China Relations demonstrates that while the United States and China have enormous interests at stake in their bilateral

relationship neither has been particularly deft in dealing with the other His fascinating account shows how the processes of globalization along with the development of international regimes and multilateral organizations have brought America and China increasingly close in the global bed At the same time their respective national institutions interests popular perceptions and the very characters of their two peoples assure that the nations continue to have substantially different dreams Lampton explores the reasons why the Sino American relationship is so difficult for both nations to manage and suggests ways it can be more effectively conducted in the future His unique experience in China nearly thirty years as a scholar as the head of a policy oriented exchange organization and as director of Washington think tank research programs enabled him to spend extended periods with Chinese leaders and see them as they encountered America as well as to observe U S leaders as they tried to come to grips with Chinese circumstances Among many other key events Lampton witnessed firsthand the aftermath of Tiananmen Square successive congressional battles over most favored nation tariff treatment the end of the Bush era and the rocky beginning of the Clinton administration the death of Deng Xiaoping and Jiang Zemin s transition to power the reversion of Hong Kong to Chinese sovereignty and the Asian financial crisis that unfolded from mid 1997 to the end of the decade Lampton s careful documentary research is supplemented by interviews and accounts of his personal interaction throughout the period with leaders and key players in Washington Beijing Taipei and Hong Kong The book thus represents a singular combination of historical research policy analysis and personal observation and offers guidance for those in both America and China who must shape this critical relationship in the twenty first century
