Paul and First-Century Letter Writing E. Randolph Richards, 2025-07-29 Traditional Christian art depicts Paul the letter writer pen in hand attentive to the Spirit We might think we know better and imagine him pacing in agitation as he rapidly dictates to a secretary his letter to the Galatians But in reality neither of these pictures is accurate In Paul's day producing a letter was a time consuming and costly business And we have ample resources from the ancient world to piece together what it must have been like A secretary was usually part of the picture But so were notes drafts corrections and careful rewrites not to speak of scratchy pens sooty ink and coarse papyrus Interestingly there is evidence that Paul involved his missionary team in the writing of letters And then came the delivery over land and sea the reading and circulation as well as the epistolary afterlife of copying collecting and storing E Randolph Richards has extensively studied ancient letter writing and secretaries Informed by the historical evidence and with a sharp eye for telltale clues in Paul's letters he takes us into this world and places us on the scene with Paul the letter writer What first appears to be just a study of secretaries and stationery turns out to be an intriguing glimpse of Paul the letter writer that overthrows our preconceptions and offers a new perspective on how this important portion of Christian Scripture came to be **Teaching and Learning for the**

Twenty-First Century Fernando M. Reimers, Connie K. Chung, 2019-01-02 This book describes how different nations have defined the core competencies and skills that young people will need in order to thrive in the twenty first century and how those nations have fashioned educational policies and curricula meant to promote those skills The book examines six countries Chile China India Mexico Singapore and the United States exploring how each one defines supports and cultivates those competencies that students will need in order to succeed in the current century Teaching and Learning for the Twenty First Century appears at a time of heightened attention to comparative studies of national education systems and to international student assessments such as those that have come out of PISA the Program for International Student Assessment led by the Organisation for Economic Co operation and Development This book's crucial contribution to the burgeoning field of international education arises out of its special attention to first principles and thus to first questions As Reimers and Chung explain much can be gained by an explicit investigation of the intended purposes of education in what they attempt to teach students and in the related questions of why those purposes and how they are achieved These questions are crucial to education practice and reform at a time when educators and the students they serve face unique pressing challenges The book's detailed attention to such questions signals its indispensable value for policy makers scholars and education leaders today Oral Biblical Criticism Casey W. Davis, 1999-06-01 The Apostle Paul expected the vast majority of the recipients of his letters to hear not read them He structured his compositions for the ear rather than the eye Pauline audiences would hear clues to meaning and structure because they had learned to communicate in a world where those clues were essential to understanding Recognizable structures and patterns were essential for listeners to organize

what they heard to follow to predict and to remember the flow of communication Oral Biblical Criticism examines Paul's Epistle to the Philippians in light of recent study of oral principles of composition and interpretation

In Search of First-century Christianity Joe E. Barnhart, Linda Kraeger, 2000 In Search of First Century Christianity contends that Christianity in the first century had no founder but rather evolved as a convergence of many forces political disillusionment cultural mutations religious and theological motifs psychosocial losses and new expectations Following an examination of the foundations of historical and literary criticism in the Renaissance and a detailed study of two writers in antiquity Thucydides and Chariton to examine writings in the period between Plato and the Gospel of Mark the authors explore the writing of Paul and the stories told in the Gospels as well as other Christian writings This book explores the difficult question of whether Jesus was an historical figure or an image who first emerged within developing communities of visionaries Through an exploration into how Christology developed in the early First Century the authors seek to show that Christianity's emerging theology was a venture in human problem solving and that both Paul and the Gospels sought to relate a story in which goodness would ultimately triumph in the person of Christ

Forgotten Scriptures Lee Martin McDonald, 2009-01-01 The early Christian church had a variety of Scriptures and other source material that informed their faith and shaped their thinking But after a few centuries the church decided to keep the twenty seven books of our present New Testament and to treat them as a canonical in faith and practice But what of the other books Many of them have survived and remain valuable for understanding the diversity of the early Christian church and the astounding claims of faith on which it was founded Learning about these ancient documents need not threaten the church's current orthodoxy and authority in fact learning about these texts can help today's Christians form a deeper understanding of the early church
