*The Visible and the Invisible in the Interplay between Philosophy, Literature and Reality* Anna-Teresa Tymieniecka, 2012-12-06 Merleau Ponty's categories of the visible and the invisible are investigated afresh and with originality in this penetrating collection of literary and philosophical inquiries Going beyond the traditional and current references to the mental and the sensory mind and body perceptual content and the abstract ideas conveyed in language etc these studies range from the hidden spheres of reality to the play of the visible and the invisible left as traces in works of human genius the origins of intellect and language the real and the imaginary in literature and the hidden realities in the philosophy of the everyday world These literary and philosophical probings collectively reveal the role of this disjoined conjoined pairing in the onto-poietic establishment of reality that is in the manifestation of the logos of life In

tandem they bring to light the hidden play of the visible and the invisible in the emergence of our vital societal intimate intellectual and creative involvements *The Catholic Reception of Continental Philosophy in North America* Gregory P. Floyd, Stephanie Rumpza, 2020-01-29 This volume by leading philosophers and theologians explores the reception of continental philosophy in North America and its ongoing relation to Catholic institutions What has prompted so many North American Catholics to support this particular school of thought Why do so many Catholics continue to find continental philosophy attractive and why do so many continental philosophers work in Catholic departments The establishment of the relationship between continental philosophy and Catholicism was not obvious nor was it easy Many of the contributors to this volume have played important roles in its development and in these pages they take a stance on this evolving relationship and demonstrate that the engagement is far from over Exploring the mutual interests that made this alliance possible as well as the underlying tensions the volume provides for the first time an extended reflection on the historical institutional and intellectual relationship between Catholicism and continental philosophy on North American soil up to the present day

Martin Buber David Dilling, *Beyond New Media* Art Herbig, Andrew F. Herrmann, Adam W. Tyma, 2014-11-14 Beyond New Media Discourse and Critique in a Polymediated Age examines a host of differing positions on media in order to explore how those positions can inform one another and build a basis for future engagements with media theory research and practice Herbig Herrmann and Tyma have brought together a number of media scholars with differing paradigmatic backgrounds to debate the relative applicability of existing theories and in doing so develop a new approach polymediation Each contributor's disciplinary background is diverse spanning interpersonal communication media studies organizational communication instructional design rhetoric mass communication gender studies popular culture studies informatics and persuasion Although each of these scholars brings with them a unique perspective on media's role in people's lives what binds them together is the belief that meaningful discourse about media must be an ongoing conversation that is open to critique and revision in a rapidly changing mediated culture By studying media in a polymediated way Beyond New Media addresses more completely our complex relationship to media in our everyday lives **Memory in the Ontopoiesis of Life** Anna-Teresa Tymieniecka, 2009-09-30 An individual has the potentiality to develop himself/herself during each period of his/her life This potential for development can be affected by many different factors These factors are divided into two main areas as internal factors and external factors The common assumption is that internal factors are more effective than external factors This is the dilemma about learning which process of lifelong learning is related to self-actualization In this paper discussion is limited to concept of lifelong learning and self-actualization LIFELONG LEARNING An individual can take proper support from many components such as family education system media and peers However they may not provide proper support for the individual Thus the individual needs more pedagogical support to solve problems of life develop his/her skills and capabilities The pedagogical support should be given by educational system Teaching and learning in some areas

such as math science drawing social studies and so on were defined as pedagogical support in the past But this approach is weakening in today During teaching and learning processes teacher and learner should focus on the learning rather than the teaching The concept of learning is likely to be argued in many dimensions The concepts of teaching and learning tend to be redefined based on the latest changes

Existential Thought and Therapeutic Practice Hans W Cohn,1997-07-28 A lucid and much needed account of existential psychotherapy As well as locating existential psychotherapy within a historical and philosophical context Hans Cohn encompasses various therapeutic issues and provides some vivid and sensitive passages of case material I found the book provided a concise and clarifying account of the underlying philosophy and of the psychotherapeutic practice The existentialist challenge to Freud outlined in the book provides an alternative point of view to counter potentially engulfing aspects of a psychoanalytic vision This is a stimulating book which is a valuable contribution towards dialogue between different approaches of psychotherapy International Journal of Psychotherapy

Magic and Management G. Caravantes,W. Bjur,2003-03-31 Whereas many recommend a paradigm change in order to cope with modern complexities Caravantes and Bjur urge executives not to change their operating paradigms but rather to become paradigm competent that is knowledgeable and competent in several ways of understanding and analyzing the working world Four major paradigms are described positive science quantum physics oriental mysticism and existentialism The authors recognize that executives often are obligated to make important choices despite insufficient data and the inability to predict future outcomes Hunches that one action is to be preferred over others are examples of high level managers making use of more than rational intuitions defined as knowing without knowing how you know The authors think of this as a kind of subconscious magic not taught or developed in the curricula of schools of management where the emphasis is on technical rationality and technique The authors emphasize the importance of subconscious perceptions in enabling an executive s access to infra conscious extra rational or magic capabilities and discuss some modern techniques that can be used to enhance an executive s magic and charisma Magic and Management is a fourth book co authored by Bjur and Caravantes until now published and marketed in Brazil Their work is based on three decades of multi cultural analysis and observation of management theory as it is practiced in many different countries This work is designed for the experienced manager who desires to enhance personal knowledge and discover inherent possibly hidden abilities to excel in leadership
