A History of Weed Science in the United States Robert L Zimdahl, 2010-02-04 It is important that scientists think about and know their history where they came from what they have accomplished and how these may affect the future Weed scientists similar to scientists in many technological disciplines have not sought historical reflection The technological world asks for results and for progress Achievement is important not in general the road that leads to achievement What was new yesterday is routine today and what is described as revolutionary today may be considered antiquated tomorrow Weed science has been strongly influenced by technology developed by supporting industries subsequently employed in research and ultimately used by farmers and crop growers The science has focused on results and progress Scientists have been and the majority remain problem solvers whose solutions have evolved as rapidly as have the new weed problems needing solutions In a more formal sense weed scientists have been adherents of the instrumental ideology of modern science That is an analysis of their work and their orientation reveals the strong emphasis on practical useful knowledge on know how The opposite and frequently complementary orientation that has been missing from weed science is an emphasis on contemplative knowledge that is knowing why This book expands on and analyzes how these orientations have affected weed science's development The first analytical history of weed science to be written Compares the development of weed science entomology and plant pathology Identifies the primary founders of weed science and describes their role

Are Superweeds an Outgrowth of USDA Biotech Policy? United States. Congress. House. Committee on Oversight and Government Reform. Subcommittee on Domestic Policy, 2011 **The Culture of Wilderness** Frieda Knobloch, 2000-11-09

In this innovative work of cultural and technological history Frieda Knobloch describes how agriculture functioned as a colonizing force in the American West between 1862 and 1945 Using agricultural textbooks USDA documents and historical accounts of western settlement she explores the implications of the premise that civilization progresses by bringing agriculture to wilderness Her analysis is the first to place the trans Mississippi West in the broad context of European and classical Roman agricultural history Knobloch shows how western land plants animals and people were subjugated in the name of cultivation and improvement Illuminating the cultural significance of plows livestock trees grasses and even weeds she demonstrates that discourse about agriculture portrays civilization as the emergence of a colonial socially stratified and bureaucratic culture from a primitive feminine and unruly wilderness Specifically Knobloch highlights the displacement of women from their historical role as food gatherers and producers and reveals how Native American land use patterns functioned as a form of cultural resistance Describing the professionalization of knowledge Knobloch concludes that both social and biological diversity have suffered as a result of agricultural progress *Circular* University of Tennessee,

In addition, an introduction to organic chemistry has been added to familiarize readers with organic herbicides. Also included are guidelines on weed control practices for specific crops or situations such as small grains, row crops, horticultural crops, lawns and turf, range land, brush and aquatic plant life.
