The Westminster Dictionary of New Testament and Early Christian Literature and Rhetoric David Edward Aune, 2003-01-01 The Westminster Dictionary of New Testament and Early Christian Literature and Rhetoric details the variety of literary and rhetorical forms found in the New Testament and in the literature of the early Christian church This authoritative reference source is a treasury for understanding the methods employed by New Testament and early Christian writers Aune's extensive study will be of immense value to scholars and all those interested in the ways literary and rhetorical forms were used and how they functioned in the early Christian world This unique and encyclopedic study will serve generations of scholars and students by illuminating the ways words shaped the consciousness of those who encountered Christian teachings *Tagalog Reference Grammar* Paul Schachter, Fe T. Otanes, 2023-11-15 *Koasati Grammar* Bel Abbey, 1991-01-01 An American Indian language belonging to the Muskogean linguistic family Koasati is spoken today by fewer than five hundred people living in southwestern Louisiana and on the Alabama Coushatta Indian Reservation in Texas Geoffrey D Kimball has collected material from the speakers of the larger Louisiana community to produce the first comprehensive description of Koasati The book opens with a brief history of the Koasati The chapters that follow describe Koasati phonology verb conjugation classes and inflectional morphology verb derivation noun inflectional and derivational morphology grammatical particles and syntax and semantics A discussion of Koasati speech styles illustrated with texts concludes the book Because examples of grammatical construction are drawn from native speakers in naturally occurring discourse they authoritatively document aspects of a language that is little known **Publications** Philippines. Division of Ethnology, 1905 **Latin for the New Millennium: Level 2: student text** Milena Minkova, Terence Tunberg, 2009-10-15 Latin for the New Millennium Levels 1 and 2 is a complete introductory course to the Latin language suitable for both high school and college students consisting of two volumes each accompanied by a teacher's manual and students workbooks The strategy employed for teaching and learning incorporates the best of both the reading approach and the more abstract grammatical method The choice of vocabulary in each chapter reflects ancient authors commonly studied for the AP Latin examinations There are exercises designed for oral use as well as a substantial core of more conventional exercises in each chapter The readings pictures and supplementary inserts on cultural information illuminate Roman life civilization Roman history and mythology as well as the continuing use of Latin after antiquity and its vigorous literary tradition in such periods as the Middle Ages and Renaissance Each chapter also includes derivatives the influence of Latin vocabulary on English and selected proverbs or common Latin sayings Latin for the New Millennium Level 3 builds on the strong foundation of Levels 1 and 2 and provides students an in depth experience of Caesar Catullus Cicero Horace Ovid and Vergil as well as of the Renaissance writer Erasmus This text provides students an introduction to unadapted Latin literature and builds their literary analysis skills adapted from publisher website Barayin Morphosyntax Joseph Lovestrand, 2022

This volume offers a Lexical Functional Grammar LFG analysis of the morphosyntax of Barayin a Chadic language spoken by about 6000 people in the Guera region of Chad The core chapters of the book draw on rich empirical data to provide analyses of the basic clause noun phrases verb phrases and serial verb constructions The version of LFG adopted here includes two recent innovations the first is minimal c structure which results in simpler phrase structure representations the second is the assumption that glue semantics accounts for argument selection rejecting the need for a level of a structure or for Completeness and Coherence in f structure Argument sharing in serial verb constructions can thus be modeled in a connected s structure This method of modeling semantic composition in complex predicates is extended to directional and associated motion complex predicates in Choctaw and Wambaya removing the need to appeal to a special mechanism to unite semantic forms in such constructions

Definiteness Christopher Lyons, 1999-03-13 This 1999 textbook investigates definiteness both from a comparative and a theoretical point of view showing how languages express definiteness and what definiteness is It surveys a large number of languages to discover the range of variation in relation to definiteness and related grammatical phenomena such as demonstratives possessives and personal pronouns It outlines work done on the nature of definiteness in semantics pragmatics and syntax and develops an account on which definiteness is a grammatical category represented in syntax as a functional head the widely discussed D Consideration is also given to the origins and evolution of definite articles in the light of the comparative and theoretical findings Among the claims advanced are that definiteness does not occur in all languages though the pragmatic concept which it grammaticalizes probably does

Visible Variation Pamela M. Perniss, Roland Pfau, Markus Steinbach, 2008-09-25 It has been argued that properties of the visual gestural modality impose a homogenizing effect on sign languages leading to less structural variation in sign language structure as compared to spoken language structure However until recently research on sign languages was limited to a number of Western sign languages Before we can truly answer the question of whether modality effects do indeed cause less structural variation it is necessary to investigate the similarities and differences that exist between sign languages in more detail and especially to include in this investigation less studied sign languages The current research climate is testimony to a surge of interest in the study of a geographically more diverse range of sign languages The volume reflects that climate and brings together work by scholars engaging in comparative sign linguistics research The 11 articles discuss data from many different signed and spoken languages and cover a wide range of topics from different areas of grammar including phonology word pictures morphology pronouns negation and auxiliaries syntax word order interrogative clauses auxiliaries negation and referential shift and pragmatics modal meaning and referential shift In addition to this the contributions address psycholinguistic issues aspects of language change and issues concerning data collection in sign languages thereby providing methodological guidelines for further research Although some papers use a specific theoretical framework for analyzing the data the volume clearly focuses on empirical and descriptive aspects of sign language variation

Language in the Americas

Joseph H. Greenberg, 1987-06-01 This book is concerned primarily with the evidence for the validity of a genetic unit Amerind embracing the vast majority of New World languages The only languages excluded are those belonging to the Na Dene and Eskimo Aleut families It examines the now widely held view that Haida the most distant language genetically is not to be included in Na Dene It confined itself to Sapir's data although the evidence could have been buttressed considerably by the use of more recent materials What survives is a body of evidence superior to that which could be adduced under similar restrictions for the affinity of Albanian Celtic and Armenian all three universally recognized as valid members of the Indo European family of languages A considerable number of historical hypotheses emerge from the present and the forthcoming volumes Of these the most fundamental bears on the question of the peopling of the Americas If the results presented in this volume and in the companion volume on Eurasiatic are valid the classification of the world's languages based on genetic criteria undergoes considerable simplification Cognitive and Communicative Approaches to Linguistic Analysis Ellen

Contini-Morava, Robert S. Kirsner, Betsy Rodríguez-Bachiller, 2004-12-23 This volume is the product of a Columbia School Linguistics Conference held at Rutgers University in October 1999 where the plenary speaker was Ronald W Langacker a founder of Cognitive Linguistics The goal of the book is to promote two kinds of dialogue First dialogue between Cognitive Grammar and the particular sign based approach to language known as the Columbia School While they share certain basic assumptions the maximalist CG and the minimalist CS differ both theoretically and methodologically Given that philosophers from Mill to Kuhn to Feyerabend have stressed the importance to any discipline of dialogue between opposing views the dialogue begun here cannot fail to bear fruit The second kind of dialogue is that among several sign based approaches themselves and also between them and two competitors grammaticalization theory and generic functionalism Topics range from phonology to discourse Analytical problems are taken from a wide range of languages including English German Guarani Hebrew Hualapai Japanese Korean Macedonian Mandarin Polish Russian Serbian Spanish Urdu and Yaqui

Jackson,Jeffrey C. Marck,2019-03-31 Carolinian is a member of the Trukic subgroup of the Micronesian group of Oceanic languages This is the first English dictionary of the three Carolinian dialects spoken by descendants of voyagers who migrated from atolls in the Central Caroline Islands to Saipan in the Northern Mariana Islands This dictionary provides English definitions for almost 7 000 Carolinian entries and an English Carolinian finder list A special effort was made to include culturally important words particularly those related to sailing fishing cooking house building traditional religion and family structure With this work the compilers also establish an acceptable standard writing system with which to record the Carolinian language Markedness and Language Change Viktor Elšik,Yaron Matras,2008-08-22 Markedness is a central notion in linguistic theory This book is the first to provide a comprehensive survey of markedness relations across various grammatical categories in a sample of closely related speech varieties It is based on a sample of over 100 dialects of Romani collected and processed via the Romani Morpho Syntax RMS Database a comparative grammatical outline in electronic form constructed by the authors between 2000 2004 Romani dialects provide an exciting sample of language change phenomena they are oral languages which have been separated and dispersed from some six centuries and are strongly shaped by the influence of diverse contact languages The book takes a typological approach to markedness viewing it as a hierarchy among values that is conditioned by conceptual and cognitive universals But it introduces a functional pragmatic notion of markedness as a grammaticalised strategy employed in order to prioritise information In what is referred to as dynamic such prioritisation is influenced by an interplay of factors the values within a category and the conceptual notions that they represent the grammatical structure onto which the category values are mapped and the kind of strategy that is applied in order to prioritise certain value Consequently the book contains a thorough survey of some 20 categories e g Person Number Gender and so on and their formal representation in various grammatical structures across the sample The various accepted criteria for markedness e g Complexity Differentiation Erosion and so on are examined systematically in relation to the values of each and every category for each relevant structure The outcome is a novel picture of how different markedness criteria may cluster for certain categories giving a concrete reality to the hitherto rather vague notion of markedness Borrowing and its relation to markedness is also examined offering new insights into the motivations behind contact induced change
