First Strike:

To Win a Nuclear War Michio Kaku, Afterword by Axelrod, Daniel Axelrod, 1987 To Win a Nuclear War records as fully as we are likely to find what has gone on in the minds of American leaders and nuclear strategists on this awesome subject during these fateful forty years It is an appalling story This book compels us to re think and re write the history of the Cold War and the arms race From the foreword by Ramsey Clark former Attorney General of the United States To Win a Nuclear War provides a startling glimpse into secret U S plans to initiate a nuclear war from 1945 to the present Based on recently declassified Top Secret documents obtained through the Freedom of Information Act this book meticulously traces how U S policy makers in over a dozen episodes have threatened to initiate a nuclear attack The book also documents the surprising reasons why the war plans were never carried out and discloses the deeper hidden meaning of the Star Wars program

Bulletin of the Atomic Scientists ,1985-01 **Thinking about America's Defense** Glenn A. Kent, 2008 Lieutenant General Glenn A Kent was a uniquely acute analyst and developer of American defense policy in the second half of the twentieth century His 33 year career in the Air Force was followed by more than 20 years as one of the leading analysts at RAND This volume is not a memoir in the normal sense but rather a summary of the dozens of national security issues in which Glenn was personally engaged over the course of his career These issues included creating the single integrated operational plan SIOP leading DoD s official assessment of strategic defenses in the 1960s developing and analyzing strategic nuclear arms control agreements helping to bring new weapon systems to life and many others Each vignette describes the analytical frameworks and where appropriate the mathematical formulas and charts that Glenn developed and applied to gain insights into the issue at hand The author also relates his roles in much of the bureaucratic pulling and hauling that occurred as issues were addressed within the government publisher s website **Bulletin of the Atomic Scientists** ,1985-01 *Novel Approaches to Colorectal Cancer* ,2021-06-18 Novel Approaches to Colorectal Cancer Volume 151 in the Advances in Cancer Research series is composed of 11 reviews covering state of the art research relating to the etiology diagnosis prevention and treatment of colorectal cancer The book s chapters were written by recognized experts in the field and include sections on molecular biomarkers in diagnosis and therapy the interplay of diet lifestyle and the microbiome early age onset disease mutational signature analysis challenges in early detection immunotherapy organoid technology the role of epigenetic alterations disparities in minority populations field carcinogenesis and cancer as an evolutionary process Each of these topics provides novel insights and concepts on various aspects of the nature of colorectal cancer offering new opportunities for the management of a major source of cancer incidence and mortality Provides information on the timely nature of the included topics which represent the most current concepts and approaches in cancer research Offers outstanding and original reviews on colorectal cancer research Provides the authority and expertise of the authors all of whom are highly recognized and conducting state of the art investigations in cancer with this release focusing on colorectal

cancer **National Security Issues** ,1986 **Formal Models of Crisis Bargaining** William Spaniel,2023-11-09 Over the last quarter century crisis bargaining has become the prevailing paradigm for the study of war This textbook presents a concise and approachable overview of the crisis bargaining literature surveying the canonical formal models in the bargaining approach to war It begins by considering different explanations for war then delves into two classes of explanation commitment problems and incomplete information This textbook is essential reading for advanced undergraduates graduates and researchers alike Each chapter delves into a specific part of the puzzle rigorously unravelling the twisted logic that causes wars to begin More than seventy illuminating figures illustrate the strategic reasoning outlined and more than 100 exercises of graded levels of difficulty help clarify readers own understanding of the issues Online resources include an instructor answer key and numerous engaging video lectures **A New Nuclear Century** Stephen J. Cimbala,James Scouras,2002-05-30 Cimbala and Scouras examine the issues related to the control of nuclear weapons in the early 21st century These issues are both technical and policy oriented science and values are commingled This means that arguments about nuclear strategy arms control and proliferation are apt to be contentious and confusing The authors seek to provide readers with a fuller more accurate understanding of the issues involved They begin by analyzing the crazy mathematics of nuclear arms races and arms control that preoccupied analysts and policymakers during the Cold War After examining stability modeling they argue for a more comprehensive definition of strategic stability and they relate this more inclusive concept to the current relationship between the United States and Russia one characterized by cooperation as well as competition They then use the concept of friction to analyze how the gap between theory and practice might influence nuclear force operations and arms control The problem of nuclear weapons spread or proliferation is then considered from the vantage point of both theory and policy They conclude with an analysis of whether the United States might get by in the 21st century with fewer legs of its strategic nuclear triplet than weapons based on land at sea and airborne A provocative analysis for arms control policymakers strategists and students scholars and other researchers involved with nuclear weapons issues **Concurrent Resolution on the Budget for Fiscal Year ...** United States. Congress. Senate. Committee on the Budget,1987 **Civil Defense** United States. Congress. Senate.  together an international group of distinguished scholars to provide a fresh assessment of China's strategic military
 capabilities doctrines and its political perceptions in light of rapidly advancing technologies an expanding and modernizing
 nuclear arsenal and increased great power competition with the United States Strategy in the Second Nuclear Age Toshi
 Yoshihara, James R. Holmes, 2012-10-22 A second nuclear age has begun in the post Cold War world Created by the expansion
 of nuclear arsenals and new proliferation in Asia it has changed the familiar nuclear geometry of the Cold War Increasing
 potency of nuclear arsenals in China India and Pakistan the nuclear breakout in North Korea and the potential for more
 states to cross the nuclear weapons threshold from Iran to Japan suggest that the second nuclear age of many competing
 nuclear powers has the potential to be even less stable than the first Strategy in the Second Nuclear Age assembles a group
 of distinguished scholars to grapple with the matter of how the United States its allies and its friends must size up the
 strategies doctrines and force structures currently taking shape if they are to design responses that reinforce deterrence
 amid vastly more complex strategic circumstances By focusing sharply on strategy that is on how states use doomsday
 weaponry for political gain the book distinguishes itself from familiar net assessments emphasizing quantifiable factors like
 hardware technical characteristics and manpower While the emphasis varies from chapter to chapter contributors pay
 special heed to the logistical technological and social dimensions of strategy alongside the specifics of force structure and
 operations They never lose sight of the human factor the pivotal factor in diplomacy strategy and war **International
