First Century Of The Nuclear Age Can We Survive It:

The First Century of the Nuclear Age Robert S. McNamara, 1988 Britain, NATO and Nuclear Weapons Ken Booth, John Baylis, 1989-01-13 An examination of nuclear arms control and defence containing papers that present opposing sides of the debate Nuclear deterrence Britain's defence budget the state of Anglo American relations NATO strategies and Mr Gorbachev's security arrangements in Europe proposals are discussed *Repeat Performance: The Nuclear Age* Barbara Sirola, 2012 *After the end* David L. Pike, 2024-04-09 After the End argues that the cultural imaginaries and practices of the Cold War continue to deeply shape the present in profound but largely unnoticed ways across the global North and in the global South The argument draws examples from literature and literary criticism film music the historical and social scientific record and past and present physical sites to consider the bunker as a material form an image and as a fantasy that took shape in the global North in the 1960s and that spread globally into the twenty first century After the End reminds us not only that most of the world's peoples have lived with or died from apocalyptic conditions for centuries but that the Cold War imaginaries that grew from and fed those conditions continue to survive as well **The Consequences of Nuclear Proliferation** Devin T. Hagerty, 1998 Hagerty analyzes how India and Pakistan interacted in diplomatic and military crises before their 1998 nuclear tests He presents detailed studies of the January 1987 Indo Pakistani crisis precipitated by India's Brasstacks military exercises and the 1990 confrontation over Kashmir Hagerty concludes that relations between India and Pakistan in recent years support the argument that nuclear proliferation does not necessarily destabilize international relations and may even reduce the risk of war **Soviet Life**, 1986 Cold War Statesmen Confront the Bomb John Lewis Gaddis, 1999 This text uses biographical techniques to test the question did the advent of the nuclear bomb prevent World War III It examines the careers of ten Cold War statesmen and asks whether they viewed war and its acceptability differently after the advent of the bomb **Cold War Space and Culture in the 1960s and 1980s** David L. Pike, 2021-11-25 Cold War Space and Culture in the 1960s and 1980s The Bunkered Decades studies the two periods in which Americans were actively encouraged to excavate their own backyards while governments the world over exhausted their budgets on fortified super shelters and megaton bombs The dreams and nightmares inspired by the spectre of nuclear destruction were expressed in images and forms from comics movies and pulp paperbacks to policy documents protest movements and survivalist tracts Illustrated with photographs artwork and movie and television stills of real and imagined fallout shelters and other bunker fantasies award winning author David L Pike's continues his decades long exploration of the meanings of modern undergrounds Ranging widely across disciplines this volume finds unexpected connections between cultural icons and forgotten texts plumbs the bunker's stratifications of class region race and gender and traces the often unrecognized through lines leading from the 1960s and the less studied 1980s into the present Although the Cold War ended over 30 years ago its legacy looms large in anxieties around security borders and all manners of imminent apocalypse Treating the bunker

in its concrete presence and in its flightiest fantasies while attending equally to its uniquely American desires and pathologies and to its global impact Cold War Space and Culture in the 1960s and 1980s proposes a new way to understand the outsized afterlife of the bunkered decades A Magna Carta for the Nuclear Age David Krieger,1995 **Makers of**

Authoritative and convincing New York Times Book Review The classic reference on the theory and practice of war The essays in this volume analyze war its strategic characteristics and its political and social functions over the past five centuries The diversity of its themes and the broad perspectives applied to them make the book a work of general history as much as a history of the theory and practice of war from the Renaissance to the present Makers of Modern Strategy from Machiavelli to the Nuclear Age takes the first part of its title from an earlier collection of essays that became a classic of historical scholarship Three essays are repinted from the earlier book while four others have been extensively revised The rest twenty two essays are new The subjects addressed range from major theorists and political and military leaders to impersonal forces Machiavelli Clausewitz and Marx and Engels are discussed as are Napoleon Churchill and Mao Other essays trace the interaction of theory and experience over generations the evolution of American strategy for instance or the emergence of revolutionary war in the modern world Still others analyze the strategy of particular conflicts the First and Second World Wars or the relationship between technology policy and war in the nuclear age Whatever its theme each essay places the specifics of military thought and action in their political social and economic environment Together the contributors have produced a book that reinterprets and illuminates war one of the most powerful forces in history and one that cannot be controlled in the future without an understanding of its past Deterrence in the Third Nuclear Age Pierre

Vandier,2025-03-07 This book explains the evolution of nuclear doctrines along the 20th century and the beginning of the 21st in an evolving geopolitical context particularly the potential use of nuclear weapons to blackmail or aggressively sanctuarize territorial gains as it has been demonstrated by Russia in Ukraine After five decades of the Cold War known as the first nuclear age the world attempted to eliminate nuclear weapons through treaties and disarmament initiatives This marked the second nuclear age where peace efforts fostered hope that these weapons might become obsolete However during the first decade of the 21st century cracks began to appear in this ambition notably with North Korea s withdrawal from the Nuclear Non Proliferation Treaty Today the nuclear factor dominates the geopolitical landscape in a new and alarming way New players have emerged some of whom do not adhere to the rules established during the Cold War Russia for example resorted to nuclear blackmail against the West in the early days of its invasion of Ukraine This marks the onset of a third nuclear age characterized by greater complexity increased volatility and the presence of new actors who are dangerously navigating their learning curves *The New Republic* ,1962 **The Geopolitics of South Asia: From Early**

Empires to the Nuclear Age Graham Chapman,2018-10-22 Anyone who is planning on carrying out research in South Asia

or indeed anyone who simply wishes to understand more about this cultural heartland should read this book It shows how geological movements moulded the land of this unique cradle and how they still impact on it Discussions are woven around the three major forces of integration These are identitive forces bonds of language ethnicity religion or ideology utilitarian forces bonds of common material interest and coercion the institutional use or threat of physical violence By studying these forces Professor Chapman shows how the organization of territory has been central to the region s historic cultural linguistic and economic development In addition to the material on the Northwest frontier Afghanistan and Kashmir which was added for the second edition the Northeastern borderlands are also now examined in this fully revised third edition The current geopolitical state of the region is completely updated and greatly enhanced *School Support Act of 1959* United States.

After the Apocalypse Srećko Horvat,2021-02-11 In this post apocalyptic rollercoaster ride philosopher Sre ko Horvat invites us to explore the Apocalypse in terms of revelation rather than as the end itself He argues that the only way to prevent the end i e extinction is to engage in a close reading of various interconnected threats such as climate crisis the nuclear age and the ongoing pandemic Drawing on the work of neglected philosopher G nther Anders this book outlines a philosophical approach to deal with what Horvat borrowing a term from climate science and giving it a theological twist calls eschatological tipping points These are no longer just the nuclear age or climate crisis but their collision conjoined with various other major threats not only pandemics but also the viruses of capitalism and fascism In his investigation of the future of places such as Chernobyl the Mediterranean and the Marshall Islands as well as many others affected by COVID 19 Horvat contends that the revelation appears simple and unprecedented the alternatives are no longer socialism or barbarism

our only alternatives today are a radical reinvention of the world or mass extinction After the Apocalypse is an urgent call not only to mourn tomorrow's dead today but to struggle for our future while we can *Apocalyptic Fever* Richard G.

Kyle, 2012-08-01 How will the world end Doomsday ideas in Western history have been both persistent and adaptable peaking at various times including in modern America Public opinion polls indicate that a substantial number of Americans look for the return of Christ or some catastrophic event The views expressed in these polls have been reinforced by the market process Whether through purchasing paperbacks or watching television programs millions of Americans have expressed an interest in end time events Americans have a tremendous appetite for prophecy more than nearly any other people in the modern world Why do Americans love doomsday In *Apocalyptic Fever* Richard Kyle attempts to answer this question showing how dispensational premillennialism has been the driving force behind doomsday ideas Yet while several chapters are devoted to this topic this book covers much more It surveys end time views in modern America from a wide range of perspectives dispensationalism Catholicism science fringe religions the occult fiction the year 2000 Islam politics the Mayan calendar and more
