First Man Into Space:

The First Man In Space Alistair David Todd, 2017-10-25 The First Man In Space is a dramatic poem taking the symbol of the astronaut to meditate on humanity's ability to develop and control their environment right to the very limits of the skies. Written in four parts it looks at the life of the unnamed astronaut in his childhood, his training, his experience in space and finally him growing old back on Earth. Reflecting on the philosophic as well as the scientific and also on the isolation it takes to achieve such a feat. The First Man In Space takes you to outer and inner reaches of the human will and human capability to overcome.

First American Into Space Robert Silverberg, 2008-04-01 Here is the spine tingling true story of that first American blast into the realm of the stars of the men who underwent rigorous training for that epic mission and of the one man who made the safe journey. This is the factual account of the history of rocketry, its triumphs and its failures, our shame in the neglect of it and our pride in its later accomplishments. Here too is a glimpse into the future as only science fiction writer Robert Silverberg could foresee: orbiting space stations, a man on the moon and more.

The Cold War, the Space Race, and the Law of Outer Space Albert K. Lai, 2021-07-26 The Cold War, the Space Race and the Law of Outer Space tells the story of one of the United Nations' most enduring and least known achievements: the adoption of five multilateral treaties that compose the international law of outer space. The story begins in 1957 during the International Geophysical Year, the largest ever cooperative scientific endeavor that resulted in the launch of Sputnik. Although satellites were first launched under the auspices of peaceful scientific cooperation, the potentially world-ending implications of satellites and the rockets that carried them was obvious to all. By the 1960s, the world faced the prospect of nuclear testing in outer space, the placement of weapons of mass destruction in orbit and the militarization of the moon. This book tells the story of how the United Nations tried to seize the promise of peace through scientific cooperation and to ward off the potential for war in the Space Age through the adoption of the Outer Space Treaty, the Rescue and Return Agreement, the Liability Convention, the Registration Convention and the Moon Agreement. Interdisciplinary in approach, the book will be of interest to scholars in law, history and other fields who are interested in the Cold War, the Space Race and outer space law.

Exploring Space Rodney P. Carlisle, 2005 Offers coverage of human explorations into space from 19th century fantasy to 20th century achievement and the future of space exploration in the 21st century, giving information about the current state of exploration in the final frontier.

[Meta-Geopolitics of Outer Space](#) N. Al-Rodhan, 2012-05-11 Al Rodhan sheds new light on the debate about the geopolitics of outer space, going beyond applying traditional International Relations approaches to space power and security by introducing a multidimensional spatial framework. The meta geopolitics framework includes space and expands classical power considerations to cover seven state capacities.

Vampires from Another World Simon Bacon, 2021-06-04 This book begins at the intersection of Dracula and War of the Worlds both published in 1897 London and describes the settings of Transylvania Mars and London as worlds linked by the body of the vampire It explores the vampire from another world in all its various forms as a manifestation of not just our anxieties around alien others but also our alien selves Unsurprisingly many of the tropes these novels generated and particularly the themes they have in common have been used and adapted by vampire narratives that followed From Nosferatu to Alien Interstellar Stranger Things and many others this book examines how these narratives have evolved since the end of the nineteenth century Bringing together texts and films from across the 19th 20th and 21st centuries from the far reaches of outer space and the distant future it concludes that the unexpected and the unknown are not always to be feared and that humanity does have the power to write its own future

Rockets Into Space Frank H. Winter, 1990 Since ancient times men and women have dreamed of soaring among the stars but only in this century has that dream been realized In Rockets into Space Frank Winter tells the fascinating story of the modern launch vehicle from the mythological musings of the Babylonians and Greeks to the present day reality of manned and unmanned space flight In concise yet comprehensive chapters dense with anecdotal detail Winter tracks the theoretical formulations and technological breakthroughs that have charted the evolution of rocket propulsion and vehicle design He pays particular attention to the remarkable contributions of pioneers Konstantin Tsiolkovsky Robert Goddard Hermann Oberth Eugen Senger and Sergei Korolev whose genius and vision paved the way for later innovation He describes the clandestine development of the V 2 rocket in Germany under the technical leadership of Wernher von Braun and its dramatic impact on postwar rocket research and satellite development in the United States and the Soviet Union He also chronicles the complex events of the last three decades which have produced ever more sophisticated rockets capable of launching larger payloads from weapons to weather and communications satellites Finally he surveys exotic propulsion systems nuclear electric solar photon laser that lie on the frontiers of science today but that will shape the spaceflight and space policy decisions of tomorrow Rockets into Space is an authoritative entertaining guidebook for all who are interested in the history of space travel

Societies in Space Gary Westfahl, 2024-08-29 Science fiction films and television programs about space travel have undergone a significant transformation since their inception In contrast to the early depictions of small spaceship crews on exploratory missions recent film and television portrayals depict much larger societies in space as well as the obstacles that arise with

them This collection of essays examines many aspects of making space travel films from the process of screenwriting to the impact of Greek myth on modern film with illuminating commentary on contemporary problems including class distinction racism and sexism Contributors to this volume including several extensively published scholars and science fiction writers analyze a wide variety of relevant science fiction films and television programs ranging from Star Trek Silent Running the Alien films and Japanese anime to more recent works like Battlestar Galactica Avatar Elysium The Martian Passengers and Ad Astra

The Politics and Perils of Space Exploration Linda Dawson, 2020-11-27 This book examines the U S space program s triumphs and failures in order to assess what constitutes a successful space policy Using NASA and the space industry s complex history as a guide it draws global lessons about space missions and the trends we can expect from different nations in the next decade and beyond Space exploration has become increasingly dependent on cooperation between countries as well as the involvement of private enterprise This book thus addresses issues such as Given their tenuous history can rival countries work together Can private enterprise fill NASA s shoes and provide the same expertise and safety standards Written by a former NASA Aerodynamics Officer at Houston Mission Control working on the Space Shuttle program the second edition of this book provides updated information on U S space policy including the new strategy to return to the Moon prior to traveling to Mars Additionally it takes a look at the formation of the Space Force as a military unit as well as the latest developments in private industry Overall it is a thought provoking resource for both space industry professionals and space enthusiasts
