Creation JOHN. UMANA PHD, John Umana, 2005 This book tells the story of the creation of the Universe the creation of our solar system and the formation and development of plant and animal life on Earth prehuman hominids and the eventual creation of our species Homo sapiens 200 000 years ago in East Africa It offers analysis of the evidence as to the crop circles and their origins and as to extraterrestrial intelligent life in the cosmos Creation reconciles creationism with science and the theory of evolution Human beings are not descended from modern apes but prehuman bipedal hominids were evolved by God from a common ancestor 7 million years ago Although Darwin s fundamental thesis that all life shares common ancestors is correct it does not follow that species originate from natural selection The Universe really is 13 7 billion years old and commenced with the Big Bang The Big Bang expansion is still ongoing and galaxies continue to rush away from each other Earth really is 4 54 billion years old But what caused the Big Bang And what caused complex life to develop on Earth but nowhere else in this sun system Why have the Martian Rovers uncovered no fossils or even a shellfish on Mars although oceans once covered that planet s surface Why are three quarters of the Earth s surface covered with water

*The body size of mammals, determining by amount of hemoglobin's oxygen affinity*, Ramin Amirmardfar, 2019-08-31 Mammals are found in different sizes in nature Most of scientists believe that environmental circumstances and mammals living style determine their body size So scientists haven't been looking forward to find a physiological factor for this size difference among mammals But my research on animals and plants size has specified that there is a direct relationship between animals plants size and blood fluid circulatory system The oxygen molecules enter into the blood from lungs and stick to the red cells After moving a distance they reach the tissues and get separated from the red cells and then the cell uses it What the oxygen molecules combine with hemoglobin and stick to red cells What causes the oxygen molecules to get separated from the hemoglobin in tissues And the most important point is that what causes the oxygen molecules to get separated from the red cells sooner or later The transfer of oxygen to the blood is done by circulation So the reason is the oxygen's thickness or pressure **Biophysics Of Consciousness: A Foundational Approach** Roman R Poznanski, Jack A Tuszyński, Todd E Feinberg, 2016-08-25 The problem of how the brain produces consciousness subjectivity and something it is like to be remains one of the greatest challenges to a complete science of the natural world While various scientists and

philosophers approach the problem from their own unique perspectives and in the terms of their own respective fields  
Biophysics of Consciousness A Foundational Approach attempts a consilience across disparate disciplines to explain how it is possible that an objective brain produces subjective experience This volume unites the cr me de la cr me of physicists neuroscientists and psychiatrists in the attempt to understand consciousness through a foundational approach encompassing ontological evolutionary neurobiological and Freudian interpretations with the focus on conscious phenomena occurring in the brain By integrating the perspectives of these diverse disciplines with the latest research and theories on the biophysics of the brain the book tries to explain how consciousness can be an adaptive and causal element in the natural world
