

Was ist aber von dem Unbedingten keine positive äußere Möglichkeit. Es müßte also wenigstens eine negative Darstellung in der äußeren Erfahrung versucht werden.

**F. W. J. Schelling** nun haben wir bestimmt durch dasjenige, was wir *Translated and with an Introduction by Keith R. Peterson* im Raume. Es müßte also in der Erfahrung vorkommen, daß, obgleich selbst nicht im Raume, doch Präsenz im Raume wäre.

1) Es soll selbst nicht im Raume seyn. — Was ist das? auf dasselbe kann auch durch physische Kraft gewirkt werden, mechanisch oder chemisch zerstörbar. Ein Princip also, selbst im Raume ist, müßte schlechterdings weder mechanisch noch überwältigt werden können. Es findet sich aber in der Natur nichts der Art vor, außer den ursprünglichen Qualitäten aller Qualitäten.

**First Outline of a System of the Philosophy of Nature** ist ein Buch, das die Natur der Materie im Unendlichen zeigt, doch jeden noch so kleinen Theil der Materie als ein Ganzes, kurz dasjenige, was die Theilbarkeit der Materie möglich macht. Wäre die Materie nicht unendlich, so müßte sie in Theile zerfallen, und jeder Theil müßte auf einen Theil kommen, und nicht für einen Theil jener Materie, d. h. nicht mehr als ein Ganzes erkennen könnte. Da also die Theilbarkeit der Materie ins Unendliche geht, so muß jede Materie, so weit getheilt wird, ins Unendliche homogen bleiben. Die Materie ist also ein Princip alles Seyns im Raume oder aller Raumerfüllung, mechanisch unendlich theilbar.

## **First Outline Of A System Of The Philosophy Of Nature:**

**First Outline of a System of the Philosophy of Nature** Friedrich Wilhelm Joseph von Schelling, 2004-02-26 Appearing here in English for the first time this is F W J Schelling's vital document of the attempts of German idealism and Romanticism to recover a deeper relationship between humanity and nature and to overcome the separation between mind and matter induced by the modern reductionist program Written in 1799 and building upon his earlier work First Outline of a System of the Philosophy of Nature provides the most inclusive exposition of Schelling's philosophy of the natural world He presents a startlingly contemporary model of an expanding and contracting universe a unified theory of electricity gravity magnetism and chemical forces and perhaps most importantly a conception of nature as a living and organic whole [Schelling, Hegel, and the Philosophy of Nature](#) Benjamin Berger, 2023-11-30 This book develops an original interpretation of the relationship between F W J Schelling and G W F Hegel It argues that the difference between these philosophers should be understood in light of their shared commitment to the philosophy of nature and the idea that spirit or humanity emerges from the natural world The author makes a case for the contemporary relevance of German idealist philosophy of nature by walking the reader through its major themes motivations and arguments Along the way Schelling and Hegel are shown to develop key insights about the structure of reality and the dependence of living things and human beings upon inorganic natural processes In elucidating the details of Schelling's and Hegel's respective philosophies of nature the book challenges some of our most basic assumptions about the scope of philosophical inquiry and the relationship between matter life and human existence Schelling Hegel and the Philosophy of Nature will appeal to scholars and advanced students working on German idealism as well as those interested in contemporary philosophies of nature and the topic of emergence [Freedom and Nature in Schelling's Philosophy of Art](#) Devin Zane Shaw, 2010-12-09 Schelling is often thought to be a protean thinker whose work is difficult to approach or interpret Devin Zane Shaw shows that the philosophy of art is the guiding thread to understanding Schelling's philosophical development from his early works in 1795 1796 through his theological turn in 1809 1810 Schelling's philosophy of art is the keystone of the system it unifies his idea of freedom and his philosophy of nature Schelling's idea of freedom is developed through a critique of the formalism of Kant's and Fichte's practical philosophies and his nature philosophy is developed to show how subjectivity and objectivity emerge from a common source in nature The philosophy of art plays a dual role in the system First Schelling argues that artistic activity produces through the artwork a sensible realization of the ideas of philosophy Second he argues that artistic production creates the possibility of a new mythology that can overcome the socio political divisions that structure the relationships between individuals and society Shaw's careful analysis shows how art for Schelling is the highest expression of human freedom [The Unconstructable Earth](#) Frédéric Neyrat, 2018-10-16 Winner Grand Prize French Voices Award for Excellence in Publication and Translation The Space Age is over Not at all A new planet has appeared Earth In the age of the Anthropocene the Earth is a post natural

planet that can be remade at will controlled and managed thanks to the prowess of geoengineering This new imaginary is also accompanied by a new kind of power geopower that takes the entire Earth in its social biological and geophysical dimensions as an object of knowledge intervention and governmentality In short our rising awareness that we have destroyed our planet has simultaneously provided us not with remorse or resolve but with a new fantasy that the Anthropocene delivers an opportunity to remake our terrestrial environment thanks to the power of technology Such is the position we find ourselves in when proposals for reengineering the earth s ecosystems and geosystems are taken as the only politically feasible answer to ecological catastrophe Yet far from being merely the fruit of geo capitalism this new grand narrative of geopower has also been activated by theorists of the constructivist turn ecomodernist postenvironmentalist accelerationist who have likewise called into question the great divide between nature and culture With the collapse of this divide a cyborg hybrid flexible nature has been built an impoverished nature that does not exist without being performed by technologies that proliferate within the space of human needs and capitalist imperatives Underneath this performative vision resides a hidden anaturalism denying all otherness to nature and the Earth no longer by externalizing it as a thing to be dominated but by radically internalizing it as something to be digested Constructivist ecology thus finds itself in no position to confront the geoconstructivist project with its claim that there is no nature and its aim to replace Earth with Earth 2 0 Against both positions Neyrat stakes out the importance of the unconstructable Earth Against the fusional myth of technology over nature but without returning to the division between nature and culture he proposes an ecology of separation that acknowledges the wild subtractive capacity of nature Against the capitalist technocratic delusion of earth as a constructible object but equally against an organicism marked by unacknowledged traces of racism and sexism Neyrat shows what it means to appreciate Earth as an unsubstitutable becoming a trajet that cannot be replicated in a laboratory Underway for billions of years withdrawing into the most distant past and the most inaccessible future Earth escapes the hubris of all who would remake and master it This remarkable book which will be of interest to those across the humanities natural sciences and social sciences from theorists to shapers of policy recasts the earth as a singular trajectory that invites humans to turn political ecology into a geopolitics

**Hegel and Heidegger on Nature and World** Raoni Padui, 2023-04-24 The philosophical concepts of nature and world have overlapped one another in a myriad of ways throughout the history of Western philosophy Nevertheless modernity has constructed a decisive philosophical dichotomy between the domain of nature and the domain of the human world as a response to the revolutions of the natural sciences in the seventeenth century In Hegel and Heidegger on Nature and World Raoni Padui investigates the responses to this distinction between nature and world in the works of Hegel and Heidegger Both philosophers attempt to heal the wounds of modernity and to reconcile the human historical world to the domain of nature and both refuse to accept the dichotomy between nature and world seeking to offer a way in which humans can inhabit a meaningful world without being alienated from the nature that conditions it However the difference in

their modes of reconciliation illustrates the options opened up by modern philosophy either a Hegelian path of self determination that traces our historical emancipation from the natural domain or a Heideggerian rethinking of nature that seeks a renewed proximity to the domain of things

**Schelling's Political Thought** Velimir Stojkovski, 2022-11-17 In the first study to examine F W J Schelling's political thought Velimir Stojkovski not only unearths a neglected dimension of the influential thinker's philosophy but further shows what it can teach us about our ethical and political responsibilities today Unlike Hegel or Fichte Schelling never wrote a political treatise Yet by reconstructing the portions of such works as *The New Deductions of Natural Right* that deal explicitly with the political and by thematically rethinking parts of his writings that have a clear repercussion on politics in particular those on nature freedom and religion this book reveals the centrality of politics to his oeuvre Revisiting his corpus in this way Stojkovski uncovers a number of ways we can learn from Schelling and his reception He examines how Schelling's views on nature can clarify our moral and political obligations to the non human world and further demonstrates how the separation of ontology as first philosophy from the ethico political has resulted in a fragmented view of the status of the political subject and thus the body politic Forcefully renouncing this fragmentation Stojkovski explores how the same divide has contributed to the ongoing political turmoil in Europe and America Combining an exploration of German Idealism with contemporary concerns this is an essential study that will introduce readers to a new Schelling a political thinker for the 21st century

**Nature, Speculation and the Return to Schelling** Tyler

Tritten, Daniel Whistler, 2018-12-07 Two decades ago Schelling first resurfaced in i ek's *Indivisible Remainder* and the same argumentative move of redeploying Schellingian themes for contemporary ends has continued to play a significant role in critical theory since Markus Gabriel Iain Hamilton Grant Jean Luc Nancy All the articles in this volume attempt to take seriously the idea of Schelling as a contemporary philosopher Schelling is read in dialogue with key figures in the canon of European philosophy and critical theory Alain Badiou milie du Ch telet Gilles Deleuze Paul de Man Quentin Meillassoux Maurice Merleau Ponty Gilbert Simondon Slavoj i ek as well as in light of recent trends in analytic philosophy Brandomian pragmatism powers based metaphysics and semantic naturalism and such readings are not meant merely to highlight Schellingian influences or resonances in contemporary thinking but rather to challenge and interrogate current orthodoxies by insisting upon the contemporaneity of Schellingian speculation That is the aim is both to evaluate and constructively build upon this repeated return to Schelling to probe to diagnose and to experiment on the latent Schellingianisms of the present and the future This book was originally published as a special issue of *Angelaki Journal of the Theoretical Humanities*

**Schelling-Eschenmayer Controversy, 1801** Berger Benjamin Berger, 2020-03-18 During the first decade of the 19th century F W J Schelling was involved in 3 distinct controversies with one of his most perceptive and provocative critics A C A Eschenmayer The first of these controversies took place in 1801 and focused on the philosophy of nature Now Berger and Whistler provide a ground breaking account of this moment in the history of philosophy They argue that key Schellingian

concepts such as identity potency and abstraction were first forged in his early debate with Eschenmayer Through a series of translations and commentaries they show that the 1801 controversy is an essential resource for understanding Schelling's thought the philosophy of nature and the origins of absolute idealism      Schelling and Spinoza Benjamin Norris,2022-08-01 Schelling and Spinoza reconstructs Schelling's reading of Spinoza's metaphysics to better understand the roles realism and idealism play in Schelling's work Schelling initially praises Spinoza's monism but comes to criticize the lifelessness produced by Spinoza's dualistic account of the relation between thought and existence By turning to Schelling's notion of the Absolute author Benjamin Norris presents a novel reading of Schelling's early and middle philosophical endeavors as a kind of ideal realism dependent on the hyphen that marks both the identity and the non identity of realism and idealism Through close analysis of Schelling's work he convincingly argues that any contemporary return to Schelling must grapple with his critique of Spinoza This critique calls into question the categories of immanence and transcendence that orient the current debate surrounding realism antirealism and idealism Schelling and Spinoza is an important contribution to our understanding of both Schelling and Spinoza as well as the viability of the frightening claim that only one thing truly exists      **The Dark Ground of Spirit** S. J. McGrath,2013-02-28 Friedrich Wilhelm Joseph Schelling is widely regarded as one of the most difficult and influential of German philosophers In this book S J McGrath not only makes Schelling's ideas accessible to a general audience he uncovers the romantic philosopher's seminal role as the creator of a concept which shaped and defined late nineteenth and early twentieth century psychology the concept of the unconscious McGrath shows how the unconscious originally functioned in Schelling's philosophy as a bridge between nature and spirit Before Freud revised the concept to fit his psychopathology the unconscious was understood largely along Schellingian lines as primarily a source of creative power Schelling's life long effort to understand intuitive and non reflective forms of intelligence in nature humankind and the divine has been revitalised by Jungians as well as by archetypal and trans personal psychologists With the new interest in the unconscious today Schelling's ideas have never been more relevant The Dark Ground of Spirit will therefore be essential reading for those involved in psychoanalysis analytical psychology and philosophy as well as anyone with an interest in the history of ideas      Aesthetic Transcendentalism in Emerson, Peirce, and Nineteenth-Century American Landscape Painting Nicholas Guardiano,2016-12-21 Aesthetic Transcendentalism is a philosophy endorsing the qualitative and creative aspects of nature Theoretically it argues for a metaphysical dimension of nature that is aesthetically real pluralistic and prolific It directs our attention to the rich complexity of immediate experience the possibility of discovering new aesthetic features about the world and the transformative potential of art as an organic expression This book presents the philosophy in its relationship to its historical roots in the philosophic and artistic traditions of nineteenth century North America In this multidisciplinary study Nicholas L Guardiano brings together a philosophic and literary figure in Ralph Waldo Emerson the scientifically minded philosopher Charles S Peirce and the plastic arts in the form of American landscape painting Guardiano

evaluates this constellation of philosophers and artists in global perspective as it relates to other historical theories of metaphysics and aesthetics while simultaneously performing a cultural analysis that identifies an essential feature of the American mind Aesthetic Transcendentalism thus possesses abiding significance for our vital interactions with nature daily experiences and contemplations of great works of art Aesthetic Transcendentalism in Emerson Peirce and Nineteenth Century American Landscape Painting will be of interest to scholars of American philosophy and American art history especially specialists of Charles S Peirce Ralph Waldo Emerson and the Hudson River School painters It will also appeal to philosophers working on systematic metaphysical theories of nature

**Reality and Negation - Kant's Principle of Anticipations of Perception** Marco Giovanelli,2010-11-18 Kant in the Critique of pure reason only dedicates a few pages to the principle of Anticipations of Perception and only a few critical studies are outspokenly dedicated to this issue in recent critical literature But if one considers the history of post Kantian philosophy one can immediately perceive the great importance of the new definition of the relationship between reality and negation which Kant s principle proposes Critical philosophy is here radically opposed to the pre critical metaphysical tradition Reality no longer appears as absolutely positive being which excludes all negativity from itself and negation is not reduced to being a simple removal the mere absence of being Instead reality and negation behave as an equally positive something in respect to one another such that negation is itself a reality that is actively opposed to another reality Such a definition of the relation between reality and negation became indispensable for post Kantian Philosophy and represents a central aspect of Kantian inspired philosophy in respect to Leibnizian metaphysics The present work therefore departs from the hypothesis that the essential philosophical importance of the Anticipations of Perception can only be fully measured by exploring its impact in the Post Kantian debate

The Writing of Spirit Sarah M. Pourciau,2017-05-01 Contemporary thought has been profoundly shaped by the early twentieth century turn toward synchronic models of explanation which analyze phenomena as they appear at a single moment rather than diachronically as they develop through time But the relationship between time and system remains unexplained by the standard account of this shift Through a new history of systematic thinking across the humanities and sciences The Writing of Spirit argues that nineteenth century historicism wasn t simply replaced by a more modern synchronic perspective The structuralist revolution consisted rather in a turn toward time s absolutely minimal conditions and thus also toward a new theory of diachrony Pourciau arrives at this surprising and powerful conclusion through an analysis of language scientific theories over the course of two centuries associated with thinkers from Jacob Grimm and Richard Wagner to the Russian Futurists in domains as disparate as historical linguistics phonology acoustics opera theory philosophy poetics and psychology The result is a novel contribution to a pressing contemporary question namely what role history should play in the interpretation of the present

**Paul Tillich and Pentecostal Theology** Nimi Wariboko,Amos Yong,2015-11-17 Paul Tillich 1886 1965 is widely regarded as one of the most influential theologians of the 20th century By

bringing his thought together with the theology and practices of an important contemporary Christian movement Pentecostalism this volume provokes active productive critical and creative dialogue with a broad range of theological topics These essays stimulate robust conversation engage on common ground regarding the work of the Holy Spirit and offer significant insights into the universal concerns of Christian theology and Paul Tillich and his legacy *Philosophies of Nature After Schelling* Iain Hamilton Grant,2008-12-23 A lucid and crucial account of Schelling's major works in the philosophy of nature now available in paperback *Romanticism and Modernity* Thomas Pfau,Robert Mitchell,2014-07-16 Though traditionally defined as a relatively brief time period typically the half century of 1780-1830 the Romantic era constitutes a crucial indeed unique transitional phase in what has come to be called modernity for it was during these fifty years that myriad disciplinary aesthetic economic and political changes long in the making accelerated dramatically Due in part to the increased velocity of change though most of modernity's essential master tropes such as secularization instrumental reason individual rights economic self interest emancipation system institution nation empire utopia and life were also subjected to incisive critical and methodological reflection and revaluation The chapters in this collection argue that Romanticism's marked ambivalence and resistance to decisive conceptualization arises precisely from the fact that Romantic authors simultaneously extended the project of European modernity while offering Romantic concepts as means for a sustained critical reflection on that very process Focusing especially on the topics of form both literary and organic secularization and its political correlates utopia and apocalypse and the question of how one narrates the arrival of modernity this collection collectively emphasizes the importance of understanding modernity through the lens of Romanticism rather than simply understanding Romanticism as part of modernity This book was previously published as a special issue of *European Romantic Review* Interpreting Schelling Lara Ostaric,2014-09-29 The first volume on Schelling in English exploring the study of the history of philosophy and core systematic philosophical issues *Introduction to Metaphysics* Jean Grondin,2012 This history of metaphysics respects both the analytic and Continental schools while also transcending the theoretical limitations of each The book provides an overview restoring the value of metaphysics to contemporary audiences

Tillich: A Guide for the Perplexed Andrew O'Neill,2008-11-25 A new addition to the Guides for the Perplexed series this new book on Tillich will analyse clarify and connect the most central and difficult of Tillich's theological concepts

**Altering Nature** B. A. Lustig,B.A. Brody,Gerald P. McKenny,2008-07-15 B. Andrew Lustig Baruch A. Brody and Gerald P. McKenny Nearly every week the general public is treated to an announcement of another actual or potential breakthrough in biotechnology Headlines trumpet advances in assisted reproduction current or prospective experiments in cloning and developments in regenerative medicine stem cell technologies and tissue engineering Scientific and popular accounts explore the perils and the possibilities of enhancing human capacities by computer based biomolecular or mechanical means through advances in artificial intelligence genetics and nanotechnology Reports abound concerning ever more sophisticated genetic

techniques being introduced into ag culture and animal husbandry as well as efforts to enhance and protect biodiversity. Given the pace of such developments many insightful commentators have proclaimed the 21st century as the biotechnology century. Despite a significant literature on the morality of these particular advances in biotechnology deeper ethical analysis has often been lacking. Our preliminary review of that literature suggested that current discussions of normative issues in biotechnology have suffered from two major deficiencies. First the discussions have been too often piecemeal in character limited to after the fact analyses of particular issues that provoked the debate and unconnected to larger concepts and themes. Second a crucial missing element of those discussions has been the failure to reflect explicitly on the diverse disciplinary conceptions of nature and the natural that shape moral judgments about the legitimacy of specific forms of research and their applications.
