Green Worlds of Renaissance Venice Jodi Cranston, 2019-03-04 From celebrated gardens in private villas to the paintings and sculptures that adorned palace interiors Venetians in the sixteenth century conceived of their marine city as dotted with actual and imaginary green spaces This volume examines how and why this pastoral vision of Venice developed Drawing on a variety of primary sources ranging from visual art to literary texts performances and urban plans Jodi Cranston shows how Venetians lived the pastoral in urban Venice She describes how they created green spaces and enacted pastoral situations through poetic conversations and theatrical performances in lagoon gardens discusses the island utopias found invented and mapped in distant seas and explores the visual art that facilitated the experience of inhabiting verdant landscapes Though the greening of Venice was relatively short lived Cranston shows how the phenomenon had a lasting impact on how other cities including Paris and London developed their self images and how later writers and artists understood and adapted the pastoral mode Incorporating approaches from eco criticism and anthropology *Green Worlds of Renaissance Venice* greatly informs our understanding of the origins and development of the pastoral in art history and literature as well as the culture of sixteenth century Venice It will appeal to scholars and enthusiasts of sixteenth century history and culture the history of urban landscapes and Italian art

Sexual Ideology in the Works of Alan Moore Todd A. Comer, Joseph Michael Sommers, 2012-03-06 Alan Moore the idiosyncratic controversial and often shocking writer of such works as *Watchmen* *The League of Extraordinary Gentlemen* and *V for Vendetta* remains a benchmark for readers of comics and graphic novels This collection investigates the political social cultural and sexual ideologies that emerge from his seminal work *Lost Girls* and demonstrates how these ideologies relate to his larger body of work Framed by Moore's insistence upon deconstructing the myth of the superhero each essay attends to the form and content of Moore's comics under the rubric of his pervasive metaphor of the politics of sexuality the sexing of politics

Brave Green World Chris Forman, Claire Asher, 2021-03-30 How we can harness cutting edge biology and manufacturing to fight waste and pollution In Nature there is little chemical waste nearly every atom is a resource to be utilized by organisms ensuring that all the available matter remains in a perpetual cycle By contrast human systems of energy production and manufacturing are linear the end product is waste In Brave Green World Chris Forman and Claire Asher show what our linear systems can learn from the efficient circularity of ecosystems They offer an unblinkered yet realistic and positive vision of a future in which we can combine biology and manufacturing to solve our central problems of waste and pollution

Organizing the Green World: A Conceptual History of Botanical Classification Tod F. Stuessy, 2025-09-02 This book focuses on plant systematics and evolution with special interest on the history and philosophy of botanical classification Tracing the history of how humans have dealt with ordering the plant world is very much a glimpse of how human culture and science have progressed over the past 2000 years The objective in this book is to present ideas on plant classification beginning with classical Greek and Roman scholars through the Middle Ages into the Renaissance and finally to the modern 21st century Significant quantitative methods in classification have originated within the past 70 years which have never before been integrated with previous historical perspectives Most textbooks of systematic botany contain an historical introduction or perhaps a chapter on the history of classification but this book presents much greater detail on the classifications themselves and the cultural dimensions of the different time periods Biographical detail is also provided to give a better appreciation of the individual botanists who have contributed new ideas in the search for maximally predictive systems
