Origins of Sociological Theory Arris Dorsey &, 2018-11-30 The field of sociology itself and sociological theory by extension is relatively new Both date back to the 18th and 19th centuries The drastic social changes of that period such as industrialization urbanization and the rise of democratic states caused particularly Western thinkers to become aware of society The oldest sociological theories deal with broad historical processes relating to these changes Since then sociological theories have come to encompass most aspects of society including communities organizations and relationships The basic insight of sociology is that human behaviour is largely shaped by the groups to which people belong and by the social interaction that takes place within those groups The main focus of sociology is the group not the individual This compendium offers selections that present special propositions specific concepts or examples of substantive theorizing rather than discussions of integrated systems The present attempt is made to describe the different aspects of sociological theory generally being explained by the social scientists and it is hoped that it will be of great use for all those concerned with sociology

Transformation in the Writing K.H. Wolff, 2013-04-17 Kurt Wolff has written principally in two veins in English for the last fifty years 1 on sociology epistemology sociology of knowledge and the philosophy of sociology and 2 on the relevance of his formulation of surrender and catch to human experience particularly in its cognitive forms He published *Trying Sociology* in 1974 which contains his writings on sociology and *Surrender and Catch Experience and Inquiry Today* in 1976 which contains his writings on surrender and catch In more recent years he has published two books 0 *Loma Constituting a Self* 1977 1984 in 1989 and *Survival and Sociology Vindicating the Human Subject* 1991 Both of the more recent books add a third vein which is autobiographical and which moves back and forth between the previously established approaches in the earlier works *Transformation in the Writing* is the most ambitious to date because as Wolff points out in the beginning it contains writings that fall quite obviously into three classes autobiographical sociology of knowledge sociology poetry phenomenology hermeneutics critical theory and our time and its sociological analysis The task of this book is to illuminate the connections among these three classes Wolff has engaged in autobiographical writing his entire life though this approach to writing has only in recent years grown closer to his intellectual preoccupations with sociology and philosophy
