Villacañas-de-Castro,Betlem Soler Pardo,2014-06-30 This book is the result of understanding literature as a central part of children s education Fiction and nonfiction literary works constitute a source to open young minds and to help them understand how and why people themselves included live as they do or to question through critical lenses whether they could live otherwise By integrating philological cultural and pedagogical inquiries Thinking through Children s Literature in the Classroom approaches the use of literature as a crucial factor to motivate students not only to improve their literacy skills but also to develop their literary competence one that prepares them to produce independent and sensible interpretations of the world Of course the endeavor of forming young readers and fostering their ability to think begins primarily by having well read teachers who are enthusiastic about teaching and secondly by having students who are willing to learn To encourage and sustain them through the critical turns of their own thinking processes educators must surely display a sound pedagogic knowledge apart from deep literary expertise *Handbook of Individual Differences in Reading* Peter Afflerbach,2015-08-11

The central unifying theme of this state of the art contribution to research on literacy is its rethinking and reconceptualization of individual differences in reading Previous research focused on cognitive components of reading signaled the need for ongoing work to identify relevant individual differences in reading to determine the relationships of individual differences to reading development and to account for interactions among individual differences Addressing developments in each of these areas this volume also describes affective individual differences and the environments in which individual differences in reading may emerge operate interact and change The scant comprehensive accounting of individual differences in reading is reflected in the nature of reading instruction programs today the outcomes that are expected from successful teaching and learning and the manner in which reading development is assessed An important contribution of this volume is to provide prima facie evidence of the benefits of broad conceptualization of the ways in which readers differ The Handbook of Individual Differences in Reading moves the field forward by encompassing cognitive non cognitive contextual and methodological concerns Its breadth of coverage serves as both a useful summary of the current state of knowledge and a guide for future work in this area **The ^AOxford Handbook of Deaf Studies in Literacy**

A. Mertler, 2021-11-14 This Third Edition of Craig Mertler's practical text helps readers every step of the way as they plan and execute their first educational research project. Offering balanced coverage of qualitative and quantitative methods, an emphasis on ethics, and a wealth of new examples and concrete applications, the new edition continues to use conversational nontechnical language to help students clearly understand and apply research concepts, principles, procedures, and terminology. Expanded coverage of foundations of research, an increased focus on integrating qualitative and quantitative research, and updated coverage of research questions and the tools of qualitative research bring the book thoroughly up to date, while streamlined coverage of statistics shows students how to do quantitative analysis in a straightforward way.

*Extending Thought in Young Children* Chris Athey, 2007-03-08 Chris Athey has made a major contribution to our understanding of how young children think and how educators and parents can best support their learning. This book is without doubt a most important text for all who are concerned to maximise the potential of early childhood education to develop effective ways of working with young children. The book explores children's schematic development and offers ways of teaching which are closely matched to children's actions, speech, and graphic representations. This second edition of *Extending Thought* builds on the scholarly approach of the first and provides readers with a clear explanation of relevant research alongside rich observations of children. It is essential reading for all who seek to provide the very best of learning opportunities for young children by bringing parents, professionals, and informed pedagogy together in a thoughtful and informed partnership of learning. *Extending Thought* is a major building block for many of us who study young children's capacity to think and learn. Dr Cathy Nutbrown, Reader in Education, University of Sheffield. In this fully revised version of Chris Athey's classic text, the author builds on her original internationally renowned research with new illustrations of continuity in children's thinking from early to primary education. Drawing on her extensive experience and research evidence, she explains how teachers of young children can advance professionally towards a greater knowledge of young children's thinking and learning. The book covers: forms of thought used by young children; assimilation of curriculum content; pedagogy; parental participation; the politics of early education. This book is an essential read for students and teachers in early years education. Chris Athey, M.Ed., was Principal Lecturer in Education at the Roehampton Institute of Higher Education (RIHE). Funded by a Leverhulme Research Fellowship, she directed the Froebel Early Education Project from 1973 to 1978. She has taught all ages of primary school children in State and private schools. She has considerable experience of initial teacher training and INSET.
