Fiscal Adjustment And Economic Development A Case Study Of Nova Scotia:

Fiscal Adjustment and Economic Development John F. Graham, 1963 **Fiscal Adjustment and Economic Development** John F. Graham, 1963-12-15 This study is an attempt to find a solution to the problem of fiscal adjustment between a province or a state and its municipalities a pressing problem throughout Canada and the United States and in many other countries in view of the great disparities in the revenue raising capacity of municipalities their limited tax bases and the pressure on them to provide higher levels of public services The principles developed are of general applicability but their use is illustrated by using Nova Scotia as a case study The first of the series Atlantic Provinces Studies established by the Social Science Research Council of Canada to encourage research on the economic and social problems of the Atlantic Provinces Georges Bank, Gulf of Maine, Cape Cod, Nova Scotia Research Institute of the Gulf of Maine, 1978 **A Leader and a Laggard** Roy George, 1970-12-15 Advanced countries in all parts of the world are concerned with the geographical unevenness of their development Canada's preoccupation is with the Atlantic provinces and for years government departments and agencies have tried to improve the region's economy However the evidence suggests that the economic gap between the Atlantic provinces and the rest of Canada has remained remarkably constant This persistent gap has no shortage of explanations lack of resources the cost of transportation insufficient markets and a poor supply of skilled labour are problems often mentioned This study investigates how far these and other factors account for slow industrial development The author compares two regions of Canada Quebec and Ontario which together are considered the industrial leader and Nova Scotia the industrial laggard He compares the costs of inputs for an average manufacturing firm in Nova Scotia from 1946 to 1962 with what those costs would have been had the firm been located in the Quebec Ontario region The analysis includes relative wage rates labour productivity the costs of materials energy and fuel rates of interest and investment transportation charges levels of local taxation and the supply of business enterprise Canadian official statistics form the main basis of the comparisons but where these are inadequate information derived from three special studies carried out by the author is used Dr George then explores the implications of the study's findings for public policy He examines the relative cost and effectiveness of tax concessions capital grants industrial estates transportation subsidies and other remedial measures often advocated Although the book uses a case study approach involving just two regions it is relevant to the general theory of the location of industry to regional economic policies and to industrial development It is essential reading for politicians and public servants who shape regional policies for industrial promotion managers of municipalities for businessmen choosing sites of new enterprises and the consultants who advise them for academics concerned with the theoretical aspects of the location of industry and for anyone interested in industrial development The Social Sciences in Canada Donald Fisher, 2006-01-01 The Social Sciences in Canada is about the background and history of the Social Science Federation of Canada in honour of its fifty years of national activity There can be little doubt that during

Canadian History: Confederation to the present Martin Brook Taylor,Doug Owram,1994-01-01 In these two volumes which replace the Reader s Guide to Canadian History experts provide a select and critical guide to historical writing about pre and post Confederation Canada with an emphasis on the most recent scholarship Cover How Schools Worked R.D. Gidney,W.P.J. Millar,2012-02-21 Between the 1880s and the 1940s children in English Canada encountered schools and school systems profoundly different from today s In *How Schools Worked* R D Gidney and W P J Millar map the contours of that world retrieving it from the obscurity created not only by the passage of time but by fundamental shifts in organization pedagogical values and beliefs about the role of public education Moving beyond the rhetoric on school reform that marked the period *How Schools Worked* focuses squarely on schooling itself How many children went to elementary or secondary school how often and for how long What was the range of their educational attainments How were their patterns of attendance influenced by social class gender and where they lived What and how were they taught How were they assessed and promoted from grade to grade What were their teachers qualifications and experience What were their school buildings like Who paid the bills and how much did they pay How well or badly were children and young people served by their schools And how did answers to these questions change over time A sympathetic yet critical analysis *How Schools Worked* is a portrait of a complex enterprise at work Gidney and Millar offer a rich understanding of the period a reappraisal of some major debates and insights into educational issues that perplex us still **The Canadian Municipal System** Donald C. Rowat,1969 **The Atlantic Provinces in Confederation** E. R. Forbes,Ernest R. Forbes,Delphin Andrew Muise,Bill Parenteau,1993-01-01 The Atlantic Provinces cover New Brunswick Nova Scotia Prince Edward Island and Newfoundland

Equal as Citizens Richard Starr,2014-04-30 No matter where they live Canadians expect and receive equal benefits

from their government when it comes to old age pensions consular services when travelling abroad and airline safety Canadians also expect the same quality of education medical care and social benefits anywhere in the country But when government services come from provinces and not Ottawa differences in the quality of services can be enormous Canada's provinces have equal responsibilities but very unequal means to pay for those responsibilities Equal citizenship for all Canadians is an idea that has a long and distinguished pedigree in Canadian life When differences between the provinces grew dramatically in the early twentieth century politicians crafted a response that sought to equalize services across the country They called these measures equalization and the idea was deemed so fundamental that it was embodied in the 1982 Canadian constitution But Canada has changed The centre of wealth has been shifting from Ontario toward the resource rich provinces The wealth gap between provinces has grown and with it disparities in taxes and services available to citizens Regionalism and neoconservative ideas have undermined support for equal citizenship In this compelling new book Richard Starr traces the history of this idea He tracks how it has been undermined and attacked and proposes how it can be reframed in a twenty first century context to attract the support of most Canadians
