Risk profile - Group B Streptococcus (GBS) -?
Streptococcus agalactiae sequence type (ST) 283 in freshwater fish Food and Agriculture Organization of the United Nations,2021-06-11 In Singapore during 2015 Group B Streptococcus GBS sequence type 283 ST283 caused the only reported foodborne outbreak of invasive GBS disease Over 20 percent of cases were healthy adults without comorbidities which is unusual for GBS The outbreak was linked to the consumption of raw freshwater fish Subsequent investigations found that ST283 GBS has been common among GBS causing disease in humans and in tilapia across Southeast Asia for at least 20 years whereas it was almost non existent outside this region Given the novelty of the outbreak this risk profile consolidates the current knowledge to identify data gaps about GBS ST283 along the freshwater fish supply chain in Southeast Asia Although GBS fish infection can present with few clinical signs of disease outbreaks of GBS in high intensity tilapia aquaculture can result in severe infection with mortalities of up to 80 percent These outbreaks are largely undocumented but likely have a wide effect on aquaculture given its economic and social importance across Southeast Asia There is also a lack of data on patterns of fish consumption including frequency amount preparation and consumer demographics Nevertheless consumption of non heat treated freshwater fish is common in Southeast Asia Given the multitude of data gaps the risk posed by GBS ST283 from consumption of freshwater fish remains highly uncertain Potential risk management options start with the application of good aquaculture practices and good food safety measures throughout

the supply chain *Digenetic Trematodes* Rafael Toledo, Bernard Fried, 2024-07-15 Although digenetic trematodes have been largely neglected they constitute a major group of helminths that parasitize human and animals causing significant morbidity and mortality This is of special importance today since the geographical limits and the populations at risk traditionally limited to developing or low income countries are currently expanding and changing in relation to factors such as growing international markets improved transportation systems and demographic changes This has led to a growing international interest in trematode infections although factors such as the difficulties entailed in the diagnosis the complexity of human and agricultural practices the lack of assessments of economic costs or the limited number of effective drugs are preventing the development of control measures of these diseases in humans and livestock In depth studies are needed to clarify the current epidemiology of these helminth infections and to identify new and specific targets for both effective diagnosis and treatments The main goal of the third edition of this book is to present the major trematodes and their corresponding diseases in the framework of modern parasitology considering matters such as the application of novel techniques and analysis of data in the context of host parasite interactions and also with the resident microbiota showing the application of modern techniques and concepts to the studies on digenetic trematodes This is an ideal book for parasitologists microbiologists zoologists immunologists public health professionals clinicians and graduate and post graduate students

Liver Fluke, Opisthorchis viverrini Related **Cholangiocarcinoma** Narong Khuntikeo,Ross H. Andrews,Trevor N. Petney,Shahid A. Khan,2023-09-03 This volume discusses new developments in the etiology diagnosis and treatment of cholangiocarcinoma induced by the liver fluke *Opisthorchis viverrini* Although cholangiocarcinoma is rare in the Western world it has a very high

incidence in continental Southeast Asian countries where it is linked to infection with *O. viverrini*. In Southeast Asia this cancer causes thousands of deaths every year and places a severe socioeconomic burden on the affected families. Diagnosis is usually at a late disease stage and in the past palliative surgery and care have been the major therapeutic options. Recently, however, techniques have become available for early stage diagnosis that offer the possibility of curative surgery and novel chemotherapeutic options are also under development. In Thailand alone more than 2 million individuals have now been registered for screening for this cancer. The aim of this book is to highlight the latest research in the field and to explain how the newly available techniques can be applied to reduce the risk of developing cholangiocarcinoma and increase the likelihood of survival.

Hot Sour Salty Sweet Jeffrey Alford, Naomi Duguid, 2000-10-07

Luminous at dawn and dusk the Mekong is a river road, a vibrant artery that defines a vast and fascinating region. Here along the world's tenth largest river, which rises in Tibet and joins the sea in Vietnam, traditions mingle and exquisite food prevails. Award-winning authors Jeffrey Alford and Naomi Duguid followed the river south as it flows through the mountain gorges of southern China to Burma and into Laos and Thailand. For a while the right bank of the river is in Thailand, but then it becomes solely Lao on its way to Cambodia. Only after three thousand miles does it finally enter Vietnam and then the South China Sea. It was during their travels that Alford and Duguid, who ate traditional foods in villages and small towns and learned techniques and ingredients from cooks and market vendors, came to realize that the local cuisines like those of the Mediterranean share a distinctive culinary approach. Each cuisine balances with grace and style the regional flavor quartet of hot, sour, salty, and sweet. This book, aptly titled, is the result of their journeys. Like Alford and Duguid's two previous works, *Flatbreads and Flavors*, a certifiable publishing event, *Vogue* and *Seductions of Rice*, simply stunning. *The New York Times* this book is a glorious combination of travel and taste, presenting enticing recipes in an odyssey rich in travel anecdote. *National Geographic Traveler*. The book's more than 175 recipes for spicy salsas, welcoming soups, grilled meat, salads, and exotic desserts are accompanied by evocative stories about places and people. The recipes and stories are gorgeously illustrated throughout with more than 150 full-color food and travel photographs. In each chapter, from Salsas to Street Foods, Noodles to Desserts, dishes from different cuisines within the region appear side by side. A hearty Lao chicken soup is next to a Vietnamese ginger chicken soup; a Thai vegetable stir fry comes after spicy stir-fried potatoes from southwest China. The book invites a flexible approach to cooking and eating: for dishes from different places can be happily served and eaten together. Thai Grilled Chicken with Hot and Sweet Dipping Sauce pairs beautifully with Vietnamese Green Papaya Salad and Lao sticky rice. North Americans have come to love Southeast Asian food for its bright, fresh flavors. But beyond the dishes themselves, one of the most attractive aspects of Southeast Asian food is the life that surrounds it. In Southeast Asia, people eat for joy. The palate is wildly eclectic, proudly unrestrained. In *Hot Sour Salty Sweet*, at last, this great culinary region is celebrated with all the passion, color, and life that it deserves.
