Fish Shape Paumanok:

Fish Shape Paumanok Robert C. Murphy, 1976 *Fish-shape paumanok ... Vol. 58* R. C. Murphy, 1964 **Fish-shape Paumanok** Robert Cushman Murphy, 1964 Fish-shape Paumanok Robert Cushman Murphy, 1964 **Fish-Shape Paumanok** Robert Cushman Murphy, 1964-12 The bittersweet message of this volume is at once Robert Cushman Murphy's celebration of the magnificent environment and history of Long Island that inspired him a chronicle of man's destructive tendencies as they found focus on this sandy strand and a gentle warning to change our ways Although it weaves history and natural history into a time sequenced story this is not just a book about the past Its broad scope still provides a Rosetta Stone enabling all who would know to decipher the hieroglyphics of ecology The relationship between nature and humans will continue to be of paramount importance to this earth and both sides of the equation will continue to benefit from the quiet message of this book Illustrations **The Sounds of Place** Denise Von Glahn, 2021-09-14 Composers like Charles Ives Duke Ellington Aaron Copland and Ellen Taaffe Zwilich created works that indelibly commemorated American places Denise Von Glahn analyzes the soundscapes of fourteen figures whose place pieces tell us much about the nation's search for its own voice and about its ever changing sense of self She connects each composer's feelings about the United States and their reasons for creating a piece to the music while analyzing their compositional techniques tunes and styles Approaching the compositions in chronological order Von Glahn reveals how works that celebrated the wilderness gave way to music engaged with humanity's influence benign and otherwise on the landscape before environmentalism inspired a return to nature themes in the late twentieth century Wide ranging and astute *The Sounds of Place* explores high art music's role in the making of national myth and memory **American Poetry** Percy Holmes Boynton, Howard Mumford Jones, George Sherburn, Frank Martindale Webster, 1918 **Welcome to Shirley** Kelly McMasters, 2008-01-11 Shirley seemed to be doomed from the beginning Founded by a Vaudevillian huckster who touted it as a seaside haven despite the sand bar that blocks access to the shore the town has been plagued by one disaster after another a UFO a childhood cancer cluster and a mysterious federal nuclear laboratory in nearby Brookhaven that leaked toxic nuclear and chemical waste into the aquifer from which the residents unknowingly drew their well water This is Kelly McMasters account of growing up in a cursed town and loving it anyway and of a girl's awakening to tragedy and to a sense of mission Told in a deliciously engaging voice *Welcome to Shirley* balances the bitter with the sweet the funny with the infuriating in an unforgettable story of working class Long Island **This Compost** Jed Rasula, 2012-09-01 Poetry for Jed Rasula bears traces of our entanglement with our surroundings and these traces define a collective voice in modern poetry independent of the more specific influences and backgrounds of the poets themselves In *This Compost* Rasula surveys both the convictions asserted by American poets and the poetics they develop in their craft all with an eye toward an emerging ecological worldview Rasula begins by examining poets associated with Black Mountain College in the 1950s Charles Olson Robert Creeley and Robert Duncan and their

successors But This Compost extends to include earlier poets like Robinson Jeffers Ezra Pound Louis Zukofsky Kenneth Rexroth and Muriel Rukeyser as well as Clayton Eshleman Gary Snyder Michael McClure and other contemporary poets Walt Whitman and Emily Dickinson also make appearances Rasula draws this diverse group of poets together uncovering how the past is a compost fertilizing the present He looks at the heritage of ancient lore and the legacy of modern history and colonial violence as factors contributing to ecological imperatives in modern poetry This Compost restores the dialogue between poetic language and the geophysical biological realm of nature that so much postmodern discourse has sought to silence It is a fully developed carefully argued book that deals with an underrepresented element in modern American culture where the natural world and those who write about it have been greatly neglected in contemporary literary history and theory

Leaves of Grass Walt Whitman, 1897 **Bloom's How to Write about Walt Whitman** Frank D. Casale, 2009 Walt Whitman's passionate writing style and bold subject matter have deeply influenced American poetry Nearly all of his poems were published in Leaves of Grass which Whitman obsessively expanded edited and republished throughout his life ultimately leaving behind a powerful literary legacy Twenty of his most commonly read and studied poems are discussed in depth in this volume which also features ideas for essay topics to assist students in developing critical thinking skills **Chambers's Journal of Popular Literature, Science and Arts**, 1868 **Zoopoetics** Aaron M. Moe, 2013-12-19 Zoopoetics assumes Aristotle was right The general origin of poetry resides in part in the instinct to imitate But it is an innovative imitation An exploration of the oeuvres of Walt Whitman E E Cummings W S Merwin and Brenda Hillman reveals the many places where an imitation of another species poiesis Greek makings contributes to breakthroughs in poetic form However humans are not the only imitators in the animal kingdom Other species too achieve breakthroughs in their makings through an attentiveness to the ways of being of other animals For this reason mimic octopi elephants beluga whales and many other species join the exploration of what zoopoetics encompasses Zoopoetics provides further traction for people interested in the possibilities when and where species meet Gestures are paramount to zoopoetics Through the interplay of gestures the human animal textual spheres merge making it possible to recognize how actual biological animals impact the material makings of poetry Moreover as many species are makers zoopoetics expands the poetic tradition to include nonhuman poiesis **Crabgrass Crucible** Christopher C. Sellers, 2012-06-18 Although suburb building created major environmental problems Christopher Sellers demonstrates that the environmental movement originated within suburbs not just in response to unchecked urban sprawl Drawn to the countryside as early as the late nineteenth century new suburbanites turned to taming the wildness of their surroundings They cultivated a fondness for the natural world around them and in the decades that followed they became sensitized to potential threats Sellers shows how the philosophy science and emotions that catalyzed the environmental movement sprang directly from suburbanites' lives and their ideas about nature as well as the unique ecology of the neighborhoods in which they dwelt Sellers focuses on the spreading edges of New York and Los Angeles over the

middle of the twentieth century to create an intimate portrait of what it was like to live amid suburban nature As suburbanites learned about their land became aware of pollution and saw the forests shrinking around them the vulnerability of both their bodies and their homes became apparent Worries crossed lines of class and race and necessitated new ways of thinking and acting Sellers argues concluding that suburb dwellers through the knowledge and politics they forged deserve much of the credit for inventing modern environmentalism *Leaves of grass, including a fac-simile autobiography, variorum readings of the poems and a department of Gathered leaves* [ed. by D. McKay]. Walt Whitman, 1900 Poems by Walt Whitman Walt Whitman, 1901 *Poems* Walt Whitman, 1902 *Leaves of Grass* Whitman, 1892 **180 Masterpieces**
