What's Wrong with Democracy? Loren J. Samons, 2007-04-23 This is unlike any recent work I know of It offers a challenging often refreshing and what will certainly be a controversial assessment of classical Athenian democracy and its significance to modern America Samons is willing to tread where few other classicists are willing to go in print He reminds readers that the Athenian democracy offers just as many negative lessons as positive ones and topics like the popular vote the dangers of state payments to individual citizens the naturally acquisitive foreign policy of democratic governments and the place of religion in democracy all come up for discussion and criticism Samons has written an original and very provocative book James Sickinger author of *Public Records and Archives in Classical Athens* Professor Samons lively and challenging account of ancient Athens raises important questions about democracy ancient and modern It will surely arouse keen interest and debate Donald Kagan author of *The Peloponnesian War* In this elegantly written carefully researched and perceptive book Samons presents a penetrating

analysis of ancient Athenian democracy's dark sides His book is as much about the errors and weaknesses of our own political system as it is about those of ancient Athens Whether or not we agree with his critique and conclusions this book is not merely thought provoking it is annoyingly discomforting forcing us to re-examine firm beliefs and to discard easy solutions Kurt A Raaflaub author of *Discovery of Freedom in Ancient Greece* In this marvelously unfashionable book Samons debunks much of what passes in the current day academy as scholarship on classical Athens demonstrating that it is an ideologically driven apology for a radically defective form of government In the process he casts light on the perspicacity of America's founding fathers and on the unthinking populism that threatens in our own day to ruin their legacy Paul A Rahe author of *Republics Ancient and Modern Classical Republicanism and the American Revolution* We are in the greatest age of democracy since antiquity and in the most need of guidance about the wisdom of government by majority vote Precisely for that reason Professor Samons offers a bold and unbridled look at the nature and history of democracies ancient and modern He reminds us that we are capable of doing as much evil as good when constitutional protections and republican oversight are not there to moderate the instant desires of the majority This is an engaging provocative and timely study of ancient Athens and modern America that should serve as a cautionary reminder to both romantic scholars and zealous diplomats Victor Davis Hanson author of *The Other Greeks*

The Painful Side of Leadership Jeff Iorg,2009-10-01 Christian leadership is often likened to the peaceful image of a shepherd leading his sheep But the truth is that sheep tend to wander toward trouble and shepherds don t always handle the challenges of their job with grace and ease The Painful Side of Leadership encourages and equips Christian leaders with biblical insights to better manage painful ministry circumstances relationships and choices Author and seminary president Jeff Iorg writes candidly throughout to those who may feel beaten up by their mistakes their critics or having to make unpopular decisions His insights are framed with chapters about why painful things happen to Christian leaders in the first place and the hope that God always provides when a leader is hurting Star Performance Justin Thompson

PhD,2015-10-27 The STAR model integrates intelligent planning with proactive doing to allow peak performance Planning involves defining and communicating a strong strategy and sound tactics and doing is all about taking intelligent action and getting the desired results Excelling in the processes of both planning and doing is what it takes to achieve STAR Performance This leadership process begins with a strategy that defines purpose principles that establish the values that will govern our operation and a vision for the future that inspires passion It builds with a tactical plan that combines preparation planning and prioritization to set the course forward Execution is achieved through action that involves practice persistence in the face of adversity and good old fashioned perspiration Finally results are achieved and improved with patience a focus on productivity and honestly introspective probing that leads to corrective actions and improvements When all of these elements are in place properly communicated and focused on the same target the result is continually improving performance that makes the team shine like the STAR they were meant to be **IDEOLOGY OF RELIGIONS** Andrey

Davydov,Olga Skorbatyuk,2014-07-29 In the XXI century God remains an unknown value to humans Although God is the fundamental value in this world as he is the Creator of all A modern human cannot accept the idea of the existence of God due to lack of evidence that God exists Blind faith is an indicator of low level of development of individuals and is no longer a common stance of modern people even those who are not well educated People are willing to believe only that what they can see with their own eyes test and of course use in everyday life That is normal natural People only declare that they believe in God No one really believes in him because human intellect is created in such a way that one is unable to take something seriously without evidence Not to mention that recipes that religion offers as a practical guide do not hold water from the point of view of a modern person Also in the eternal debate of psychologists what is primary soul or body soul loses only because psychologists do not know anything about it Despite the fact that soul psyche is the focus of this science Shortfalls of medicine psychology anthropology and other sciences that study human beings affected people s attitude towards religion

However religion unlike science has existed for many centuries Despite everything it continues to exist today This clearly indicates that humanity can exist without science but not without belief in some Higher Powers something supernatural that unlike modern science has the ability to solve any problems of humans One can admit this to himself or not it does not matter And even more so it does not matter whether this role is filled by biblical God or those gods which religions offer to consider gods or not As it is known there are books much older than the Bible Torah Quran etc Some of these books date tens of millions of years back Studying one of these books according to some researchers this manuscript dates 21st century BC we found answers to all of our questions because this book turned out to be nothing other than the Catalog of Human Souls It is a catalog because this book contains descriptions of about three hundred models of psyche of homo sapiens Moreover it holds detailed instructions on how this or that person can realize the main Divine Plan make himself herself the image and likeness of God In this book about three hundred ways to achieve this state for humans were discovered This book is a direct proof of existence of God the segment which religious institutions and their congregations have always needed but lacked Any person can compare descriptions from the Catalog to real people their individual qualities life algorithms etc or use information about how this or that person can be controlled apply it in practice see the reactions and get real results from manipulation God created a human in His Image and Likeness and implanted potential of a Creator into each person And gave everyone the freedom to choose exactly how and in what direction to use their existing abilities The Divine Will in respect to a Human was recorded in the Catalog of Human Souls However humanity lost this Catalog and began to use God given potential in a completely different way In the direction opposite of the Divine Plan people began to create artificial images We feel that the tradition of True Faith which actually is Knowledge should be revived Everywhere Globally We propose a new ideology of religions and its practical implementation We propose to finally determine the answer to who is at least a Human And to move the theory of existence of God the human Soul from the status of a theory which can only be believed in into the status of a theory that any person can test New ideology of religions created on the basis of evidence for God s existence produced strictly by scientific methods can bring people back to God
