The Paradox of Morality Vladimir Jankelevitch, 2025-02-25 The last work by one of the most singular voices of twentieth century French philosophy Critical Inquiry on the complexities of love in public and private life Vladimir Jankl vitch stands alongside Emmanuel Levinas as one of the most admired French ethicists of the twentieth century known for his work on everything from the possibility of

forgiveness after the Holocaust to the philosophy of music In his final work *The Paradox of Morality* 1981 Jankl vitch turns his attention to the fundamental questions of the moral life the struggle between egoism and self sacrifice the question of whether pure or infinite love exists and moral agency in the pursuit of human rights In dialogue with philosophers from Plato to Nietzsche Jankl vitch proposes that the moral life comprises an acrobatic act in which we must balance the demands of love and our responsibility to the other against our natural attachment to the self Morality is the activity of realizing and combining in each individual action the maximum amount of love possible with the minimum of being This oscillation between self and other and between being and love is never fixed or stable In the end morality is not something that exists in the world of contemplation instead it is the substance of what must be done here and now created anew in each new moment
