Encyclopedia of Nineteenth-Century Photography John Hannavy, 2013-12-16 The Encyclopedia of Nineteenth Century Photography is the first comprehensive encyclopedia of world photography up to the beginning of the twentieth century It sets out to be the standard definitive reference work on the subject for years to come Its coverage is global an important first in that authorities from all over the world have contributed their expertise and scholarship towards making this a truly comprehensive publication The Encyclopedia presents new and ground breaking research alongside accounts of the major established figures in the nineteenth century arena Coverage includes all the key people processes equipment movements styles debates and groupings which helped photography develop from being a solution in search of a problem when first invented to the essential communication tool creative medium and recorder of everyday life which it had become by the dawn of the twentieth century The sheer breadth of coverage in the 1200 essays makes the Encyclopedia of Nineteenth Century Photography an essential reference source for academics students researchers and libraries worldwide

The Place of Lewis Carroll in Children's Literature Jan Susina, 2013-02-01 In this volume Jan Susina examines the importance of Lewis Carroll and his popular Alice books to the field of children s literature From a study of Carroll s juvenilia to contemporary multimedia adaptations of Wonderland Susina shows how the Alice books fit into the tradition of literary fairy tales and continue to influence children s writers In addition to examining Carroll s books for children these essays also explore his photographs of children his letters to children his ill fated attempt to write for a dual audience of children and adults and his lasting contributions to publishing The book addresses the important but overlooked facet of Carroll s career as an astute entrepreneur who carefully developed an extensive Alice industry of books and non book items based on the success of Wonderland while rigorously defending his reputation as the originator of his distinctive style of children s stories

Amateurs, Photography, and the Mid-Victorian Imagination Grace Seiberling, 1986-05 This book results from research which was begun with all the casualness but inherent seriousness of the nineteenth century amateur I had the privilege of frequent access to the archives of the International Museum of Photography at George Eastman House and began to go through the nineteenth century photographs in a systematic way I wanted to go beyond the clich s of the history of photography as a series of often reproduced masterworks and to find out something about the history of seeing or at least of thinking about images in the nineteenth century Pr face

The Photographic Experience, 1839-1914: Images and Attitudes, 1994 **O.G. Rejlander, Photography as Art** Stephanie Spencer, 1985 [Making, Selling and Wearing Boys' Clothes in Late-Victorian England](#)

Clare Rose, 2016-12-05 There has been a great deal of recent interest in masculine clothing examining both its production and consumption and the ways in which it was used to create individual identities and to build businesses from 1850 onwards Drawing upon a wide range of sources this book studies the interaction between producers

and consumers at a key period in the development of the ready made clothing industry It also shows that many innovations in advertising clothing usually considered to have been developed in America had earlier British precedents To counter the lack of documentary evidence that has hitherto hampered research into the dress practices of non elite groups this book utilises thousands of unpublished visual documents These include hundreds of manufacturers designs which underline an unexpected degree of investment by manufacturers in boys clothing and which was matched by heavy investment in advertising with thousands of images of boys clothing for shop catalogues in the Stationers Hall copyright archive Another key source is the archives of Dr Barnardo s Homes This extraordinary collection contains over 15 000 documented photographs of boys entering between 1875 and 1900 allowing us to look beyond official polarization of raggedness and respectability used by charities and social reformers of all stripes and to establish the clothing that was actually worn by a large sample of boys A close analysis of 1 800 images reveals that even when families were impoverished they strove to present their boys in ways that reflected their position in the family group and in society By drawing on these visual sources and linking the design and retailing of boys clothing with social cultural and economic issues this book shows that an understanding of the production and consumption of the boys clothing is central to debates on the growth of the consumer society the development of mass market fashion and concepts of childhood and masculinity

The Darwinian Heritage David Kohn,2014-07-14 Representing the present rich state of historical work on Darwin and Darwinism this volume of essays places the great theorist in the context of Victorian science The book includes contributions by some of the most distinguished senior figures of Darwin scholarship and by leading younger scholars who have been transforming Darwinian studies The result is the most comprehensive survey available of Darwin s impact on science and society Originally published in 1986 The Princeton Legacy Library uses the latest print on demand technology to again make available previously out of print books from the distinguished backlist of Princeton University Press These editions preserve the original texts of these important books while presenting them in durable paperback and hardcover editions The goal of the Princeton Legacy Library is to vastly increase access to the rich scholarly heritage found in the thousands of books published by Princeton University Press since its founding in 1905

The Bible in Photography Sheona Beaumont,2024-01-25 Sheona Beaumont addresses the untold story of biblical subjects in photography She argues that stories characters and symbols from the Bible are found to pervade photographic practices and ideas across the worlds of advertising and reportage the book and the gallery in theoretical discourse and in the words of photographers themselves Beaumont engages interpretative tools from biblical reception studies art history and visual culture criticism in order to present four terms for describing photography s latent spirituality the index the icon the tableau and the vision Throughout her journey she includes lively discussion of selected fine art photography dealing with the Bible in surprising ways from images by William Henry Fox Talbot in the 19th century to David Mach in the 21st Far from telling a secular story photography and the conditions of its representations are

exposed in theological depth Beaumont skillfully interweaves discussion of the images and theology arguing for the dynamic and potent voice of the Bible in photography and enriching visual culture criticism with a renewed religious understanding

Inscribing Science Timothy Lenoir, 1998 Metaphors of inscription and writing figure prominently in all levels of discourse in and about science The description of nature as a book written in the language of mathematics has been a common trope since at least the time of Galileo a metaphor supplemented in our own day by the characterization of DNA sequences as the code for the book of life decipherable in terms of protein semantic units An important recent direction in the fields of science and literature studies is to consider such descriptions as more than metaphoric as revelatory of the processes of signification in science more generally Nearly everywhere we look the semiotic turn is upon us Recent science and technology studies have been characterized by a rich diversity of research directions manifesting several trends apparently counter to one another On the one hand stands the rich tradition of detailed microstudies of experiments instruments and scientific practice on the other hand are grouped studies grander in scope aimed at examining science within the framework of cultural production This volume of sixteen essays seeks common ground among these different approaches by juxtaposing work from historically focused science and literature studies with work inspired by

poststructuralist philosophy and semiotics The contributors are Gillian Beer Lisa Bloom Robert Brain Lorraine Daston Richard M Doyle David Gugerli Hans Ulrich Gumbrecht Friedrich Kittler Timothy Lenoir Alex Pang Philip Prodger Hans J rg Rheinberger Robin Rider Brian Rotman Simon Schaffer and Bernhard Siegert **Library of Congress Catalogs** Library of Congress, 1976 **Slumming** Seth Koven, 2006-07-24 In the 1880s fashionable Londoners left their elegant homes and clubs in Mayfair and Belgravia and crowded into omnibuses bound for midnight tours of the slums of East London A new word burst into popular usage to describe these descents into the precincts of poverty to see how the poor lived slumming In this captivating book Seth Koven paints a vivid portrait of the practitioners of slumming and their world who they were why they went what they claimed to have found how it changed them and how slumming in turn powerfully shaped both Victorian and twentieth century understandings of poverty and social welfare gender relations and sexuality The slums of late Victorian London became synonymous with all that was wrong with industrial capitalist society But for philanthropic men and women eager to free themselves from the starched conventions of bourgeois respectability and domesticity slums were also places of personal liberation and experimentation Slumming allowed them to act on their irresistible attraction of repulsion for the poor and permitted them with society's approval to get dirty and express their own dirty desires for intimacy with slum dwellers and sometimes with one another Slumming elucidates the histories of a wide range of preoccupations about poverty and urban life altruism and sexuality that remain central in Anglo American culture including the ethics of undercover investigative reporting the connections between cross class sympathy and same sex desire and the intermingling of the wish to rescue the poor with the impulse to eroticize and sexually exploit them By revealing the extent to which politics and

Art, Vision, and Nineteenth-Century Realist Drama Amy Holzapfel, 2014-01-03 Realism in theatre is traditionally defined as a mere seed of modernism, a crude attempt to reproduce an exact copy of reality on stage. Art Vision Nineteenth-Century Realist Drama redefines realism as a complex and under-examined form of visual modernism, one that positioned theatre at the crux of the encounter between consciousness and the visible world. Tracing a historical continuum of acts of seeing on the realist stage, Holzapfel demonstrates how theatre participated in modernity's aggressive interrogation of vision's residence in the human body. New findings by scientists and philosophers such as Diderot, Goethe, Müller, Helmholtz, and Galton exposed how the visible world is experienced and framed by the unstable relativism of the physiological body rather than the fixed idealism of the mind. Realist artists across media paradoxically embraced this paradigm shift by focusing on the embodied observer. Drawing from extensive archival research, Holzapfel conducts close readings of iconic dramas and their productions, including Scribe's *The Glass of Water*, Zola's *Thérèse Raquin*, Ibsen's *A Doll House*, Strindberg's *The Father*, and Hauptmann's *Before Sunrise*, alongside analyses of artwork by major painters and photographers such as Chardin, Nadar, Millais, Rejlander, and Liebermann. In a radical challenge to existing criticism, Holzapfel argues that realism in theatre was never the attempt to reproduce an exact copy of the seen world but rather the struggle to make visible the act of seeing.

Media, Technology, and Literature in the Nineteenth Century Margaret Linley, 2016-04-29 Operating at the intersection where new technology meets literature, this collection discovers the relationship among image, sound, and touch in the long nineteenth century. The chapters speak to the special mixed-media properties of literature while exploring the important interconnections of science, technology, and art at the historical moment when media was being theorized, debated, and scrutinized. Each chapter focuses on a specific visual, acoustic, or haptic dimension of media while also calling attention to the relationships among the three. Famous works such as Wordsworth's *I wandered lonely as a cloud* and Shelley's *Frankenstein* are discussed alongside a range of lesser-known literary, scientific, and pornographic writings. Topics include the development of a print culture for the visually impaired, the relationship between photography and narrative, the kaleidoscope and modern urban experience, Christmas gift books, poetry, painting, and music as remediated forms, the interface among the piano, telegraph, and typewriter, Ernst Heinrich Weber's model of rationalized tactility, and how the shift from visual to auditory telegraphic instruments amplified anxieties about the place of women in nineteenth-century information networks. Full of surprising insights and connections, the collection offers new impetus for stimulating historical conversations and debates about nineteenth-century media while also contributing fresh perspectives on new media and re-mediation today.
