Fathers And Mothers Five Papers On The Archetypal Background Of Family Psychology:

Fathers and Mothers Patricia Berry, 1973 **Fathers and Mothers** Erich Neumann, Murray Stein, Augusto Vitale, 2025-03-31 Five papers by JAMES HILLMAN ERICH NEUMANN MURRAY STEIN AUGUSTO VITALE and VERA VON DER HEYDT examine the archetypal background of family psychology How are we to protect our children from ourselves if conscious will and conscious effort are of no avail There can be no doubt that it is of the utmost value for parents to view their children's symptoms in the light of their own problems and conflicts It is their duty as parents to do so Their responsibility in this respect carries with it the obligation to do everything in their power not to lead a life that could harm the children Generally far too little stress is laid upon how important the conduct of the parents is for the child because it is not words that count but deeds Parents should always be conscious of the fact that they themselves are the principal cause of neurosis in their children C G JUNG **A Jungian Approach to Bipolar Disorder** Jason R. Thompson, 2012-06-05 Essay by J R Thompson surveys the topic of bipolar disorder manic depression in the writings of Jung and post Jungians while offering a new archetypal framework for understanding the phenomenon The Essential James Hillman James Hillman, 2013-10-31 First published in 1990 James Hillman is one of the leading figures in archetypal psychology and one of the most creative minds in psychology This anthology of his writings presents carefully selected choice passages from many of his seminal essays and work on archetypal psychology Fundamental themes in Hillman's thought form the chapters of the book poetic basis of mind psychological polytheism dreams love therapy The book is intended for the reader who wants an overview or introduction to his highly original approach an approach that draws on mythology renaissance philosophy alchemy and critical readings of Jung and Freud **The Dream and the Text** Carol Schreier Rupprecht, 1993-07-01 This book partakes of a long tradition of dream interpretation but at the same time is unique in its cross cultural and interdisciplinary methods and in its mix of theoretical and analytical approaches It includes a great chronological and geographical range from ancient Sumeria to eighteenth century China medieval Hispanic dream poetry to Italian Renaissance dream theory Shakespeare to Nerval and from Dostoevsky through Emily Bront to Henry James Rupprecht also incorporates various critical orientations including archetypal comparative feminist historicist linguistic postmodern psychoanalytic religious reader response and self psychology **Jung's Quest for Wholeness** Curtis D. Smith, 1990-01-01 Here is a unique analysis of Carl Jung's thought from the perspective of the history of religions Using a religious and historical approach the author identifies the religious goal or ultimate concern of Jung's psychological system and traces the evolution of that goal throughout his Collected Works This book focuses on the historical development of a key component of Jung's thought the quest for wholeness and shows how it functions as the ultimate concern of his psychotherapeutic system The relationships among many of Jung's important concepts such as his complex theory the individuation process archetypal symbolism therapeutic concerns alchemy and Eastern religions are given a new sense of order and significance when viewed in this historical light Rather than presenting

a haphazard array of seemingly endless topics this work emphasizes the continuity underlying Jung's early and later writings. The evolution of Jung's work is divided into three distinct phases: developmental, formative, and elaborative. Whereas the developmental period consists of the time prior to the creation of Jung's ultimate concern, it was during the formative phase that Jung began to consolidate the contours of his newly emerging system. During the elaborative phase, Jung expanded and clarified his ultimate concern and pattern of ultimacy. This book shows that the evolution of Jung's thought moved from a concern with psychic fragmentation to individual wholeness and then to cosmic unity.

The Snake and the Rope: A Jungian View of Hinduism George R. Elder, 2025-02-15 It is obvious that our culture is undergoing a major transition as are our religions that traditionally carry a culture's values even its vitality. Thus it is essential that we understand how religion functions when it is alive and well. Studying it elsewhere in another time and place helps us to be objective about the religious life. And this survey of Hinduism serves that purpose. Since our own religious traditions assume a pre-modern world view, it is important that we try to interpret them in a modern way. Otherwise we lose their wisdom. C.G. Jung's psychology of religion is the most creative interpretation of religion that we have today. I show to what extent Jung wrote about Hinduism, understood it, and how we can apply his insights to our own psycho-religious circumstances.

The Snake and the Rope: A Jungian View of Hinduism is a companion to my book *The Self and the Lotus: A Jungian View of Indian Buddhism* (2 vols) that is also published by BookLocker.

[Archetype Revisited](#) Anthony Stevens, 2015-06-05 *Archetype: A Natural History of the Self* first published in 1982 was a ground-breaking book, the first to explore the connections between Jung's archetypes and evolutionary disciplines such as ethology and sociobiology, and an excellent introduction to the archetypes in theory and practical application as well. C.G. Jung's archetypes of the collective unconscious have traditionally remained the property of analytical psychology and have commonly been dismissed as mystical by scientists. But Jung himself described them as biological entities which, if they exist at all, must be amenable to empirical study. In the work of Bowlby and Lorenz and in studies of the bilateral brain, Anthony Stevens has discovered the key to opening up this long-ignored scientific approach to the archetypes originally envisaged by Jung. At last, in a creative leap made possible by the cross-fertilisation of several specialist disciplines, psychiatry can be integrated with psychology, with ethology and biology. The result is an immensely enriched science of human behaviour. In *Archetype Revisited*, Stevens considers the enormous cultural, social, and intellectual changes that have taken place since the publication of the original edition and includes an updated chapter on The Archetypal Masculine and Feminine reflecting recent research findings and developments in feminist thinking. Commentary on the intrusion of neo-Darwinian thinking into psychology and psychiatry. Analysis of what has happened to the archetype in terms of our understanding of it and our responses to it. This Classic Edition of the book includes a new introduction by the author.

Elusive Self Louise A. Poresky, 1981 The complex novels by Virginia Woolf are seen with clarity and coherence in *The Elusive Self* a thorough and detailed literary interpretation by Louise A Poresky The result is a reliable map that guides the reader through the nine novels Adding the wisdom of religion and psychology to her literary criticism Dr Poresky demonstrates how Woolf's characters strive to achieve personal wholeness The quest progresses sequentially through the novels as a major character in each work struggles against certain demons whether the superficial dictates of society or the voices that say women cannot be artists and thus realizes the difference between ego and essence *An Image Darkly Forming* Bani Shorter, 2015-08-11 Originally published in 1987 a well known Jungian analyst the late Bani Shorter writes here about how women are initiated into becoming themselves Her book was an important contribution to the field of analytical psychology at the time as well as to the increasingly popular study of women's spirituality In former times transitions from one stage of life to another were prepared for and marked by ritual initiation in modern times this necessity is overlooked and women's natural development is made more difficult as a consequence Through working in close therapeutic relationships with women Bani Shorter found that when challenged by crises and transitions in their lives today's women instinctively create rituals nevertheless to mark their journey towards maturation wholeness and meaning In this process they discover something of who they are and recognise dimensions of themselves which have been previously repressed and undreamed of The stories unfolded here can be a guide for all women through their own rites of passage
