Fathoming The Ocean:

Fathoming the Ocean Helen M. Rozwadowski, 2005 By the middle of the 19th century as scientists explored the frontiers of polar regions and the atmosphere the ocean remained silent and inaccessible Rozwadowski explores the scientific and cultural history of how this changed

Fathoming the Ocean Helen M. Rozwadowski, 1996 *The Mysterious Science of the Sea, 1775-1943* Natascha Adamowsky, 2015-10-06 The depths of the oceans are the last example of terra incognita on earth Adamowsky presents a study of the sea arguing that contrary to popular belief post Enlightenment discourse on the sea was still subject to mystery and wonder and not wholly rationalized by science

The Unruly Ocean Erika Techera, Joy McCann, 2024-11-13 This book introduces non specialist readers to the history of how human societies have sought to control use and exploit our oceans seas and shorelines over time in different geographical and cultural contexts The Unruly Ocean examines the development of the modern international legal regime the law of the sea maritime law marine environmental and pollution law fisheries regulation and underwater cultural heritage law and considers how effective these laws have been in addressing the many challenges facing marine and coastal environments ranging from piracy and war to oil spills and the extraction of marine resources It concludes by discussing the socio ecological crises facing the world s oceans seas and shorelines and explores current ideas for reimagining a legal regime that restores the health of our oceanic realm and offers a more holistic transboundary rights based approach to ocean governance This book will be of value to law and non law undergraduate and postgraduate students as well as research scholars and other educated audiences interested in a legal history of the world s oceans seas and shorelines

The Sandbar , *The Geography of the Ocean* Anne-Flore Laloë, 2016-04-14 Despite the fact that the vast majority of the earth s surface is made up of oceans there has been surprisingly little work by geographers which critically examines the ocean space and our knowledge and perceptions of it This book employs a broad conceptual and methodological framework to analyse specific events that have contributed to the production of geographical knowledge about the ocean These include but are not limited to Christopher Columbus first transatlantic journey the mapping of nonexistent islands the establishment of transoceanic trade routes the discovery of largescale water movements the HMS Challenger expedition the search for the elusive Terra Australis Incognita the formulation of the theory of continental drift and the mapping of the seabed Using a combination of original empirical archival material and cartographic and theoretical sources this book uniquely brings together fascinating narratives throughout history to produce a representation and mapping of geographical oceanic knowledge It questions how we know what we know about the oceans and how this knowledge is represented and mapped The book then uses this representation and mapping as a way to coherently trace the evolution of oceanic spatial awareness In recent years particularly in historical geography discovering and knowing the ocean space has been a completely separate enterprise from discovering and

colonising the lands beyond it There has been such focus on studying colonised lands yet the oceans between them have been neglected This book gives the geographical ocean a voice to be acknowledged as a space where history geography and indeed historical geography took place **Shakespeare's Ocean** Dan Brayton,2012-04-12 Study of the sea both in terms of human interaction with it and its literary representation has been largely ignored by ecocritics In Shakespeare s Ocean Dan Brayton foregrounds the maritime dimension of a writer whose plays and poems have had an enormous impact on literary notions of nature and in so doing plots a new course for ecocritical scholarship Shakespeare lived during a time of great expansion of geographical knowledge The world in which he imagined his plays was newly understood to be a sphere covered with water In vital readings of works ranging from The Comedy of Errors to the valedictory The Tempest Brayton demonstrates Shakespeare s remarkable conceptual mastery of the early modern maritime world and reveals a powerful benthic imagination at work The Ocean Reader Eric Paul Roorda,2020-01-17 From prehistoric times to the present the Ocean has been used as a highway for trade a source of food and resources and a space for recreation and military conquest as well as an inspiration for religion culture and the arts The Ocean Reader charts humans relationship to the Ocean which has often been seen as a changeless space without a history It collects familiar forgotten and previously unpublished texts from all corners of the world Spanning antiquity to the present the volume s selections cover myriad topics including the slave trade explorers from China and the Middle East shipwrecks and castaways Caribbean and Somali pirates battles and U boats narratives of the Ocean s origins and the devastating effects of climate change Containing gems of maritime writing ranging from myth memoir poetry and scientific research to journalism song lyrics and scholarly writing The Ocean Reader is the essential guide for all those wanting to understand the complex and long history of the Ocean that covers over 70 percent of the planet The Great Ocean David Igler,2013-05-09 A groundbreaking and lyrically written work that explores the world of the Pacific Ocean **Ocean Science and the British Cold War State** Samuel A. Robinson,2018-05-03 This book focuses on the activities of the scientific staff of the British National Institute of Oceanography during the Cold War Revealing how issues such as intelligence gathering environmental surveillance the identification of enemy science along with administrative practice informed and influenced the Institute s Cold War program In turn this program helped shape decisions taken by Government military and the civil service towards science in post war Britain This was not simply a case of government ministers choosing to patronize particular scientists but a relationship between politics and science that profoundly impacted on the future of ocean science in Britain *Underwater Worlds* Will Abberley,2019-01-15 Underwater Worlds throws open a new area in the emerging field of blue environmental humanities by exploring how subaqueous environments have been imagined and represented across cultures and media The collection pursues this theme through various disciplinary perspectives and methodologies including history literary and film criticism myth studies legal studies and the history of art The essays suggest that since the nineteenth century technologies of underwater exploration have

generated novel sensory experiences that have destabilized conventional modes of representation and influenced new aesthetic forms from fiction and television to virtual reality The collection also examines how representations of underwater environments have reflected and critiqued humans relationships with marine ecology and life forms It reflects on the deeper cultural and symbolic resonances of mythical figures such as mermaids sea monsters and the ghosts of drowned seafarers The contributions further reveal myriad political ideological gendered and racial dimensions of representing underwater environments

The Victorian Novel and the Problems of Marine Language Matthew P. M. Kerr, 2022-01-27 To write about the sea in the nineteenth and early twentieth centuries was to do so against a vast accretion of past deeds patterns of thought and particularly patterns of expression many of which had begun to feel not just settled but exhausted The Victorian Novel and the Problems of Marine Language takes up this circumstance showing how prose writers in this period grappled with the super conventionalized nature of the sea as a setting as a shaper of plot and character as a structuring motif and as a source of metaphor But while writing about the sea required careful negotiation of multiple and sometimes conflicting associations the sea's multiplicity and freight function not just as impediments to thought or expression but as sources of intellectual and expressive possibilities The Victorian Novel and the Problems of Marine Language treats a provocatively diverse group of key authors spanning from the 1830s to the 1930s and including both those inextricably associated with the sea Frederick Marryat Joseph Conrad and those whose writings are less obviously marine such as Charlotte Brontë Charles Dickens George Eliot William Makepeace Thackeray and Virginia Woolf What these writers share among other things is that they simultaneously register and turn to account the difficulties that attend writing about and writing with the sea In the process their sea writing sheds new light on the value of marginalized representational techniques including repetition cliché and imprecision

The Victorian aquarium Silvia Granata, 2021-04-27 The Victorian aquarium explores the vogue for home tanks that spread through Great Britain around the middle of the nineteenth century This book offers an example of how the study of a particular object can be used to address a broad spectrum of issues The Victorian aquarium became in fact a point of intersection between scientific technological and cultural trends it engaged with issues of class gender nationality and inter species relations it drew together home décor and ideals of domesticity travel and tourism exciting discoveries in marine biology and tensions between competing views of science it also marked an important moment in the development of a burgeoning environmental awareness Through the analysis of a wide range of sources including aquarium manuals articles and fictional works The Victorian aquarium unearths the historical significance of nineteenth century tanks reconstructing their far ranging cultural resonance

At the Bottom of Shakespeare's Ocean Steve Mentz, 2009-12-10 Fascinating study revealing Shakespeare's career long engagement with the sea and his frequent use of maritime imagery

Tracks on the Ocean Sara Caputo, 2024-08-29 Longlisted for the 2025 BSHS Hughes Prize Enthralling Philip Ball Ingenious Sujit Sivasundaram In Tracks on the Ocean Sara Caputo tells how our journeys around the globe became fixed

lines on maps and how journey lines themselves reshaped maps and the way that we view the world From Captain Cook's route across the South Seas to the disorientating power of digital technology the tracks we've left on the oceans trading exploring and conquering are a hidden record of humanity's impact on the planet Revealing their histories Caputo uncovers a fascinating new history of maritime travel and modernity Weaving human history cartography literature and climate science Tracks on the Ocean reveals how on the path to discovery we have changed the world **To Master the Boundless Sea**

Jason W. Smith, 2018-04-13 As the United States grew into an empire in the late nineteenth century notions like sea power derived not only from fleets bases and decisive battles but also from a scientific effort to understand and master the ocean environment Beginning in the early nineteenth century and concluding in the first years of the twentieth Jason W Smith tells the story of the rise of the U S Navy and the emergence of American ocean empire through its struggle to control nature In vividly told sketches of exploration naval officers war and most significantly the ocean environment Smith draws together insights from environmental maritime military and naval history and the history of science and cartography placing the U S Navy's scientific efforts within a broader cultural context By recasting and deepening our understanding of the U S Navy and the United States at sea Smith brings to the fore the overlooked work of naval hydrographers surveyors and cartographers In the nautical chart's soundings names symbols and embedded narratives Smith recounts the largely untold story of a young nation looking to extend its power over the boundless sea [The Sea and Nineteenth-Century Anglophone Literary Culture](#)

Steve Mentz, Martha Elena Rojas, 2016-11-18 During the nineteenth century British and American naval supremacy spanned the globe The importance of transoceanic shipping and trade to the European based empire and her rapidly expanding former colony ensured that the ocean became increasingly important to popular literary culture in both nations This collection of ten essays by expert scholars in transatlantic British and American literatures interrogates the diverse meanings the ocean assumed for writers readers and thinkers on both sides of the Atlantic during this period of global exploration and colonial consolidation The book's introduction offers three critical lenses through which to read nineteenth century Anglophone maritime literature wet globalization which returns the ocean to our discourses of the global salt aesthetics which considers how the sea influences artistic culture and aesthetic theory and blue ecocriticism which poses an oceanic challenge to the narrowly terrestrial nature of green ecological criticism The essays employ all three of these lenses to demonstrate the importance of the ocean for the changing shapes of nineteenth century Anglophone culture and literature Examining texts from Moby Dick to the coral flower books of Victorian Australia and from Wordsworth's sea poetry to the Arctic journals of Charles Francis Hall this book shows how important and how varied in meaning the ocean was to nineteenth century Anglophone readers Scholars of nineteenth century globalization the history of aesthetics and the ecological importance of the ocean will find important scholarship in this volume **The Routledge Handbook of Ocean**

Space Kimberley Peters, Jon Anderson, Andrew Davies, Philip Steinberg, 2022-07-29 Invisible as the seas and oceans may be
