Favorite Impressionist Paintings Art Institute of Chicago, J. Patrice Marandel, 1979 **The Art Institute of Chicago**, 1979 *Egon Schiele and the Art of Popular Illustration* Claude Cernuschi, 2022-09-02 Presenting a radically different picture of Egon Schiele's work this study documents in one to one comparisons the extent of the artist's visual borrowings from the Viennese humoristic journal *Die Musketiere* Claude Cernuschi analyzes each comparison on a case by case basis primarily because the interpretation of cartoons and caricatures is highly contingent on their specific historical and cultural context Although this connection has gone unnoticed in the literature in retrospect this correlation makes perfect sense Not only was Schiele's artistic production frequently compared to caricature and derided for being grotesque but Expressionism and caricature are natural allies One may belong to high art and the other to popular culture yet both presuppose similar assumptions and deploy a similar rhetorical position namely that the exaggeration of human physiognomy allows deeper psychological truths to emerge The book will be of interest to scholars working in art history visual culture popular culture and politics *Paintings and Sculptures: Where Do We Look First?* Magali Seille, Zoi Kapoula, 2023-05-16 The book presents three studies in which eye tracking data were collected at the Musée des Beaux Arts in Rouen in June and July 2013 Overall the results of those three studies highlight the knowledge gained from the analysis of the very first saccade in a museum context when people look at paintings and statues The first study analyzes how viewers orient their first saccade on paintings This study shows that in a museum the first saccade is attracted toward the center of paintings This attraction toward the paintings center is found in all the subjects groups that we have studied Noteworthy this effect is significantly less pronounced in individuals who never visit museums It is among amateurs who often visit museums that the center attracts the most the first saccade Among experts painters or art history teachers and to a lesser extent among amateurs the pictorial composition largely determines the orientation of the first saccade We indeed found that as soon as the first saccade experts orient their gaze toward the main subject This phenomenon seems to be explained by the fact that experts immediately orient their gaze here measured as the first saccade toward the paintings location conveying the most meaning It can either be the center or a peripheral area depending on whether the paintings most meaningful subject is located centrally or peripherally The second study shows that the center does not attract the first saccade in 5 year old children This behavior appears later in 8 to 10 year old children However noticeably the 8 10 year old children orient significantly less frequently their first saccade toward the paintings center as adults do and this is also true when one considers non expert adult viewers The results of the third study focus on statues and reveal a very different oculomotor behavior Indeed rather than looking at the center statues viewers exhibit a clear tendency to saccade first at the statues contours This stands in contrast with the behavior that we observe with paintings Our study concludes that statues trigger a specific oculomotor behavior The latter appears to be mostly driven by the physical presence that stone bodies incarnate The movement and the climax of this movement that

sculptors manage to convey thus turn out to attract the gaze in a unique fashion The book concludes that the first saccade is a powerful indicator of the oculomotor behavior that greatly improves our comprehension of the unique relationship between a viewer and artworks

Making Meaning in Popular Song Theodore Gracyk, 2022-06-16 Winner ASA American Society for Aesthetics 2023 Outstanding Monograph Prize For Theodore Gracyk meaning in popular music depends as much on the context of reception and performer's intentions as on established musical and semantic practices Songs are structures that serve as the scaffolding for meaning production influenced by the performance decisions of the performer and their intentions Arguing against prevailing theories of meaning that ignore the power of the performance Gracyk champions the contextual relevance of the performer as well as novel messaging through creative repurposing of recordings Extending the philosophical insight that meaning is a function of use Gracyk explains how both the performance persona and the personal life of a song's performer can contribute to or undercut ethical and political aspects of a performance or recording Using Carly Simon's *You're So Vain* Pink Floyd the emergence of the musical genre of post punk and the practice of cover versions Gracyk explores the multiple sometimes contradictory notions of authenticity applied to popular music and the conditions for meaningful communication He places popular music within larger cultural contexts and examines how assigning a performance or recording to one music genre rather than another has implications for what it communicates Informed by a mix of philosophy of art and philosophy of

language Gracyk's entertaining study of popular music constructs a theoretical basis for a philosophy of meaning for songs
