Feasibility Of Joint Implementation:

The Feasibility of Joint Implementation C.J. Jepma, 2013-06-29 CATRINUS J JEPMA This volume contains the various contributions that were made during the International Conference on Joint Implementation held near Groningen The Netherlands 13 June 1994 The conference was initiated by The Netherlands Ministry of Housing Spatial Planning and Environment along with the Ministries of Foreign Development Cooperation and Economic Affairs and carried out under the responsibility of Foundation IDE Groningen The Netherlands Its underlying idea was to bring together an international group of specialists on Joint Implementation 11 from governments NGOs business and science to discuss its feasibility of 11 The conference was timed between the 9th and 10th session of the Intergovernmental Negotiating Committee INC for a Framework Convention on Climate Change FCCC which was by then considered as the most crucial phase preparing for the first Conference of Parties CoP I Berlin 28 March 7 April 1995 in order to provide additional information or results that might serve as an input in the international negotiating process The main purpose of the conference was however to sit back and have a reflection about what has now become known as 11 and evaluate from the perspective of academics and practitioners jointly with officials what promise the option really holds and to evaluate under what socio economic and political circumstances and conditions one could successfully proceed in setting out the framework for its further testing and application

The Feasibility of Joint Implementation C.J. Jepma, 1995-03-31 The Netherlands Ministry of Housing Spatial Planning and the Environment together with the Ministry of Development Cooperation and the Ministry of Economic Affairs called an International Conference on Joint Implementation in order to further international discussion on the subject The outcome of the conference is summarised here The book highlights such aspects of Joint Implementation as 1 its conceptual base 2 the various pros and cons as perceived from Western Southern and Eastern vantage points 3 the international policy debate and 4 the illustrative experience gained to date The book's many examples show how the JI concept functions in practice and it concludes with an examination of how these experiences enrich the international discussions on the topic

Efficiency Implications of FCCC Joint Implementation, 1994 *Pilotproject on Joint Implementation*, 1996

Criteria and Perspectives for Joint Implementation, 1997 *SEC Docket* United States. Securities and Exchange Commission, 1978 Greenhouse Gas Control Technologies B. Eliasson, P. Riemer, A. Wokaun, 1999-05-20 These proceedings contain 270 papers outlining ideas and contributions to the new scientific technical and political discipline of Greenhouse Gas GHG Control The contributions were presented at the 4th International Conference on Greenhouse Gas Control Technologies GHGT 4 It was the largest gathering of experts active in this new and fast developing field GHGT 4 was different from its predecessors in that it included all greenhouse gases not only CO₂ and all issues which could contribute to the mitigation of the greenhouse problem technical economic and political The main focus was on practical solutions and real demonstrations of mitigation technology being planned and implemented today It also addressed ways to increase the

efficiency of power production and utilisation and looked at proposals to encourage the development of renewable energy sources During the Opening Session 10 keynote addresses were heard from prominent personalities in government industry and academia To tackle this very inter disciplinary problem and to achieve acceptable solutions it is essential for industry and government to initiate intense dialogue and cooperation Conferences like this can provide the opportunity for a meeting of minds between engineers and politicians in the face of global challenge The primary attributes of this global challenge are manifold the problem is global and international it is inter disciplinary both in substance and approach it covers technical political and economic issues and involves government science industry and academia it is complex and non linear and it will take the efforts of all parties involved to solve the problem These proceedings contain ideas for starting demonstration projects and for making better use of the power and flexibility of market measures They also show it is a problem we can influence and that there is a wealth of ideas The challenge now is to find the right partners to put these ideas into action

Promoting Compliance in an Evolving Climate Regime Jutta Brunnée, Meinhard Doelle, Lavanya Rajamani, 2011-12-08 As the contours of a post 2012 climate regime begin to emerge compliance issues will require increasing attention This volume considers the questions that the trends in the climate negotiations raise for the regime s compliance system It reviews the main features of the UN Framework Convention on Climate Change and its Kyoto Protocol canvasses the literature on compliance theory and examines the broader experience with compliance mechanisms in other international environmental regimes Against this backdrop contributors examine the central elements of the existing compliance system the practice of the Kyoto compliance procedure to date and the main compliance challenges encountered by key groups of states such as OECD countries economies in transition and developing countries These assessments anchor examinations of the strengths and weaknesses of the existing compliance tools and of the emerging decentralized bottom up approach introduced by the 2009 Copenhagen Accord and pursued by the 2010 Cancun Agreements

Markets for Climate Change Mitigation Technologies and Services in Developing Countries, 2000 **Flexibility in Global Climate Policy** Tim Jackson, Stuart Parkinson, 2023-04-21 Since the adoption of the Kyoto Protocol to the United Nations Framework Convention on Climate Change in 1997 the negotiation of policy responses to climate change has become an area of major research This authoritative volume sets out the main debates and processes of joint implementation bilateral or multilateral investments in greenhouse gas emission reduction or sequestration and explores the issues involved in constructing an appropriate institutional framework It examines the key economic environmental social and ethical impacts and assesses the operational design of the flexibility mechanisms of joint implementation including emissions trading and the Clean Development Mechanism An approach is developed in which streamlined assessment procedures are combined with institutional safeguards in order to balance the demand for practical mechanisms with the environmental objectives of the Protocol The book provides detailed case studies of energy sector investment in Eastern European host countries

Differential

Treatment in International Environmental Law Philippe Cullet, 2017-03-02 This book is a comprehensive study of differential treatment for developing countries in international environmental law It offers a compelling analysis of the legal dimension of the relationship between developed and developing countries in the environmental field and beyond It first critically examines the principle of legal equality of states and then explores the conceptual framework behind the notion of differential treatment in international law and its relevance in bringing about substantive equality The book examines the development of differentiation in international environmental law considers its application in various environmental treaties and evaluates the legal status of existing differential norms It also examines the contribution of differentiation to the implementation of environmental treaties and the extent to which differential treatment fosters the decentralization of international environmental policy making It is an indispensable resource for all actors involved in environmental law and policy making scholars and students

Climate Change 1995: Economic and Social Dimensions of Climate Change Hoesong Yi, Intergovernmental Panel on Climate Change. Working Group III., 1996-06-27 The consequences of climate change for society are analysed in this landmark assessment from the IPCC This book assesses the available knowledge on the many issues that society has to face including the international decision making framework applicability to climate change of techniques for assessing costs and benefits the significant social costs of projected climate change and the economic assessment of policy instruments to combat climate change nationally and internationally Some important conclusions of this Second Assessment Report indicate that 10 to 30% of greenhouse gas emissions in most countries can be reduced at negative or zero cost no regrets measures Also the literature indicates that climate change will cause aggregate net damage which provides an economic rationale for going beyond no regrets measures It also indicates that a portfolio of mitigation adaptation and research measures is a sound strategy for addressing climate change given the remaining uncertainties This report speaks directly to the issues that are faced by the many countries committed to limit emissions of greenhouse gases by the year 2000 and currently negotiating actions to be taken beyond that date Will be of great value to the international community of policymakers interested in the consequences of climate change as well as to economists social and natural scientists
